The date for which case statistics and hospital data were reported. Hospital COVID data are self-reported through a portal managed by the California Hospital Association and pulled at 2pm. COVID case statistics are reported by local health departments to CalREDIE and are pulled at 2pm. Hospital data and case statistics are integrated by the California Department of Technology and made available through the Open Data Portal the following morning. CA Open Data Portal is at least 24 Hours behind although a backlog of new case reports at the State level has ostensibly been cleared, some County dashboards still contain notes that indicate data are missing. *California-Demographics.com made by Cubit - a demographic data provider & census.gov

Presumptive active cases - A calculation (Total Cases - Recovered - Dead) (LA County does not report recovery rates and Imperial County case data reporting is delayed to the state data source)

NIH: Fourth large-scale COVID-19 vaccine trial begins in the United States

- A fourth Phase 3 clinical trial evaluating an investigational vaccine for coronavirus disease 2019 (COVID-19) has begun enrolling adult volunteers. The trial is designed to evaluate if the investigational Janssen COVID-19 vaccine (JNJ-78436725) can prevent symptomatic COVID-19 after a single dose regimen. Up to 60,000 volunteers will be enrolled in the trial at up to nearly 215 clinical research sites in the United States and internationally.
- The Janssen Pharmaceutical Companies of Johnson & Johnson developed the investigational vaccine (also known as Ad.26.COV2.S) and is leading the clinical trial as regulatory sponsor. Janssen, the National Institute of Allergy and Infectious Diseases (NIAID), part of the National Institutes of Health, and the Biomedical Advanced Research and Development Authority (BARDA), part of the U.S. Department of Health and Human Services' Office of the Assistant Secretary for Preparedness and Response, are funding the trial.
- The Phase 3 trial is being conducted in collaboration with [Operation Warp Speed](#) (OWS), a multi-agency collaboration overseen by HHS and the Department of Defense that aims to accelerate the development, manufacturing and distribution of medical countermeasures for COVID-19. OWS and CoVPN also are assisting with additional COVID-19 preventive candidate vaccines, including [mRNA-1273](#), an investigational vaccine co-developed by NIAID and the Cambridge, Massachusetts-based biotechnology company Moderna, Inc., and [AZD1222](#), a vaccine candidate being developed by United Kingdom-based biopharmaceutical company AstraZeneca.

USC researchers think THC may be able to treat COVID-19 patients USC researchers think THC may be able to treat COVID-19 patients

- Researchers at the University of South Carolina think they have found a way to treat COVID-19, and it involves THC -- the ingredient that gets people high when smoking marijuana.
- They said one of the issues with the virus is that it can turn your immune system into a double-edge sword -- you want it to respond strongly if you get sick, but in some cases, the immune system goes completely haywire and that can be deadly.
- "It is called a cytokine storm," said Dr. Prakash Nagarkatti, USC's vice president of research. "That can damage your lungs, as well as all your other organs, and the person will die."
- Nagarkatti is offering THC to doctors in South Carolina as a part of a clinical trial to see if it can help their patients.
- But he wanted to make it clear that this is not an endorsement for smoking marijuana. While THC appears to calm the immune system -- short-circuiting a potentially deadly overreaction -- the immune-suppressing qualities of marijuana could make someone more vulnerable to catching COVID-19 in the first place.

New Dashboard Tracks Coronavirus Cases In Schools Across 47 States

- A new national effort asks K-12 schools to voluntarily — and anonymously — report their confirmed and suspected coronavirus cases, along with the safety strategies they're using.
- Opening schools safely in person is seen as key to restarting the economy and recovering the learning loss that has fallen most heavily on marginalized groups of students. There are also many fears associated with reopening — of severe illness among vulnerable staff and family members, and of stoking broader outbreaks, as seems to have happened where colleges have reopened in person.
- The COVID-19 School Response Dashboard, which NPR is reporting on exclusively, was created with the help of several national education organizations. Right now it shows an average of 230 cases per 100,000 students, and 490 per 100,000 staff members, in the first two weeks of September. The responses come from public, private and charter schools in 47 states, serving roughly 200,000 students both in person and online, as of Tuesday, Sept. 22.

State OKs More Reopening Of Riverside County Amid Coronavirus

- California Health and Human Services Secretary Dr. Mark Ghaly delivered a formal announcement Tuesday and said Riverside, as well as Alameda, San Luis Obispo, San Mateo and Solano counties all progressed from the purple to red tier
- This allows several additional industry sectors are allowed to reopen locally under the state's "Blueprint for a Safer Economy."
- Riverside County, updated state data revealed Tuesday. Schools, along with sectors like indoor dining, gyms and places of worship can reopen — with some restrictions

Defiance Of CA's COVID-19 Framework Delayed In Riverside County

- On the same day that state health officials gave Riverside County the OK to reopen more sectors of its economy, the Board of Supervisors voted 3-2 Tuesday in favor of modifying a proposed plan to allow all businesses, houses of worship and other entities countywide to fully reopen over the next six weeks, holding off on immediate action to determine how the state will respond.
- "This is a way of saying we're for the people of Riverside County," said Supervisor Jeff Hewitt, who introduced the "COVID-19 Reopening Plan. "We're going to be operating in an economy that's going to be crushed. We need to move forward on this and stop putting it off."
- The proposal drew more than 70 speakers to the County Administrative Center in downtown Riverside, as well as via telephonic participation, who were overwhelmingly in support of the plan, which will be reconsidered on Oct. 6 after some fine-tuning.
- "If we choose a path that is not in line with the state, the state will take a hard line with us," Supervisor Kevin Jeffries said.
- Jeffries and Supervisor Karen Spiegel both said they were behind Hewitt's concept, but before a final vote, they requested input from the Riverside County Business Task Force and an in-depth assessment by the Executive Office of what funds Gov. Gavin Newsom's administration might withhold or demand be returned to the state if the county divorces itself from the color-coded tier system currently used to gauge the pace of relaxing public health lockdowns.
