G. Major Program Modification:

1. ENGLISH ADT – *N 1. MNR MSC: M/V. Harris, S/S. Witmer * 13-Years, 0-Nays. ENG 18, 24 and 25 significantly expand the diversity of options offered to English ADT students, particularly in terms of representation and diversity. At present, Norco offers only one course focused on the literature of a historically minoritized community (ENG 20 – Survey of African American Literature). The revised ADT will allow the discipline to provide students with access and expose to literature from a wider range of communities. Additionally, the above courses will, after further revision, qualify for the Ethnic Studies requirement for transfer to CSUs.

Next Meeting: September 28, 2021 * Zoom Online

Statement of Purpose: The curriculum committee, a sub-committee of the academic senate, has two primary purposes: to review and approve new curriculum including new courses, course modifications, new programs and program modifications, and to review and approve the curriculum approval process. The college curriculum committee is the sole approving body for Norco College only curriculum. For district shared curriculum it has one vote in the district curriculum committee. The curriculum committee is also responsible for keeping abreast with state mandated curriculum changes and reporting those changes to faculty. Committee members report on curriculum at their department meetings and solicit suggestions and recommendations when needed.

Questions to Consider about the COR:

- Has the discipline had a conversation about how to ensure that equity is visible in the COR as a priority? (Two more comprehensive resources you might consider: Glendale Community College's *Guide for Creating Equitable Curriculum*; Portland State University's *Culturally Responsive and Inclusive Curriculum Resources* which includes both general guiding questions and discipline specific resources)
- Do the course materials reflect multiple perspectives and contributions to the field, including those of scholars from previously minoritized groups as well as representative of RCCD's student population?
- Do methods of instruction and sample assignments offer opportunities for students to build on existing knowledge or experience as relevant to the class and provide opportunities to explore culturally relevant and inclusive texts and topics?
- Do methods of instruction and evaluation and sample assignments offer opportunities for students to develop and practice skills needed for later advanced academic tasks on which they will be evaluated?

COR Requirements to Check:

(See the RCCD Curriculum Handbook for complete information on developing a new course or modifying an existing course. **Below is a checklist of often-missed and misunderstood elements that can slow down approval processes** – this is not a comprehensive checklist; please see the handbook for complete process.)

- Curricunet COVER tab:
 - Use the rationale box to give a short explanation to curriculum reviewers of changes made (if a modification) or reason for the new or deleted course.
 - Make sure you've selected the discipline-appropriate TOPS code.
 - If the course is taught at more than one college, have discipline members across the district weighed in on the proposal and voted to approve?
 - If the course belongs to a single discipline but you want to enable it to be taught other disciplines, please select that discipline under cross-listed discipline. (This is not the same as a cross-listed course; that is a separate Curricunet tab. See next bullet.)
- Curricunet CROSS LISTED tab: If the course is cross-listed, please select the other discipline, and make sure that an identical version of this course is being launched/modified by that other discipline so the proposals go through together.
- Curricunet UNITS/HOURS tab:
 - Units/hours calculation:
 - 18 lecture hours requires 2x outside-of-class hours = 1 unit
 - 54 lab hours (typically no outside-of-class hours)* = 1 unit
 - CHECK your units and hours for accuracy with this formula:
(lecture hours + lab hours + outside-of-class hours) / 54 = units of class*
 - If hours don't match listed units, adjust.
 - *you might occasionally calculate a unit value that is slightly over the units of the course, especially in the case of a course that has a small number of lab hours or small amount above a 54 hour increment; as long as the units don't calculate to the next multiple of .5, it is acceptable; units

are awarded in .5 increments, but courses must meet that threshold. (.25 unit courses exist for POST classes as long as they meet the hours minimum for .25 and don't meet .5; after .5, ALL classes only award units in .5 increments.)

- Select from the repeatability drop down menu; this defines the number of times a student can take a course they have PASSED. Most **credit** courses need to have a repeatability of zero unless they meet the Title 5 (§55041) rules for repeatability.
- Curricunet OBJECTIVES tab:
 - All courses must have objectives.
 - Enter each objective in a separate field.
- Curricunet ENTRANCE SKILLS tab:
 - Entrance skills are required of any course with a requisite or advisory selected at the requisite tab (no entrance skills if there are no requisites or advisory).
 - Fill in the blank field with the entrance skill.
 - Link it to the student learning outcome from the requisite course.
 - The text for the entrance skill and the linked skill may be the same, but this is two separate actions and blocks of text.
- Curricunet COURSE SLO tab:
 - All courses must have outcomes.
 - Enter each outcome in a separate field.
- Curricunet COURSE CONTENT tab:
 - Courses should have content that is detailed to at least a second level (content should not just be areas 1-5; there should be 1A. 1B. etc.)
 - Content areas that are at a second level (or more) need two items (otherwise it is still the same level); this is to say, if your outline has an "A" it needs a "B."
- Curricunet METHODS tabs: these should be as discipline specific as possible.
- Curricunet SAMPLE ASSIGNMENTS tab:
 - Provide an indication of the types of assignments that faculty could offer that would address course content and SLOs (identification of specific SLOs not needed).
 - Reading assignments should be more specific than "read the textbook."
- Curricunet COURSE MATERIALS tab:
 - UC transferable courses need **lor2? text(s)** published within the last 5 years.
 - Provide OER options where possible and approved by discipline.
- Curricunet ATTACHED FILES tab:
 - Attach minutes or an email vote tally showing discipline approval (including discipline members from all colleges that have the course in their catalogs).
 - Attach minutes or an email vote tally showing department approval from the department where the new, modified, or deleted course originated.

CIS 63 **Introduction to Structured Query Language (SQL)**

Rationale: This course is required in the new programs, A.S. in Data Science and Data Analytics Certificate. This course will provide student knowledge in Structured Query Language (SQL) and working with databases, which is essential in the Data Science field. The skills provided in this course are fundamental to other courses in the programs, such as Big Data and Machine Learning.

Course Major Modifications

M N R Discussion

Action

CIS 30A **Introduction to Python Programming**

Rationale: Major course modification is needed to include general education SLO to meet UC and CSU general education requirement along with changing course prerequisite (CIS-1A) to be advisory to be more inclusive of students who already have the technical and computing skills for programming.

CIS 30B **Python Programming in Networking**

Rationale: Per discipline recommendation, major course modification is needed to include general education SLOs and change course prerequisite, CIS-1A.

CIS 30C **Python Programming in Cybersecurity**

Rationale: Per recommendation of CIS discipline, course major modification is needed to include general education SLOs to meet UC/CSU general education course articulation requirement. Change of course prerequisite, CIS-1A, to advisory will help increase student diversity and inclusion in this certificate. Course materials are also updated to include up-to-date resources and books as there has been changes to programming libraries and Python versions.

CIS 30D **Python Programming for Internet of Things (IoT)**

Rationale: Per discipline recommendation, this major modification includes general education SLOs to meet UC/CSU requirement for articulation. Textbook and course materials are also updated due to changes in Python versions and libraries.

CIS 30E **Advanced Python Programming**

Rationale: Per discipline recommendation, course major modification includes general education SLOs to meet UC/CSU articulation requirement. This modification also includes course materials updates as Python version and libraries have changed.

CIS 68A **Introduction to Machine Learning**

Rationale: This course is part of Data Science and Data Analytics program. It introduces students to concepts and theories of Machine Learning to prepare students of coursework and career in Computer Science and Data Science. The knowledge and skillsets provided in this course will help student prepare for STEM workforce. This course also aims to increase student population diversity in STEM by providing computational and statistical skills that will help learners build careers in data analytics, programming and engineering.

CIS 68B **Big Data Fundamentals**

Rationale: This course is part of the Data Science A.S degree and Data Analytic certificate programs. This course is aimed to build data analytic skills that will help student establish their career and/or prepare students for university studies in Data Science. This course promotes STEM education that will aid in creasing technical workforce diversity in Inland Empire region.

CIS 70A **Foundations of Data Science**

Rationale: Foundations of Data Science will attract students to the Data Science Certificate and Program. They will be exposed to an industry-leading programming language and statical inference for data driven decision-making. This course will prepare students to be successful in Statistics for STEM and Introduction to Python. The Data Analytics Certificate and Associates Degree in Data Science prepares students for Junior Data Analyst positions. The U.S. Bureau of Labor Statistics reports that the demand for data science skills will drive a 27.9 percent rise in employment in the field through 2026. Data Scientist make businesses grow better and are the backbone of data-intensive companies.

