Occupational Work Experience Education
Work Experience is a one hour per week class which allows students to earn up to 4 units per semester for experience gained through employment or volunteer service. The content/curriculum for each discipline-specific course is identical to the general work experience course (WKX-200). Enroll in a general Work Experience section and you will be placed in your choice of one of the disciplines below with the help of your instructor. This is temporary stop/gap for human resources. So any faculty can teach this course. The cross-listing will take a year to be reflected in the fall of 2020.

Statement of Purpose

The curriculum committee, a sub-committee of the academic senate, has two primary purposes: to review and approve new curriculum including new courses, course modifications, new programs and program modifications, and to review and approve the curriculum approval process. The college curriculum committee is the sole approving body for Norco College only curriculum. For district shared curriculum it has one vote in the district curriculum committee. The curriculum committee is also responsible for keeping abreast with state mandated curriculum changes and reporting those changes to faculty. Committee members report on curriculum at their department meetings and solicit suggestions and recommendations when needed.
