Sources: CDPH, WHO, CDC

The date for which case statistics and hospital data were reported. Hospital COVID data are self-reported through a portal managed by the California Hospital Association and pulled at 2pm. COVID case statistics are reported by local health departments to CalREDIE and are pulled at 2pm. Hospital data and case statistics are integrated by the California Department of Technology and made available through the Open Data Portal the following morning. CA Open Data Portal is at least 24 Hours behind although a backlog of new case reports at the State level has ostensibly been cleared, some County dashboards still contain notes that indicate data are missing. *California-Demographics.com made by Cubit – a demographic data provider & census.gov

Presumptive active cases - A calculation (Total Cases - Recovered - Dead) (* LA County does not report recovery rates)

Imagine Waiting 6 Hours To Buy A Couple Of Bags Of Bread

- A combination of international sanctions, the coronavirus pandemic and the freezing of Syrian assets in banks in Lebanon, which is suffering from its own economic crisis, has left the regime struggling to find the currency reserves it needs to pay for these imports.
  https://www.npr.org/sections/goatsandsoda/2020/12/03/941382003/imagine-waiting-6-hours-to-buy-a-couple-of-bags-of-bread

Coronavirus or malaria, tuberculosis and HIV? – 25 min Video

- World Health Organization warns that the fight against COVID-19 is hampering efforts to combat other major diseases.

Obama, Bush, Clinton Say They're Willing To Get Coronavirus Vaccine On Camera

- Former Presidents Barack Obama, George W. Bush and Bill Clinton are willing to lend their star power for a good cause, saying this week that they would publicly take a coronavirus vaccine, once it's available in the U.S., to encourage skeptical Americans to do the same.
- Obama said that if Dr. Anthony Fauci, thought the vaccine was safe and effective, then he would get his shot.

## 'Where people come to wait to die': COVID-19 in US nursing homes

- As COVID numbers soar to record levels past 150,000 daily cases in the United States, nursing homes will likely once again become hotspots where a deadly brew of the winter flu and the coronavirus race through a captive crowd. Most administrators will seek to stop the spread by locking down facilities – isolating an already vulnerable population. They adopt these desperate measures because their patients account for approximately a quarter of all COVID-19 deaths nationwide, some 69,000 people.
- They have become "this country's killing fields," said Dr Michael Wasserman, until recently the head of the California Association of Long Term Care Medicine.
- In an industry already infamous for poor care. The federal government lists Kingston Healthcare Center, the nursing home in question as a "special focus" facility. One that officials monitor due to serious concerns about the quality of care.
- Most nursing homes receive stars in a government-administered rating system, but Kingston does not because of its status as a troubled operation. So far this year, patients and their families have filed 192 formal complaints against it, compared with the state average of 21.

COVID-19 Projections

https://covid19.healthdata.org/united-states-of-america?view=total-deaths&tab=trend
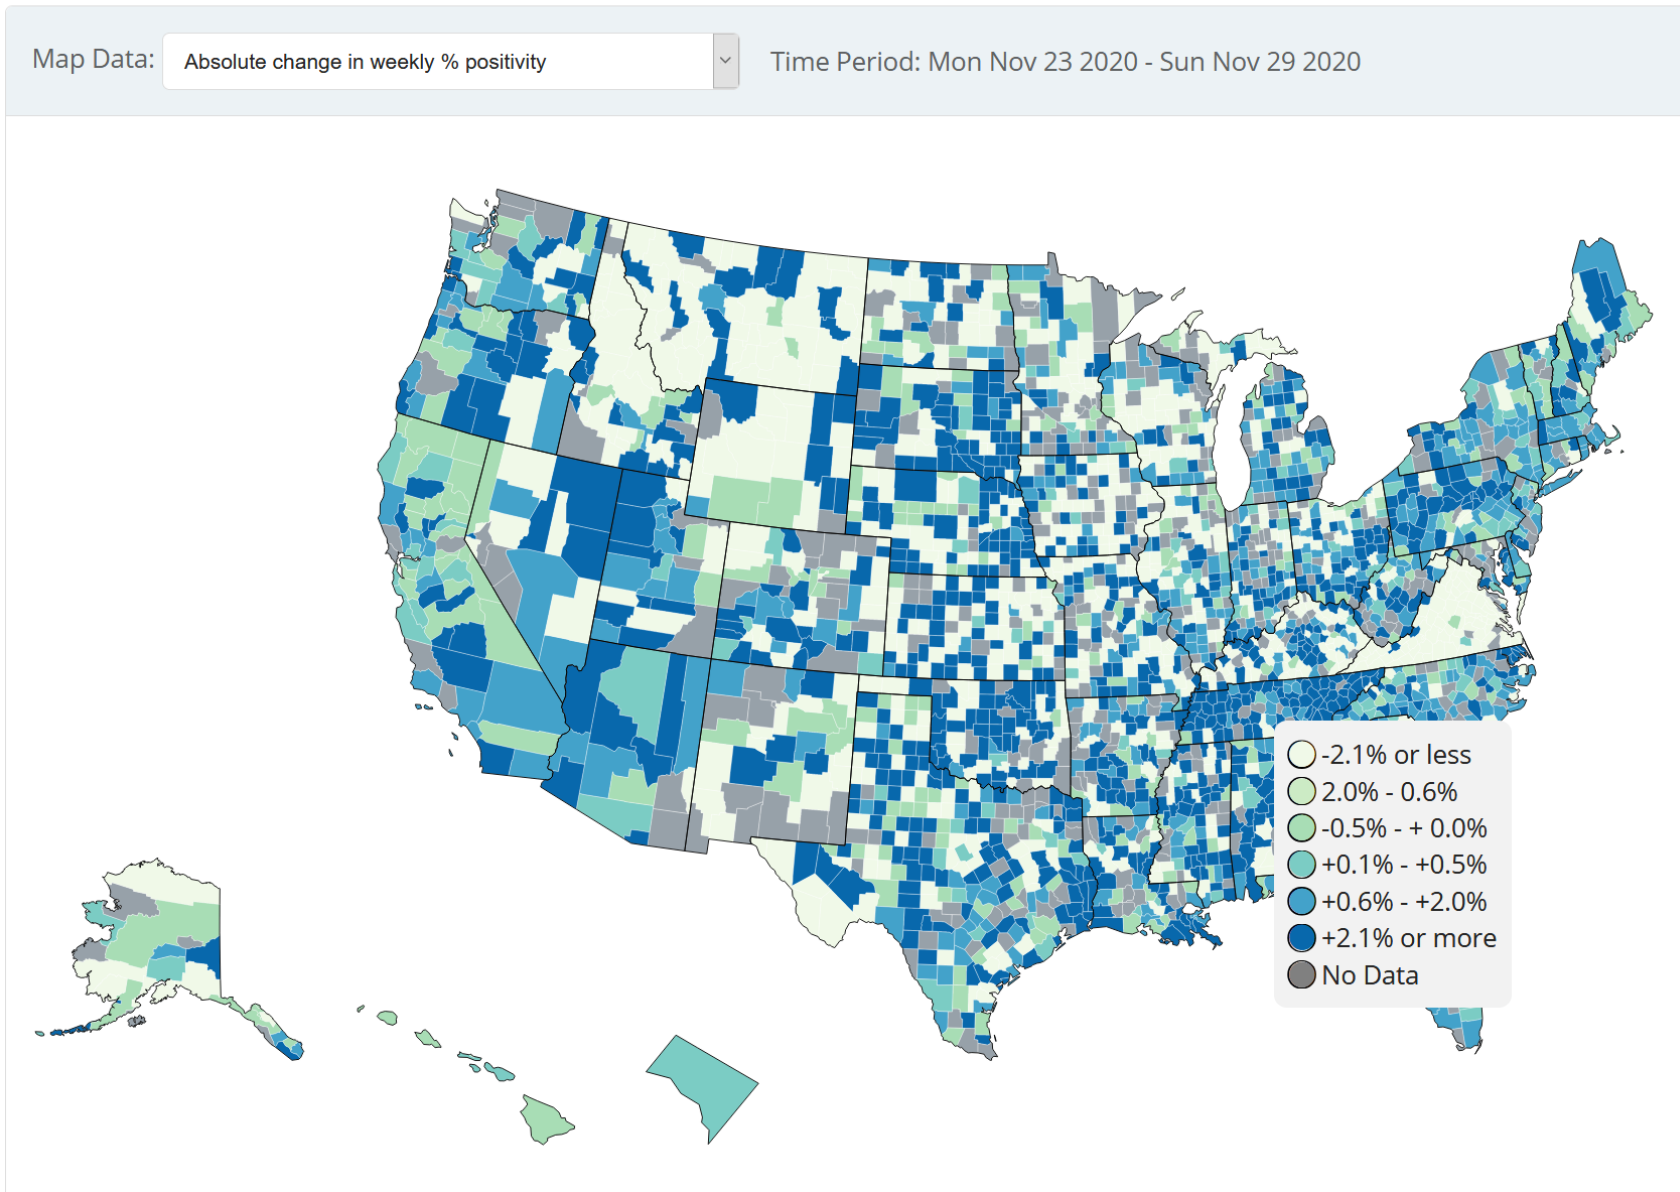