CIS **Data Analytics**

Rationale: This program addresses industry’s continuing demands for professionals to test and build tools to meet the data quality validation needs for a cloud platform-based application and building enterprise analytics of large data volume. Based on Inland Empire/Desert region Labor Market Information report, the data-analysis occupation is projected to have 189 annual job openings, increasing employment by 8% through 2024. The 10th percentile hourly wage for data analysis related occupations exceeds the Family Needs Calculator self-sustainability rate, indicating that approximately the top 90% of workers in this occupation earn self-sufficient hourly wages. The courses in this program will also align with university courses, which will permit students to transfer to further develop skills and knowledge in the areas of Data Science.

H	PAL	Paralegal Studies	<input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>	Holding for justification of program total units.
	Rationale:	<p>The changing climate of the legal field has dictated new and revised courses to align with industry needs. The program and courses are geared for students to connect with industry earlier on in the program. This includes, but is not limited to employment, apprenticeship, internships and to position themselves for summer legal institutes. There are also technological changes occurring in the profession. Additionally, students have been placed in internships and employment in many of these areas. Preparing them with the courses can foster a better position for their success within the industry areas. Additionally, the program exceeds the standards of the California Business & Professions Code and the American Bar Association. The Paralegal Program in the future will seek official American Bar Association Approval of Paralegal Programs and thus positions itself for that process.</p>

WEL	Welding Technology	<input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>
Rationale:	<p>Rationale for the changes to the Welding Technology Certificate of Achievement and Degree is to ensure courses within the discipline are utilized concurrently with the courses in the individual smaller certificate patterns. These courses may be used as either required or elective courses within multiple Welding Certificate patterns. The two additional elective courses proposed in the Welding Technology Certificate/Degree pattern will simultaneously allow students to utilize the proposed courses in the smaller certificate options as well as giving them the skill to obtain employment and then continue taking courses to achieve the larger Welding Technology Certificate or Degree. We are also removing the WEL-34 class as it has been deleted.</p>	

Curriculum Basics

<https://www.norcocollege.edu/committees/cc/Pages/Proposal-Forms.aspx>

<https://websites.rcc.edu/curriculum/forms/>

1. Viewing a course outline of record (COR) in META
 - a. Active, Historical, In review, Draft
2. Reviewing a course proposal in META
 - a. My approvals
 - b. Comments

Types of Course Proposals

- New course
- Existing course modification
 - Major modification
 - Minor modification
- Distance education (DE) proposal
 - Hybrid and online
- Course inclusion (course inclusion form)
 - course already exists R or MV
- Course exclusion (course exclusion form)
 - course will still exist at R or MV
- Course deletion
 - course will no longer exist at any of the colleges

Curriculum process for approving new courses or modifying existing courses

1. Originator launches a new course or modifies an existing course in META
2. Discipline and department approval
3. District facilitator
4. Technical review committee
5. College curriculum committee
6. District curriculum committee (if a district-wide course)

The process is basically the same for modifications to programs (certificates and degrees).

HOW TO WRITE AN INTEGRATED COURSE OUTLINE

Parts of a course outline

- Course number and course title
- Hours and units
- Course description and short description
- Prerequisites, corequisites, and advisory
- Entrance skills
- Student learning outcomes (SLOs)
- Learning objectives
- Course content
- Methods of instruction
- Methods of evaluation
- Sample assignments
- Course materials

Hours and Units

18 lecture hours = 1 unit

54 lab hours = 1 unit

For example, a course with 36 lecture hours and 54 lab hours is 3 units.

Entry Skills

List 3 or more skills which that students must possess upon entry to the course in order to justify their ability to succeed in this course.

These may consist of:

- generalized learning outcomes from a preceding sequential course;
 - skills acquired in on-the-job training;
 - skills learned in co-requisite or previously taken courses; or
 - background knowledge assessed through proficiency testing or certification (e.g., ability to speak a second language, to perform CPR, to use Visual Basic, etc.
- If applicable, link the entry skills to the prerequisite course.

Student Learning Outcomes

Write at least 1 student learning outcomes which accurately reflect specific performance goals for students who successfully complete this course:

- Use as many higher-level Bloom's Taxonomic Verbs as possible, that is, those which require the critical thinking skills of analysis, synthesis and evaluation.
- If your course is vocational, applied, performance, or basic-skills, verbs demonstrating affective and psycho-motor skills are acceptable and expected.
- For performance, applied, vocational and basic-skills classes, group specific skills sets into general performance goals.
- Link the SLOs to the new General Education SLOs.

