News

Tune in to Change the World on June 27

- The Pan American Health Organization (PAHO) was chosen by Global Citizen as one of its regional partners for the Americas of its United for Our Future campaign, which seeks to raise funds for the development of tests, treatments and vaccines against COVID-19, and to guarantee their equitable access to everyone, everywhere. The campaign will also focus on mitigating the impact of the pandemic on people living in poverty and getting the world back on track towards the United Nations Sustainable Development Goals (SDGs).
- On Saturday, June 27, a major concert will be held to provide governments, corporate leaders and philanthropists with a platform to make their commitments towards the fair distribution of tools and treatments for COVID-19. Hosted by Dwayne Johnson, The Concert will feature performances from Chloe x Halle, Christine and the Queens, Coldplay, J Balvin, Jennifer Hudson, Justin Bieber and Quavo, Miley Cyrus, Shakira, Usher and Yemi Alade. The Concert will also include appearances from Charlize Theron, Chris Rock, David Beckham, Derrick Johnson, Diane Kruger, Forest Whitaker, Hugh Jackman, Ken Jeong, Kerry Washington, Nikolaj Coster-Waldau, Olivia Colman, Opal Tometi, Salma Hayek Pinault and more.

“We Were Wrong” – Novak Djokovic Apologizes For Coronavirus Spread Amongst The Tennis Fraternity

- World Number one tennis player Novak Djokovic was tested positive for coronavirus after Grigor Dimitrov, Viktor Troicki and Borna Coric confirmed having the infections. After the cancelation of the Adria Tour finals in Croatia, Djokovic flew back to Belgrade, Serbia and in the airport, his infection was tested and confirmed.
- Djokovic said in a statement: "We organised the tournament at the moment when the virus has weakened, believing that the conditions for hosting the tour had been met... I am extremely sorry for each individual case of infection. I hope that it will not complicate anyone's health situation and that everyone will be fine."

Parks and playgrounds deserted amid new Guetersloh outbreak

- Given that all the schools and nurseries are closed in Guetersloh - the north-west German district at the center of the country's latest COVID-19 outbreak
- Parents are worried since lockdown was reimposed after 1,500 workers tested positive for coronavirus at a nearby meat factory.
- Along with nurseries - bars, gyms, swimming pools and cinemas are closed again. Businesses only just trying to recoup money lost during the height of the crisis are now facing more losses.
- They claim the virus was able to spread at the plant because the many migrant workers employed there live in cramped conditions. They also accuse the state governor of not acting fast enough.

LAX adding thermal-imaging cameras, other measures to screen for coronavirus

- Los Angeles International Airport is introducing new measures aiming at slowing the spread of coronavirus during the summer travel season.

- The airport is introducing new thermal imaging cameras that can check temperatures from a distance as people walk into the building. The cameras let airport staff check temperatures of passengers without having to stop each person individually.
- "If you had to stop and check each one individually it would be a very long process," said Justin Erbacci, an official with Los Angeles World Airports. "There would be queues outside. It would probably be anti-safe because you would have a queuing problem and physical distancing problem."

Riverside County to begin coronavirus antibody testing as part of prevalence study

- Thousands of Riverside County residents will soon be contacted and asked to take part in a coronavirus antibody testing study being sponsored by county health officials.
- About 3,500 randomly selected county residents will be asked if they are interested in taking part in the study, which could determine whether they have been exposed and developed COVID-19 antibodies. The study will help determine the Riverside County prevalence of COVID-19, which will be used to inform planning efforts. Potential participants will be contacted by telephone or email starting later this week.
- "We are asking those who are contacted to strongly consider taking part in the study," said Kim Saruwatari, director of Riverside County Public Health. "It's important to know the extent of the spread of the virus have developed antibodies. That information is vital as we move forward."

Ventura County residents can get free coronavirus antibody tests to detect past infections

- Ventura County residents can get free antibody tests to find out if they've already fought off the coronavirus, officials said Friday.
- The first round of serology testing will begin 10 a.m. Monday in Simi Valley and will be followed by additional testing in Thousand Oaks, Moorpark, Camarillo, Santa Paula Fillmore and Ojai over the next two weeks.
- Ventura residents can get tested at the Barranca Vista Park Wednesday, the Ventura City Fire Department said, adding that officials are expected to announce additional dates for the city in the future.
- Residents can arrive to get the blood test done without an appointment, on a first come, first-served basis, county officials said.

(U) COVID-19 CASES TRAJECTORY CHART | 7-DAY CHANGE

(U) Adapted by JRIC, from local county department of public health websites and open source reporting.

2020-21 State Budget Agreement

- On June 22, Governor Newsom and Assembly and Senate leadership reached an agreement around a final 2020-21 state spending plan.
- For California Community Colleges, the 2020-21 budget agreement prevents cuts to apportionments and categoricals.
- In order to accomplish this, \$1.45 billion in funding to colleges is deferred to future years and provides no COLA and no enrollment growth.
- Of the \$1.45 billion, \$791 million would trigger-off if Congress approves a fourth stimulus package.

Apportionments & Deferrals

- Rejects the May Revision proposal to cut apportionment funding.
- Approves the May Revision proposal to extend minimum revenue provisions (hold harmless) under the Student Centered Funding Formula by an additional two years.
- No COLA and no enrollment growth.
- Approves a \$662.1 million deferral from 2020-21 to 2021-22. Includes trailer bill language to allow hardship exemptions.
- Includes a trigger deferral of \$791.1 million Proposition 98. This deferral would be withdrawn if the state receives federal funding.

Block Grant

- Includes \$120 million one-time from Proposition 98 and federal funds to support a basic needs/learning loss/COVID-19 response block grant to colleges.
- Support expenses such as mental health services, housing and food insecurity, re-engagement for students who left college in Spring 2020, technology and development of online courses, and student supports.

Categoricals

- Protects against cuts to any categorical programs, the Strong Workforce Program and Student Equity and Achievement, keeping the programs at 2019-20 spending levels.
- Creates a food pantry expense within the Student Equity and Achievement Program.
- Provides \$10 million ongoing support for immigrant legal services.

Other Provisions

- Reduces funding for Calbright College by \$5 million ongoing and \$40 million one-time.
- Prohibits community college district boards from terminating the services of any permanent or probationary classified employees of the school district or community college district that hold classifications in or are assigned to positions in nutrition, transportation, or custodial services.

June 22 - RUHS Public Health: [Riverside County to begin coronavirus antibody testing as part of prevalence study](#)

Riverside County to begin coronavirus antibody testing as part of prevalence study

Thousands of Riverside County residents will soon be contacted and asked to take part in a coronavirus antibody testing study being sponsored by county health officials.

About 3,500 randomly selected county residents will be asked if they are interested in taking part in the study, which could determine whether they have been exposed and developed COVID-19 antibodies. The study will help determine the Riverside County prevalence of COVID-19, which will be used to inform planning efforts. Potential participants will be contacted by telephone or email starting later this week.

“We are asking those who are contacted to strongly consider taking part in the study,” said Kim Saruwatari, director of Riverside County Public Health. “It’s important to know the extent of the spread of the virus have developed antibodies. That information is vital as we move forward.”

Residents cannot volunteer for the study, in part, because health officials want a more representative sampling of the community. Antibodies are part of the body’s defense against infections, develop and stay in the blood even after the infection is over. Public Health is not creating the list of participants and will not collect the individual information from the study.

As a reminder, the medical community does not yet know the extent of the benefits of testing positive for coronavirus antibodies. For example, it is not yet known if someone can contract the virus again after testing positive for antibodies. Conducting this study will provide valuable information as COVID-19 continues to be researched.

“Public health officials around the world continue to learn about coronavirus and this antibody study could enhance our local understanding of this disease,” said Riverside County Board Chair and Fourth District Supervisor V. Manuel Perez. “It is important that Riverside County residents get the regular test for coronavirus to protect their families, coworkers and communities, and, if contacted, to participate in an antibody study as well to help our research efforts.”

Those who are selected will complete a survey, then have blood drawn at one of nine sites located throughout the county. These sites are not the same locations where coronavirus testing for active infections is taking place.

For more information about the antibody testing www.rivcoph.org/antibodystudy.

7-day Forecast for Counties in far Southwest CA

Period June 24 - July 1 (24-hr)	Orange	SW San Bernardino	All Deserts	Western Riverside	San Diego
Today	None	Warm	Hot	Warm	None
Thursday	None	Warm	Hot	Warm	None
Friday	None	Very Warm	Hot	Very Warm	None
Saturday	None	Warm	Hot	Warm	None
Sunday	None	Not as warm	Very Warm Breezy	Not as warm	None
Monday	None	None	Cooler Breezy	None	None
Tuesday	None	None	None	None	None
Wednesday	None	None	None	None	None

Forecast Discussion

Mostly seasonal conditions with little day to day variations in temperature will continue through Saturday. Temperatures in all deserts will be several degrees above average. Low clouds will continue to spread into portions of the valleys each night and morning, with partial afternoon clearing along the coast. A weak weather disturbance passing to our north Sunday and Monday will bring below normal temperatures to all areas with breezy west to southwest winds in the mountains and deserts. Seasonal temperatures are expected to return during the middle to latter part of next week.

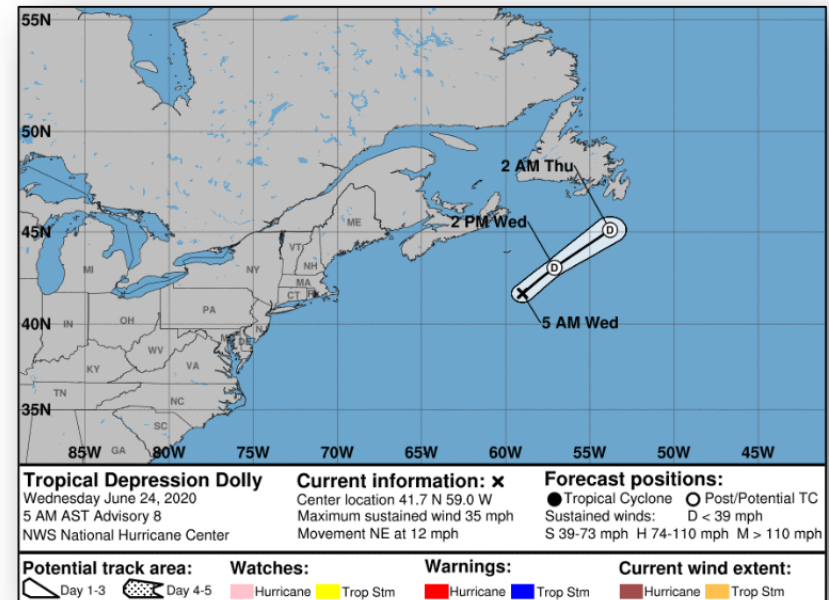

Latest hazard threat table: <https://www.wrh.noaa.gov/sgx/event/dsstable.php>

Tropical Outlook – Atlantic

Tropical Depression Dolly (Advisory #8 as of 5:00 a.m. ET)

- Located 450 miles SW of Cape Race Newfoundland
- Moving NE at 12 mph
- Maximum sustained winds 35 mph
- Expected to become a remnant low later today
- There are no coastal watches or warnings in effect

Tropical Outlook – Eastern Pacific

Disturbance 1 (as of 8:00 a.m. ET)

- More than 1,700 miles SW of the southern tip of the Baja California peninsula
- Conditions appear conducive for gradual development; likely to become a tropical depression during the next few days while it moves slowly west
- Formation chance through 48 hours: **High (80%)**
- Formation chance through 5 days: High (70%)

Disturbance 2 (as of 8:00 a.m. ET)

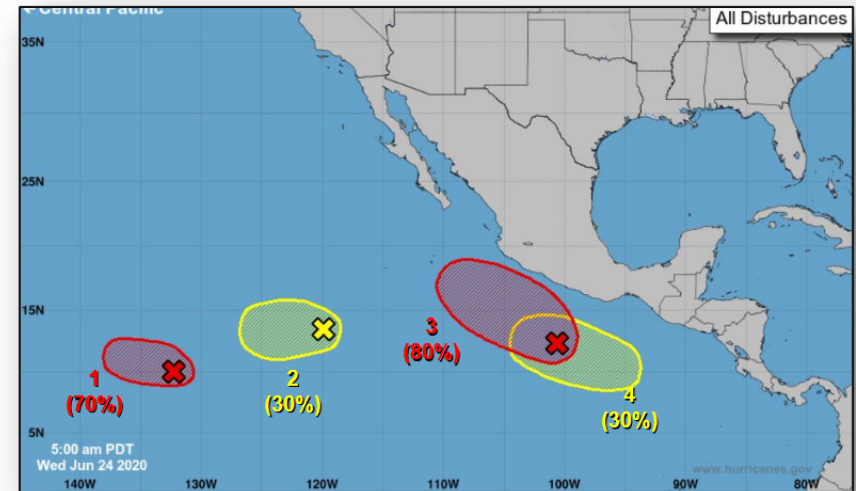

- Several hundred miles SW of the southern tip of Baja California peninsula
- Environmental conditions forecast to remain conducive for gradual development over the next few days
- Formation chance through 48 hours: **Low (30%)**
- Formation chance through 5 days: **Low (30%)**

Disturbance 3 (as of 8:00 a.m. ET)

- A few hundred miles SSW of the Gulf of Tehuantepec
- Conditions forecast to be conducive for development in a couple of days
- Likely to become a tropical depression in a few days while it moves WNW parallel to the coast of Mexico
- Formation chance through 48 hours: **Medium (60%)**
- Formation chance through 5 days: High (80%)

Disturbance 4 (as of 8:00 a.m. ET)

- Forecast to form south of the Gulf of Tehuantepec by late this week
- Conditions expected to be conducive for gradual development over the weekend as it moves WNW parallel to the coast of Mexico
- Formation chance through 48 hours: Low (near 0%)
- Formation chance through 5 days: Low (30%)

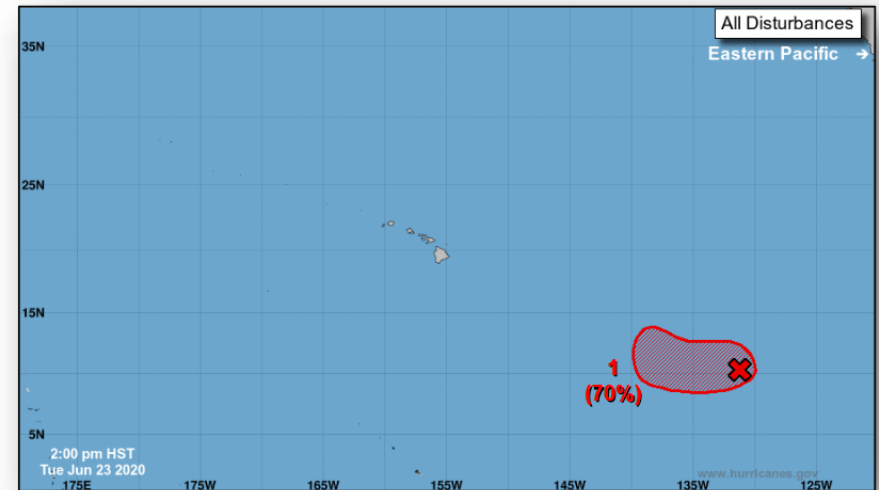

Tropical Outlook – Central Pacific

Disturbance 1 *(as of 5:00 a.m. ET)*

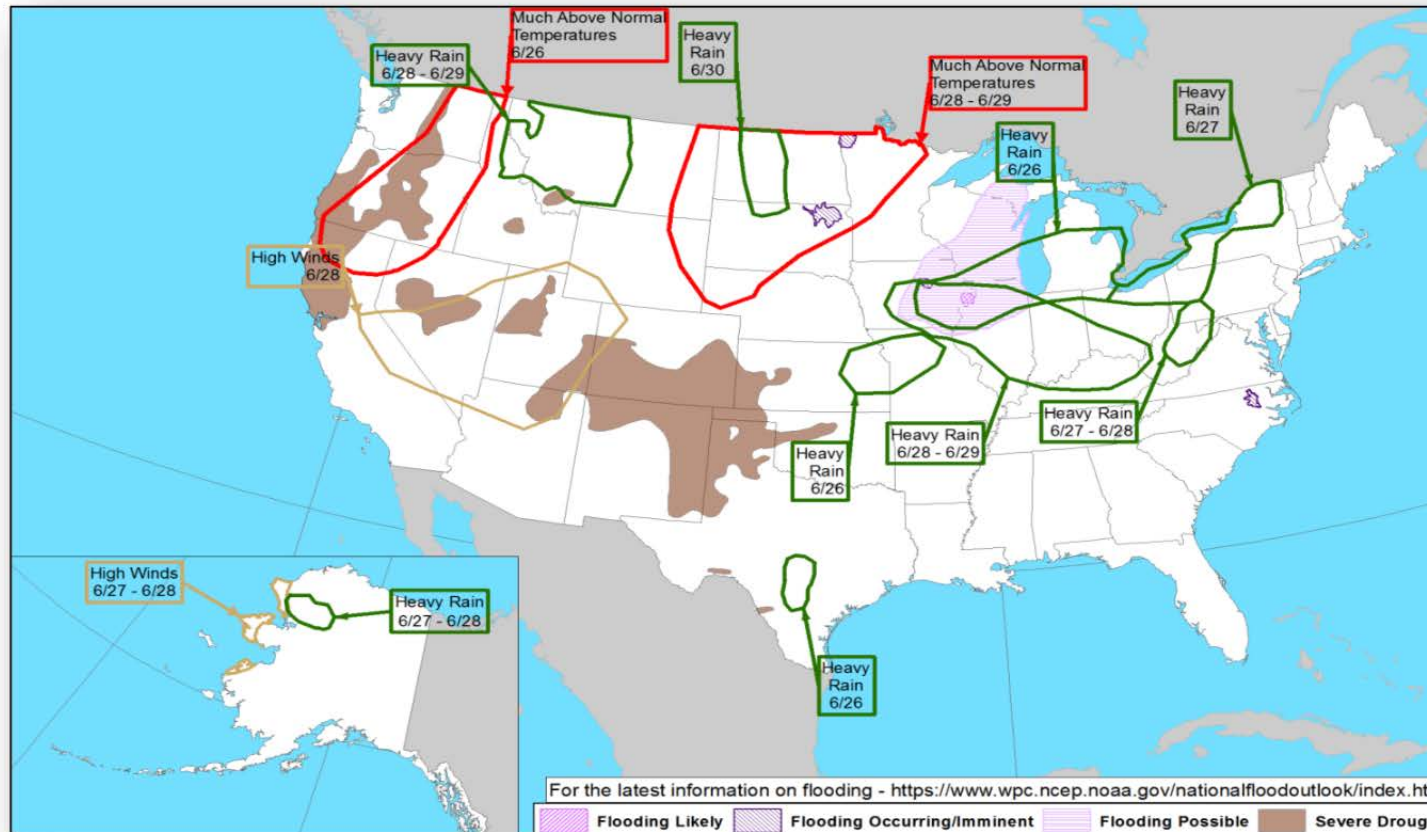

- Located more than 1,700 miles ESE of Hilo, HI
- Conditions appear conducive for gradual development
- Likely to become a tropical depression during the next few days while it moves slowly W
- Formation chance through 48 hours: Medium (70%)
- Formation chance through 5 days: High (70%)
