Sources: CDPH, WHO, CDC

The date for which case statistics and hospital data were reported. Hospital COVID data are self-reported through a portal managed by the California Hospital Association and pulled at 2pm. COVID case statistics are reported by local health departments to CalREDIE and are pulled at 2pm. Hospital data and case statistics are integrated by the California Department of Technology and made available through the Open Data Portal the following morning. CA Open Data Portal is at least 24 Hours behind although a backlog of new case reports at the State level has ostensibly been cleared, some County dashboards still contain notes that indicate data are missing. *California-Demographics.com made by Cubit – a demographic data provider & census.gov

Presumptive active cases - A calculation (Total Cases - Recovered - Dead) (LA County does not report recovery rates and Imperial County case data reporting is delayed to the state data source)

Nursing Homes Given Federal Go-Ahead To Allow More Visitors

- The Centers for Medicare and Medicaid Services, which regulate nursing facilities, are lifting the ban on visitors, effective immediately. CMS imposed the restriction in March in an effort to control outbreaks of the coronavirus.
- Advocates for nursing home residents and family organizations have been clamoring for a repeal, noting the many residents who have suffered anxiety or depression, as well as physical or mental decline since the ban was imposed. The issue was also raised in the report of the Coronavirus Commission for Safety and Quality in Nursing Homes, which became public on Wednesday.
- Now, all nursing homes can allow outdoor visits with social distancing, as a few states have recently allowed. And most nursing homes can allow indoor visits as long as there have been no new COVID-19 infections in the past 2 weeks and the infection rate in the surrounding county is no more than 10%. But CMS recommends that nursing homes limit how many visitors a resident can have at one time, as well as limiting the number of visitors that can be in the facility at once.

C.D.C. Testing Guidance Was Published Against Scientists' Objections

- A heavily criticized recommendation from the Centers for Disease Control and Prevention last month about who should be tested for the coronavirus was not written by C.D.C. scientists and was posted to the agency's website despite their serious objections, according to several people familiar with the matter as well as internal documents obtained by The New York Times.
- The guidance said it was not necessary to test people without symptoms of Covid-19 even if they had been exposed to the virus. It came at a time when public health experts were pushing for more testing rather than less, and administration officials told The Times that the document was a C.D.C. product and had been revised with input from the agency's director, Dr. Robert Redfield.
- But officials told The Times this week that the Department of Health and Human Services did the rewriting and then "dropped" it into the C.D.C.'s public website, flouting the agency's strict scientific review process.

Why Can't America Make Enough N95 Masks? 6 Months Into Pandemic, Shortages Persist

- At the beginning of the coronavirus pandemic, there were lots of stories about scrappy manufacturers promising to revamp their factories to start making personal protective equipment in the U.S.
- Back in the spring, fuel-cell maker Adaptive Energy retooled part of its factory in Ann Arbor, Mich., to make plastic face shields. Now, 100,000 finished shields are piling up in cardboard boxes on the factory floor — unsold.
- Since the coronavirus pandemic began, President Trump and industry officials have talked a lot about the need to ramp up domestic manufacturing of critical protective gear. But six months on, there are still shortages of all kinds of PPE, like N95 respirator masks, while face shields are easy to find.
  https://www.npr.org/2020/09/17/913093387/why-cant-america-make-enough-n95-masks-6-months-into-pandemic-shortages-persist

Child Positive For Coronavirus Was Sent To School Anyway. Others Quarantining Now

- Nearly 30 Massachusetts high school students have been told to quarantine after parents sent their child to school despite knowing that the teen was positive for the coronavirus.
- The students, who attend Attleboro High School, will be required to quarantine for two weeks. Attleboro Mayor Paul Heroux told NPR that the student should have been self-isolating since Sept. 9 — the day the student was tested for the coronavirus. However, the parents of the student continued to send the teen to school even after receiving the positive results on Friday.
- Authorities have not released the identity of the student or family.
- Attleboro has six active cases of COVID-19 within the school district, which serves about 6,000 students, Heroux said. However, this is the only case he's aware of where a student was sent to school knowingly when the student was positive for the coronavirus.
  https://www.npr.org/sections/coronavirus-live-updates/2020/09/17/914031464/child-who-was-positive-for-covid-19-was-sent-to-school-anyway-others-isolated-no

Students Accused Of Breaking College COVID-19 Rules Fight Their Punishments

- As colleges around the U.S. are facing COVID-19 outbreaks and crackdowns on students engaged in coronavirus-risky behavior, campuses are also facing a new threat: legal challenges from the students they're punishing.
- Some are brazenly breaking rules, like the hundreds of Syracuse University students who risked everyone's safety — and everyone's semester — by partying like it's not 2020 in late August. Twenty-three students at that party got interim suspensions and were kicked off campus for what Syracuse officials described as "incredibly reckless behavior."
- The same thing is happening to students at smaller, more "chill" gatherings. At Northeastern University, 11 students were caught hanging out together in one room, in violation of bans on having guests in campus housing and on participating in crowded gatherings.
- But for all the scorn directed at students who flout the rules, the colleges meting out the discipline are taking heat as well. Rhyia Bibby, a junior at Northeastern, is one of many on campus who think the university went too far by also refusing to refund the students' tuition, which amounts to $36,500 per person.

Morbidity and Mortality Weekly Report (MMWR) SARS-CoV-2–Associated Deaths Among Persons Aged <21 Years — United States, February 12–July 31, 2020

- Symptoms associated with SARS-CoV-2 infection are milder in children compared with adults.
- Among 121 SARS-CoV-2–associated deaths among persons aged <21 years reported to CDC by July 31, 2020, 12 (10%) were infants and 85 (70%) were aged 10–20 years. Hispanic, non-Hispanic Black and non-Hispanic American Indian/Alaskan Native persons accounted for 94 (78%) of these deaths; 33% of deaths occurred outside of a hospital.
- Persons aged <21 years exposed to SARS-CoV-2 should be monitored for complications. Ongoing surveillance for SARS-CoV-2–associated infection, hospitalization, and death among persons aged <21 years should be continued as schools reopen in the United States.

Overview of Testing for SARS-CoV-2 (COVID-19)
Summary of considerations and current CDC recommendations regarding SARS-CoV-2 testing.
Date: 9/17/20
Audience: Health Departments, Healthcare Professionals, State and Local Government

COVID-19 Parental Resources Kit – Young Adulthood
Young adults' social, emotional, or mental well-being may be impacted by the pandemic. Learn what you can do to help ensure their well-being.
Date: 9/16/20
Audience: Colleges and Universities, General Public

COVID-19 Parental Resources Kit – Childhood
Children's social, emotional, or mental well-being maybe impacted by the pandemic. Learn what you can do to help ensure their well-being.
Date: 9/15/20
Audience: General Public

Operational Considerations for Personal Protective Equipment in the Context of Global Supply Shortages for Coronavirus Disease 2019 (COVID-19) Pandemic: non-US Healthcare Settings
Considerations for personal protective equipment (PPE) in the context of global supply shortages in non-US healthcare settings.
Date: 9/14/20
Audience: Healthcare Facilities, Healthcare Professionals

Guidance for General Population Disaster Shelters During a Pandemic
Date: 9/14/20
Audience: Colleges and Universities, First Responders, Healthcare Facilities, Healthcare Professionals, High-Risk Populations, Public Health Professionals, Schools, State and Local Government

Interim Operational Considerations for Public Health Management of Healthcare Workers Exposed to or with Suspected or Confirmed COVID-19: non-U.S. Healthcare Settings
These recommendations are intended to be used by healthcare facilities and public health authorities in non-US healthcare settings, particularly focusing on low- and middle-income countries, assisting with the management of HCWs exposed to a person with confirmed or suspected COVID-19.
Date: 9/11/20
Audience: Healthcare Facilities, Healthcare Professionals

[Know When to Delay your Travel to Avoid Spreading COVID-19]
Advice on when and how long people should delay their domestic or international travel to avoid spreading COVID-19.
Date: 9/10/20
Audience: Travel

[Additional COVID-19 Guidance for Caregivers of People Living with Dementia in Community Settings]
People caring for loved ones with dementia can take steps to prevent illness and stay healthy during the COVID-19 pandemic.
Date: 9/10/20
Audience: High-Risk Populations

[Implementing Safety Practices for Critical Infrastructure Workers Who May Have Had Exposure to a Person with Suspected or Confirmed COVID-19]
Find CDC's guidance for critical workers on how to protect workers who may have been exposed to COVID-19.
Date: 9/10/20
Audience: Businesses

[Standard Operating Procedure (SOP) for Triage of Suspected COVID-19 Patients in non-US Healthcare Settings: Early Identification and Prevention of Transmission during Triage]
This document is provided by CDC and is intended for use in non-US healthcare settings. This document is intended for healthcare facilities that are receiving or are preparing to receive patients with suspected or confirmed coronavirus disease 2019 (COVID-19).
Date: 9/10/20
Audience: Healthcare Professionals

[Operational Considerations for Community Isolation Centers for COVID-19 in Low-Resource Settings]
This document describes how to set up a Community Isolation Center for COVID-19 patients who are not able to isolate at home, but may not be ill enough to be hospitalized. This document is to be used in global settings, not in the US.
Date: 9/9/20
Audience: Community Settings

[Contact Tracing for COVID-19]
This section provides steps and consideration that jurisdictions can use to develop a protocol for the tracing of close contacts.
Date: 9/9/20
Audience: Public Health Professionals

Wildfires – Western US

OR

Situation: 94 large fires are currently burning uncontained from the West Coast across to the Rocky Mountains, covering a good portion of FEMA Regions VIII, IX, and X. 20 Fire Management Assistance Grants (FMAGs) have been approved. Mandatory evacuations remain in effect throughout the impacted areas but have decreased by approximately 14K over the last 24 hours. The U.S. Air Quality Index ranges from "Moderate to Hazardous" from Central California to northern Washington state, but have improved in some areas. No unmet needs at this time..

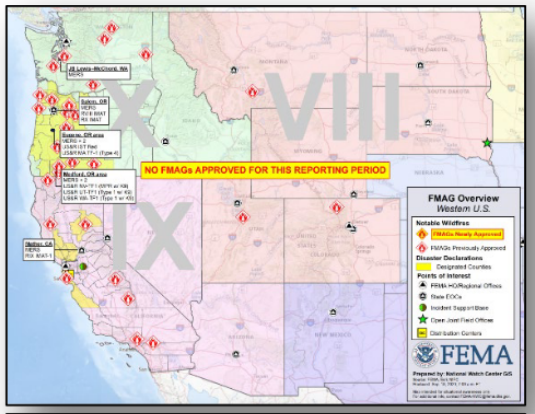
FEMA Region VIII: 1 FMAG (CO)
- Acreage burned (FMAGs only): 102,596
- Homes / structures threatened: 3,581 / 4
- Homes / structures damaged: 0 / 0
- Homes / structures destroyed: 26 (-1) / 29
- Fatalities / Injuries: 0 / 10
- Evacuations: 1,870 (+770)

FEMA Region IX: 6 FMAGs (CA)
- Acreage burned (FMAGs only): 871,835 (+49,983)
- Homes / structures threatened: 51,029 (-856) / 1,321
- Homes / structures damaged: 43 (+3) / 30 (+2)
- Homes / structures destroyed: 823 (+50) / 275 (+26)
- Fatalities / Injuries: 17 / 58
- Evacuations: 28,093 (-8,614)

FEMA Region X: 12 FMAGs (OR- 9 (-2); WA-1)
- Acreage burned (FMAGs only): 1,331,154 (+8,238)
- Homes / structures threatened: 52,311 (- 43,610) / 1,743
- Home / structures damaged: 344 (+37) / 163 (+8)
- Homes / structures destroyed: 1,680 (+193) / 1,407 (+29)
- Fatalities / Injuries: 5 / 16 (+2)
- Evacuations: 86,853 (-5,915)

State Response
- CO EOC at Partial Activation (COVID-19)
- CA EOC at Full Activation (COVID-19 and Wildfires)
- OR & WA EOCs at Full Activation (COVID-19 & Wildfires)

Note: Two Oregon fires (Pike Road & Clackamas County Complex) have been removed from the summary. No official reporting has been available for either fire since Sep 11. Open source media indicates no further evacuations or threat.



Federal Response
- Declarations approved – 2 DRs, 1 EM
- Declarations requested – 1 DR
- Region VIII & Denver MOC monitoring
  - IMAT deployed to OR EOC
- Region IX RWC monitoring
  - IMAT deployed to CA EOC (Wildfires)
- Region X RRCC at Level II (Wildfires & COVID-19); Bothell MOC monitoring
  - IMAT deployed to OR EOC
  - ESF-13 activated; 1 IMT (Eugene) and 2 QRTs deployed to OR (Medford & Eugene) to support US&R teams
- Public Health Emergency declared in OR due to unhealthy/hazardous air quality *(HHS R10 SPOTREP as of 2:44 p.m. ET, Sep 16)*
- EPA conducting Rapid Needs Assessments for 2 counties in CA
- MERS: Salem, OR; Springfield, OR; Central Point, OR; Joint Base Lewis-McChord, WA; Mather, CA
- US&R:
  - Red IST & LNO deployed to OR EOC; IST Cache in Salem, OR
  - WA-TF1 deployed to Lane County, OR; UT-TF1 and NV-TF1 deployed to Talent, OR
  - MA-TF1 deployed to Eugene, OR