Definition: Objectives

- **The Course Outline of Record: A Curriculum Reference Guide Revisited (2017)**
 - [COR Guide revisited](#)
- Course objectives state the concepts or skills faculty introduce to students in a course or program in order to prepare students to meet a student learning outcome.
- Objectives are the means, not the ends.

Course Student Learning Outcomes

- Course SLOs are the intended abilities and knowledge students can demonstrate after successfully completing the course objectives.
- SLOs must be written in measurable or observable terms and as actions that a student will perform in order to display the skills necessary to meet the SLO.
- Overarching skills, abilities, knowledge, or attitudes gained as a result of successfully completing course objectives that students can demonstrate beyond the classroom.

Course Student Learning Outcomes

- Synthesis of discreet skills using higher level critical thinking skills
- Typically encompass multiple discrete objectives
- The SLO synthesizes the content and skills learned by completing all the objectives.

An example...

Course SLO:

- Evaluate and critique student drawings and receive criticism from others.

Underlying Course Objectives:

- Evaluate drawings orally using correct terminology related to concepts, materials, and techniques.
- Evaluate drawings in writing using correct terminology related to concepts, materials, and techniques.
- Critique finished drawings and receive criticism from others in a group setting

Another example...

Course SLO

- Write academic prose with a clear purpose and effective, logical, relevant support from sources.

Underlying Course Objectives

- Establish and maintain a clear controlling idea (a thesis) in a documented essay of at least 1,500 words with significant and substantive content that is based on college-level reading materials.
- Develop an essay that uses convincing evidence in a sequence of effective and organized paragraphs with a clear and apparent logical progression to illustrate a larger idea.
- Use the library and Internet as tools to find college-level reading materials. Comprehend and evaluate such texts. Incorporate these readings as concrete and credible support for a position. Acknowledge evidence from a variety of primary and secondary sources.

Another way of stating this

SLOs:

- Overarching, Summative, Measurable or Observable
- Represent synthesis in learning
- Applicable beyond the completion of the course
- Mapped to program learning outcomes

Objectives

- Specific, discrete skills, knowledge, abilities, attitudes students will learn in the course
- Mapped to course content

Title 5 and ACCJC Standards

- Title 5 states that OBJECTIVES must be a component of the COR – § 55002(a)(3).
- ACCJC requires OUTCOMES – II.A.3: The institution has officially approved and current course outlines that include student learning outcomes. In every class section students receive a course syllabus that includes learning outcomes from the institution's officially approved course outline.

Critical Thinking

Students will be able to demonstrate higher-order thinking skills about issues, problems, and explanations for which multiple solutions are possible. Students will be able to explore problems and, where possible, solve them. Students will be able to develop, test, and evaluate rival hypotheses. Students will be able to construct sound arguments and evaluate the arguments of others.

Information Competency & Technology Literacy

Students will be able to use technology to locate, organize, and evaluate information. They will be able to locate relevant information, judge the reliability of sources, and evaluate the evidence contained in those sources as they construct arguments, make decisions, and solve problems.

Communication

Students will be able to communicate effectively in diverse situations. They will be able to create, express, and interpret meaning in oral, visual, and written forms. They will also be able to demonstrate quantitative literacy and the ability to use graphical, symbolic, and numerical methods to analyze, organize, and interpret data.

Self-Development & Global Awareness

Students will be able to develop goals and devise strategies for personal development and well-being. They will be able to demonstrate an understanding of what it means to be an ethical human being and an effective citizen in their awareness of diversity and various cultural viewpoints.

Course Content

- List of the key principles/ topics and subtopics that must be covered by all instructors.
- Actual **course content** should be listed here, **NOT activities or assessments**, such as introductions, midterm exams, etc.
- The use of a formal (but detailed) outline or indented style is highly recommended.
- NOTE:** “Components of a Model Course Outline of Record” (CA Academic Senate, Nov. 1995) states that the **course content** is “the central component of the outline. This section should include a complete listing of the topics taught in the course. They should be arranged by major headings with sub-topics”.
- Where multiple approaches to a course are reasonable and desirable, indicate this. For example, an instructor’s approach to a literature or social science class may legitimately be historical/ chronological, thematic, or genre-based.

Methods of Instruction

- Write your **methods of instruction** in such a way that the methods described are specifically related to the course objectives.
- Generally, the methods of instruction can be structured in two parts:
 - (1) A statement of the particular method (lecture, group activities, etc.) followed by
 - (2) a statement of what learning outcome that method is designed to activate (to gain practice in writing critical essays, to enhance awareness of XX, etc.)
- *Title 5 indicates that critical thinking must be a component of all college courses, so make sure your methods of instruction show that critical thinking is happening!*

Sample Methods of Instruction:

Bad:

Presentation of class lectures/discussions/demonstrations.

Good:

Presentation of class lectures/discussions/demonstrations on the operations of arithmetic to create proficiency in solving algebraic expressions.

Sample Methods of Instruction:

Bad:

Pair and group activities.

Good:

Pair and group activities to develop and discuss the interpretation of plays and the effectiveness of theatrical techniques.

Methods of Evaluation

Avoid a simple list. Clearly articulate how these methods of evaluation actually help instructors to assess whether or not students are achieving student learning outcomes.

Keep in mind that your list should include **typical assignments** used in achieving critical thinking.

Sample methods of evaluation:

Bad:

Oral reports and presentations.

Good:

Oral reports and presentations on the interpretation of live theatrical performances and dramatic texts for cultural content and performance technique.

Sample methods of evaluation:

Bad:

Quizzes/examinations.

Good:

Quizzes/examinations on the basic operations of arithmetic and their application to solving mathematical problems.

- Examples of Sample Reading Assignments:

Bad:

Read chapters from the required text.

Good:

Read about the various interdisciplinary approaches to creativity and how to activate the creative impulse.

- Examples of Sample Writing Assignments:

Bad:

Write a 1500 word essay.

Good:

Write a 1500 word essay on an analysis of the creativity and imagination of a famous person in history.

Course Materials

- List text(s) which are typical and appropriate for this course.
- Should include an updated text within 5 years.
- Use standard MLA or APA bibliographical form. **Alphabetize your list of texts.** See examples below.

[MLA format]

Rost, Michael. Listening Contours. 4th ed. Lingual House, 2004.

[APA format:]

Rost, Michael. (2005) *Sociolinguistics*. Oxford University Press.

- List or describe any additional materials, such as teacher-prepared booklets, cassette tapes, CDs, DVDs, supplementary readers, primary texts, etc.
- List or describe any other materials required for student use/success in this course, such as protective eyewear, uniforms, aprons, etc.

Distance Education

- DE proposals should explain how “regular effective contact” will take place.
- Unlike correspondence education, in which students are responsible for initiating contact with the instructor, DE instructors are required to actively initiate interaction with their students.

Forms of Instructor Initiated Contact

At a minimum, instructors should use:

- Threaded discussion forums within the course management system, with appropriate instructor participation.
- E-mail.
- Announcements
- Timely feedback on student work.
- Virtual Office Hours.
- Instructor prepared e-lectures or introductions in the form of e-lectures to any publisher created materials (written, recorded*, broadcast, etc.) that, combined with other course materials, creates the virtual equivalent of the face-to-face class.

- DE Courses are considered the *virtual* equivalent to face-to-face courses. Therefore, the frequency of the contact will be at least the same as would be established in a regular, face-to-face course. The number of instructor hours that an instructor is available to students enrolled in a DE class (asynchronous or synchronous) must be at least equal to the number of hours of availability required for face-to-face students.

Associate Degrees for Transfer (ADTs)

In response to Senate Bill 1440, the Academic Senates for California Community Colleges and California State University have developed a faculty-led, state-wide, concerted effort to identify the course content for new **associate degrees for transfer**, which simultaneously award students an associate degree and prepare them for special benefits/guarantees upon transfer to CSU. The C-ID infrastructure is being used to develop and vet the transfer model curriculum (TMC) in each of the most common transfer majors. Further, C-ID is being used to develop descriptors for all the courses in the TMCs, providing assurances to students and faculty that courses offered at one institution are comparable to those elsewhere, provided they have the same C-ID number.

**The c-id descriptors and TMC templates
can be found at c-id.net**