Daily deaths

Trend | Compare | Map

Daily deaths is the best indicator of the progression of the pandemic, although there is generally a 17-21 day lag between infection and deaths.

Scenario ⓘ | Projection × | Easing × | Masks × | ∨

Current projection: Mandates are re-imposed for 6 weeks whenever daily deaths reach 8 per million (0.8 per 100k).

Mandates easing: Continued easing of social distancing mandates, and mandates are not re-imposed.

Universal masks: 95% mask usage in public in every location, reaching levels seen in Singapore. Mandates are re-imposed for 6 weeks if daily deaths reach 8 per million (0.8 per 100k).

— Observed (smoothed) - - Current projection - - Mandates easing - - Universal masks

All deaths specific to COVID-19 patients.

Daily infections and testing

Trend | Compare | Map

Estimated infections are the number of people we estimate are infected with COVID-19 each day, including those not tested.

Estimated infections | Confirmed infections | Tests

Scenario ⓘ | Projection × | Easing × | Masks × | ∨

- - Current projection - - Mandates easing - - Universal masks

Prepared by Justin Czerniak

justin.czerniak@norcocollege.edu
Hospital resource use

Hospital resource use indicates how equipped a location is to treat COVID-19 patients. Select **All beds**, **ICU beds**, or **Invasive ventilators** for descriptions of each measure.

All resources | All beds | ICU beds | Invasive ventilators

All resources specific to COVID-19 patients.
Shaded area indicates 95% uncertainty interval. ⓘ

Legend: All beds needed — ICU beds needed — Invasive ventilators needed
Social distancing

Trend   Compare   Map

Reducing human contact (as measured by cell phone **mobility** data) can drive down infections so that mask use, testing, isolation, and contact tracing can work to contain the virus.

Scenario ⓘ [Projection ×] [Easing ×] [Masks ×]

Legend: Observed — Current projection — Mandates easing — Universal masks

CDC Guidance Documents

https://www.cdc.gov/coronavirus/2019-ncov/communication/guidance-list.html?Sort=Date%3A%3Adesc

Contact Tracing for COVID-19
This section provides steps and consideration that jurisdictions can use to develop a protocol for the tracing of close contacts. Date: 12/2/20
Audience: Health Departments

Care for Breastfeeding Women
Find information on managing breastfeeding patients with confirmed or suspected COVID-19. Date: 12/2/20
Audience: Doctors, Nurses

Interim Guidance on Management of Coronavirus Disease 2019 (COVID-19) in Correctional and Detention Facilities
Guidance specific for correctional facilities and detention centers during the outbreak of COVID-19, to ensure continuation of essential public services and protection of the health and safety of incarcerated and detained persons, staff, and visitors. Date: 12/2/20
Audience: Federal, State & Local Government

Discontinuation of Isolation for Persons with COVID-19 Not in Healthcare Settings
Do you know when your nonhospitalized COVID-19 patients are safe to end home isolation? Find out here. Date: 12/2/20
Audience: Healthcare Professionals

Public Health Guidance for Potential COVID-19 Exposure Associated with International or Domestic Travel
CDC's recommendations for travel-associated exposures. Date: 12/1/20
Audience: Federal, State & Local Government, Healthcare Professionals

CDC Guidance for Expanded Screening Testing to Reduce Silent Spread of SARS-CoV-2
The updated guidance is meant to assist health departments in decision making and considerations for groups to be considered for expanded screening testing with the aim of slowing asymptomatic and presymptomatic community transmission. Date: 11/30/20
Audience: Health Departments

Know When to Delay your Travel to Avoid Spreading COVID-19
Advice on when and how long people should delay their domestic or international travel to avoid spreading COVID-19. Date: 11/30/20
Audience: Individuals & Consumers

Care for Breastfeeding Women
Find information on managing breastfeeding patients with confirmed or suspected COVID-19. Date: 11/30/20
Audience: Doctors, Nurses
