## FEMA - COVID-19 WHOLE-OF-AMERICA RESPONSE

FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people. Even as FEMA is focused on responding to COVID-19, we are also preparing and maintaining readiness for other disasters to include spring flooding, severe weather and the upcoming hurricane season.

- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through Project Airbridge.
  
- **Food & Agriculture**
  - Food insecurity continues to drive surging demand at food banks straining inventories. Despite continuing consumer demand for basic staples like milk and meat, wholesale food producers in the food service and commercial markets are struggling as demand has diminished.
  - A large meat production facility in SD confirmed 238 cases of COVID-19 and announced they will be closing this production facility indefinitely. The plant closure will also impact 550 independent farmers who supply pork to the plant.
  - An additional meat production company announced its Iowa plant will be idled for cleaning until April 20 due to a COVID-19 outbreak.
  - The fresh produce industry is struggling from the closure of food service and commercial markets. It is estimated that these markets account for approximately 40% of all produce consumed in the US and that the industry is seeing more than \$500 million dollars a week in lost sales. Analysts estimate that produce growers, shippers and wholesalers have lost \$5 billion in sales since the start of the pandemic.
  - Industry concerns remain regarding shortages of carbon dioxide (CO<sub>2</sub>) that would impact food and beverage processing as well as other important sectors.
  - Temporary closures at some of the largest poultry, pork, and beef processing plants due to employee infection may cause upstream and downstream disruptions in the supply chain. This comes at a particularly critical time as companies try to shift their production lines to supply retail stores instead of commercial markets. While meat processing output has diminished, retail demand for meat continues to surge as consumers stock up.
  
- **Healthcare & Public Health**
  - Indiana State Dept of Health partnered with local health officials in four communities to hold free drive-thru testing clinics for healthcare workers, first responders, and essential workers showing COVID-19 symptoms.
  - Indiana University will allow fourth-year IU School of Medicine students to voluntarily graduate early to help state's healthcare workers during COVID-19 pandemic surge.
  - A major grocery store chain will partner with Kentucky health officials and provide staff and personal protection equipment (PPE) at new drive-thru testing sites statewide.
  - In Ohio a large employer is building its own lab in pilot program to begin COVID-19 testing for employees.

- Numerous National Animal Health Laboratory Network (NAHLN) laboratories are testing animal samples due to concerns over potential infection of pets and livestock with COVID-19.
- State of Iowa identified more than 50% of all Iowa COVID-19 deaths occurred in residents of long-term care facilities— the state is focusing additional testing measures at those facilities.

- **Transportation**

- A sharp and sustained drop in trucking volume as a result of declining demand could have significant effects on the industry. In certain markets there are more drivers available than freight to haul. As drivers exit the market due to lack of work, when demand returns, the driver pool will be 'smaller which could lead to longer lead times, less freight volume, and prolonged stockouts.

# COVID-19 Update

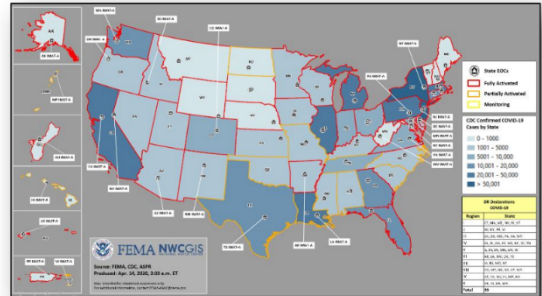

**Situation:** FEMA, HHS, and federal partners are working with state, local, tribe, and territorial governments to execute a whole-of-America response to the COVID-19 pandemic. The federal government is coordinating the deployment of PPE and ventilators from multiple sources including SNS, donations, and vendor procurements. These shipments are being sent nationwide with prioritization given to areas in greatest need.

**State / Local Response:**

- All State / Territory EOCs activated

## **A group of pastors is suing California's governor over restrictions on religious gatherings**

- The suit was filed Monday in the US District Court for the Central District of California by the Dhillon Law Group, which is led by Harmeet Dhillon -- a Republican Party official -- on behalf of four plaintiffs, three of whom are pastors.

The plaintiffs include:

- Dean Moffatt, a pastor at an Indio church who alleges he was fined \$1,000 for holding a church service on Palm Sunday
- Brenda Wood, a pastor at a Riverside church
- Patrick Scales, a pastor at a Fontana church
- Wendy Gish, a member of Scales' church

The group argues in the suit that Newsom and other state officials “in a gross abuse of their power, have seized the coronavirus pandemic to expand their authority by unprecedented lengths, depriving plaintiffs and all other residents of California of fundamental rights protected by the US and California Constitutions, including freedom of religion, speech, and assembly, and due process and equal protection under the law.”
