

Every great scientist has a story to tell. A distinguished chemist and dean, and two Nobel laureates from the fields of physics and chemistry discuss how they started as first-generation college students and went on to become leaders and change-makers. Both the science and the stories behind the science will be explored.

JOIN US AS WE LIVE STREAM!

WHERE: STEM 301

WHEN: WEDNESDAYS

TIME: 6:00-7:00PM

ALL STUDENTS WELCOME!

**Light refreshments will be provided!

April 3

Gravitational Waves: From Einstein to a new Science
Barry C. Barish
Distinguished Professor of Physics and Nobel Laureate

Bio:
