Sources: CDPH, WHO, CDC

The date for which case statistics and hospital data were reported. Hospital COVID data are self-reported through a portal managed by the California Hospital Association and pulled at 2pm. COVID case statistics are reported by local health departments to CalREDIE and are pulled at 2pm. Hospital data and case statistics are integrated by the California Department of Technology and made available through the Open Data Portal the following morning. CA Open Data Portal is at least 24 Hours behind although a backlog of new case reports at the State level has ostensibly been cleared, some County dashboards still contain notes that indicate data are missing. \*California-Demographics.com made by Cubit - a demographic data provider & census.gov

Presumptive active cases - A calculation (Total Cases - Recovered - Dead) (LA County does not report recovery rates and Imperial County case data reporting is delayed to the state data source)

## CDC Guidance Documents

<https://www.cdc.gov/coronavirus/2019-ncov/communication/guidance-list.html?Sort=Date%3A%3Adesc>

### [Guidance for Dental Settings](#)

Learn how to prepare for and respond to COVID-19 in dental facilities.

Date: 8/27/20

Audience: [Healthcare Facilities](#), [Healthcare Professionals](#)

### [Contact Tracing for COVID-19](#)

This section provides steps and consideration that jurisdictions can use to develop a protocol for the tracing of close contacts.

Date: 8/26/20

Audience: [Public Health Professionals](#)

### [Investigating a COVID-19 Case](#)

This section provides a step-by-step guide for conducting a COVID-19 case investigation, including operational questions that a jurisdiction should consider while planning their activities.

Date: 8/26/20

Audience: [Healthcare Facilities](#), [Public Health Professionals](#), [State and Local Government](#)

### [Interim Operational Considerations for Public Health Management of Healthcare Workers Exposed to or with Suspected or Confirmed COVID-19: non-U.S. Healthcare Settings](#)

These recommendations are intended to be used by healthcare facilities and public health authorities in non-US healthcare settings, particularly focusing on low- and middle-income countries, assisting with the management of HCWs exposed to a person with confirmed or suspected COVID-19.

Date: 8/26/20

Audience: [Healthcare Facilities](#), [Healthcare Professionals](#)

### [Operational Considerations for Adapting a Contact Tracing Program to Respond to the COVID-19 Pandemic](#)

Contact tracing is a key component of controlling transmission of infectious diseases. This document is for CDC country offices, ministries of health, sub-national public health authorities, and other implementing partners in non-US settings. While select adaptations may be relevant for any jurisdiction, the document focuses on adaptations that might be especially useful in low- and middle-income countries.

Date: 8/25/20

Audience: [Health Departments](#)

### [Markets: Operational considerations for COVID-19 mitigation measures in global low-resource setting](#)

Markets are a critical place of commerce and a source of many essential goods, but they can pose potential risks for COVID-19 transmission. This document provides suggestions for mitigating COVID-19 transmission in markets in low-resource settings and describes considerations associated with each mitigation measure.

Date: 8/25/20

Audience: [Businesses](#)

### [Overview of Testing for SARS-CoV-2 \(COVID-19\)](#)

Summary of considerations and current CDC recommendations regarding SARS-CoV-2 testing.

Date: 8/23/20

Audience: [Health Departments](#), [Healthcare Professionals](#), [State and Local Government](#)

# COVID-19 Update

FEMA

**Situation:** Upward trajectory in COVID-19 case count continues across 5 (+1) jurisdictions, with 4 (+2) jurisdictions in a plateau status, and 46 (-4) jurisdictions on a downward trajectory. 21,935 (-689) Federal employees deployed / activated; 1,922 (-75) FEMA employees deployed.

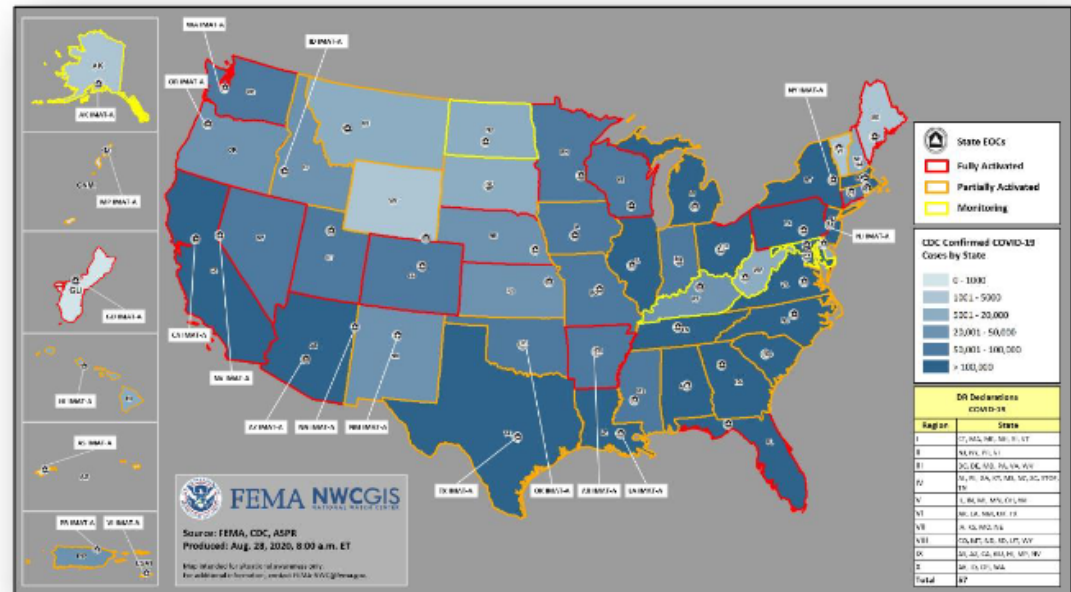

Nationwide Testing: 80,664,943 (+1,052,961) cumulative as of Aug 27

COVID-19 positive cases continue to increase globally (CDC COVID-19 update as of Aug 27)

- Confirmed Cases of COVID-19
  - United States: 5,799,046 (+46,393)
  - Worldwide: 24,021,218 (+267,670)
- Deaths caused by COVID-19
  - United States: 178,998 (+1,239)
  - Worldwide: 821,462 (+6,424)

**Response:**

- NRCC at Level I
- Region VI RRCC is at Level II
- Regions I, II, III, V, & X RRCCs at Level III
- Regions IV, VII, VIII, & IX RRCCs are rostered
- Regions VII, VIII & IX COVID-19 response being worked from the Virtual JFO
- NWC, all RWCs, and MOCs are monitoring

(COVID-19 SLB, as of Aug 27)

**Forecast Discussion**

Today will be the hottest of the next 7 days, with highs near 115 F in the Lower Deserts, at or slightly above 100 F in the Inland Empire, and generally in the 90's for other inland areas. Gradual cooling is expected through early next week, with dangerous heat and humid conditions finally subsiding. Temperatures will be near normal the rest of the week. A few mountain thunderstorms will be possible Monday and Tuesday.

Latest hazard threat table: <https://www.wrh.noaa.gov/sqx/event/dsstable.php>

<https://www.weather.gov/forecastpoints#>

# Tropical Outlook – Atlantic

## Tropical Depression Laura – FINAL (Advisory #34 as of 5:00 a.m. ET)

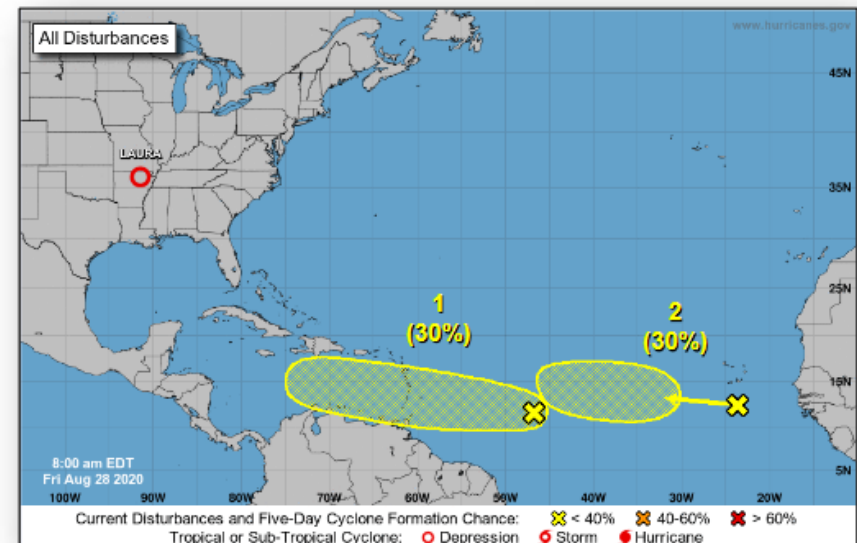

- 95 miles WNW of Memphis, TN
- Moving NE at 13 mph
- Maximum sustained winds 30 mph
- Strengthening expected late Saturday into Sunday as Laura moves into the northwest Atlantic
- Expected to produce additional rainfall totals of 1-3 inches with isolated totals of 5 inches through tonight; 1-2 inches with isolated maximum amounts of 3 inches on Saturday
- Threat of a few tornadoes expected to redevelop this afternoon into evening for parts of the mid-South and Tennessee Valley

## Disturbance 1 (as of 8:00 a.m. ET)

- 900 miles E of Windward Islands
- Moving W at 15 mph
- Some gradual development possible during next several days
- Formation chance through 48 hours: Low (20%)
- Formation chance through 5 days: Low (30%)

## Disturbance 2 (as of 8:00 a.m. ET)

- Located over the eastern Atlantic Ocean just west of Cabo Verde Islands
- Some development is possible early next week when it begins to move slowly W over the eastern and central tropical Atlantic
- Formation chance through 48 hours: Low (near 0%)
- Formation chance through 5 days: Low (30%)

# Tropical Outlook – Eastern Pacific

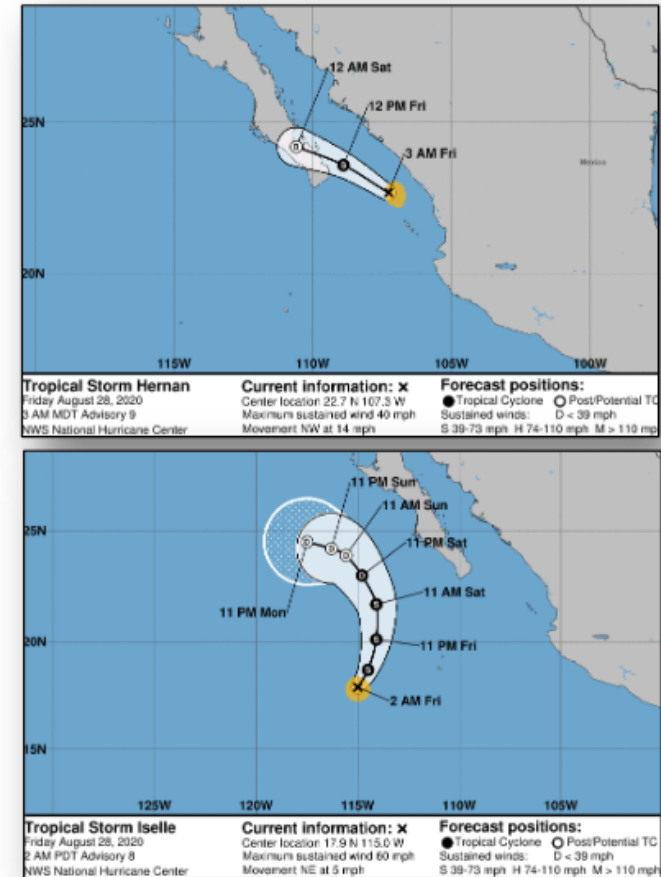

## Tropical Cyclone Hernan (Advisory #9 as of 5:00 a.m. ET)

- 165 miles E of the southern tip of Baja California, Mexico
- Maximum sustained winds 40 mph
- Moving NW at 14 mph
- Forecast to dissipate on Saturday if not sooner
- Tropical storm force winds extend 45 miles

## Tropical Cyclone Iselle (Advisory #8 as of 5:00 a.m. ET)

- 480 miles SW of the southern tip of Baja California, Mexico
- Maximum sustained winds 60 mph
- Moving NE at 5 mph
- Gradual weakening should begin tonight
- Tropical storm force winds extend 45 miles

# Tropical Outlook – Central Pacific

## Disturbance 1 (as of 2:00 a.m. ET)

- Located 1,000 miles SE of Hilo, HI
- Moving slowly W
- Conditions appear somewhat conducive for gradual development over the next several days
- Formation chance through 48 hours: Low (near 0%)
- Formation chance through 5 days: Low (20%)

# Flood Hazard Outlook (Prototype)

Includes General Flash and River Flood Hazards

NWC National Water Center

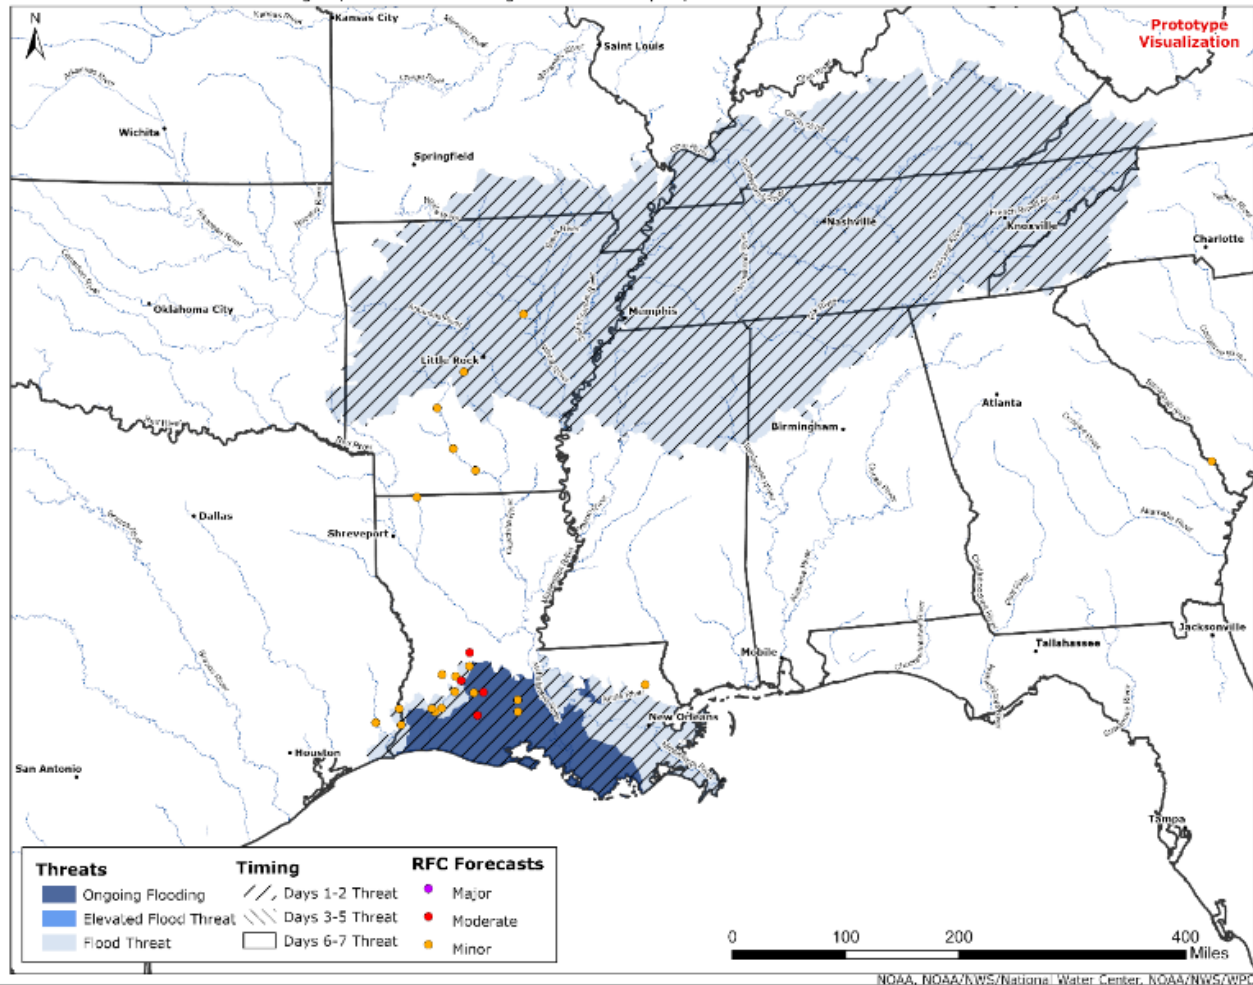

MA

Issued: 11:30 UTC Aug 28, 2020 - Valid through 11:30 UTC Sept 4, 2020

## Flood Hazard Messages (associated with Tropical Depression Laura)

- Saltwater flooding will continue on the coastal rivers of Louisiana where storm surge pushed over land and up the rivers. As freshwater flows into these regions, flooding will continue into next week.
- Today into Saturday, as Laura's remnants continue to move east-northeasterly, additional rainfall of 1 to 3 inches, with isolated 5 inches, is expected across portions of the mid-Mississippi, Tennessee and lower Ohio Valleys, and the Mid-Atlantic States. This rainfall will result in isolated flash and urban flooding, small streams and creeks to overflow their banks, and minor to moderate river flooding; however, widespread river flooding is not anticipated at this time.
- Rainfall bands will continue to feed up across portions of southern Louisiana, northwest Mississippi and Alabama today bringing localized rainfall amounts of 1 to 4 inches. This rainfall may lead to localized flash and urban flooding and rapid rises on small streams.
- In northern Arkansas and far southern Missouri, additional rainfall of up to 2 inches Saturday night, not associated with Laura, could result in isolated flash and urban flooding and further elevate river flooding.

*Disclaimer: This graphic is intended to provide a general flash and river flood hazard outlook. It is not intended to depict coastal flood risk due to storm surge. Please refer to the detailed products issued by local National Weather Service offices for official forecasts and warnings. [www.weather.gov](http://www.weather.gov)*
