The date for which case statistics and hospital data were reported. Hospital COVID data are self-reported through a portal managed by the California Hospital Association and pulled at 2pm. COVID case statistics are reported by local health departments to CalREDIE and are pulled at 2pm. Hospital data and case statistics are integrated by the California Department of Technology and made available through the Open Data Portal the following morning. CA Open Data Portal is at least 24 Hours behind although a backlog of new case reports at the State level has ostensibly been cleared, some County dashboards still contain notes that indicate data are missing. *California-Demographics.com made by Cubit - a demographic data provider & census.gov

Presumptive active cases - A calculation (Total Cases - Recovered - Dead) (* LA County does not report recovery rates)

Pfizer Slashed Its Original Covid-19 Vaccine Rollout Target After Supply-Chain Obstacles

- When Pfizer Inc. said last month it expects to ship half the Covid-19 vaccines it had originally planned for this year, the decision highlighted the challenges drug makers face in rapidly building supply chains to meet the high demand.
- “Scaling up the raw material supply chain took longer than expected,” a company spokeswoman said. “And it’s important to highlight that the outcome of the clinical trial was somewhat later than the initial projection.”

Would you be willing to get a Covid vaccine in exchange for a \$1,500 stimulus check? How one bold proposal would work

- Now, one proposal from former congressman John Delaney aims to help both sides by providing stimulus checks in exchange for getting vaccinated.
- The goal: to reach a 75% vaccination rate faster, which could save both lives and the U.S. economy

<https://www.cnn.com/2020/12/03/1500-stimulus-checks-for-covid-19-shots-how-one-plan-would-work.html>

Inland Empire angry, resigned to Newsom’s new coronavirus lockdown

- the 21-day shutdown will close Southern California hair salons and return restaurants to take-out service only
- California counties running out of intensive care unit beds will be going back into a [coronavirus pandemic shut down](#), Gov. Gavin Newsom announced Thursday, Dec. 3.
- “If we don’t act now, our hospital system will be overwhelmed,” Newsom said during a midday news conference. “We are pulling that emergency brake.”
- Many Inland Empire officials and business owners are not happy about it.
- “They just left us high and dry with no compensation about how we’re going to survive,” said Tammy Rapp, who owns the horror-themed Little Shop of Hairdos salon in downtown Upland. “This is the third time this year ... All the while, casinos and his place is still open, hypocritical.”

[Operational Considerations for Adapting a Contact Tracing Program to Respond to the COVID-19 Pandemic](#)

Contact tracing is a key component of controlling transmission of infectious diseases. This document is for CDC country offices, ministries of health, sub-national public health authorities, and other implementing partners in non-US settings. While select adaptations may be relevant for any jurisdiction, the document focuses on adaptations that might be especially useful in low- and middle-income countries.

[COVID -19 Considerations for Traveling Amusement Parks and Carnivals](#)

As traveling amusement park and carnival operations resume in some areas of the United States, CDC offers the following considerations.

Date: 12/2/20

Audience: [Employers, Business Owners & Community Leaders](#)

[Testing Strategy for Coronavirus \(COVID-19\) in High-Density Critical Infrastructure Workplaces after a COVID-19 Case Is Identified](#)

Workers in critical infrastructure sectors may be permitted to work if asymptomatic after potential exposure to a confirmed case of coronavirus disease 2019 (COVID-19), provided that worker infection prevention recommendations and controls are implemented. Outbreaks of illness among workers in food-producing facilities and surrounding communities have raised unique questions that identified the need for testing for COVID-19 to supplement existing guidance. This document presents different testing strategy options for exposed co-workers when public health organizations and employers determine testing is needed to help support existing disease control measures. Such strategies can aid in identifying infectious individuals with the goal of reducing transmission of SARS-CoV-2 in the workplace. These strategies augment and do not replace existing guidance. Date: 12/2/20

Audience: [Employers, Business Owners & Community Leaders](#)

[Considerations for Institutions of Higher Education](#)

Explore CDC's considerations for institutes of higher education regarding COVID-19.

Date: 12/2/20

The Regional Stay Home Order

The Regional Stay Home Order announced December 3, 2020, will go into effect within 24 hours in regions with less than 15% ICU availability. It prohibits private gatherings of any size, closes sector operations except for critical infrastructure and retail, and requires 100% masking and physical distancing in all others.

<https://www.gov.ca.gov/wp-content/uploads/2020/12/12.3.20-Stay-at-Home-Order-ICU-Scenario.pdf>

The Limited Stay Home Order, which applies to counties in the Widespread (purple) tier, is in effect from November 21 to December 21, 2020. It may be modified or extended. Read more about [California's Limited Stay At Home Order](#) on the California Department of Public Health's website.

The Regional Stay Home Order would be in effect for 3 weeks after the trigger and instructs Californians to stay at home as much as possible to limit the mixing with other households that can lead to COVID-19 spread. It allows access to (and travel for) critical services and allows outdoor activities to preserve Californians' physical and mental health. This limited closure will help stop the surge and prevent overwhelming regional ICU capacity.

In any region that triggers a Regional Stay Home Order because it drops below 15% ICU capacity, the following sectors must close:

Indoor and outdoor playgrounds
Indoor recreational facilities
Hair salons and barbershops
Personal care services
Museums, zoos, and aquariums
Movie theaters
Wineries

Bars, breweries, and distilleries
Family entertainment centers
Cardrooms and satellite wagering
Limited services
Live audience sports
Amusement parks

The following sectors will have additional modifications in addition to 100% masking and physical distancing:

Outdoor recreational facilities: Allow outdoor operation only without any food, drink or alcohol sales. Additionally, overnight stays at campgrounds will not be permitted.

Retail: Allow indoor operation at 20% capacity with entrance metering and no eating or drinking in the stores. Additionally, special hours should be instituted for seniors and others with chronic conditions or compromised immune systems.

Shopping centers: Allow indoor operation at 20% capacity with entrance metering and no eating or drinking in the stores. Additionally, special hours should be instituted for seniors and others with chronic conditions or compromised immune systems.

Hotels and lodging: Allow to open for critical infrastructure support only.

Restaurants: Allow only for take-out, pick-up, or delivery.

Offices: Allow remote only except for critical infrastructure sectors where remote working is not possible.

Places of worship and political expression: Allow outdoor services only.

Entertainment production including professional sports: Allow operation without live audiences. Additionally, testing protocol and "bubbles" are highly encouraged.

The following sectors are allowed to remain open when a remote option is not possible with appropriate infectious disease preventative measures including 100% masking and physical distancing:

Critical infrastructure
Schools
Non-urgent medical and dental care
Child care and pre-K

There has been an unprecedented increase in COVID-19 cases in California. Reducing movement and mixing between people is critical to lowering transmission, hospitalizations, and deaths.

As of November 21, 2020, the California Department of Public Health (CDPH) instituted a Limited Stay Home Order, requiring that all individuals in counties in the Widespread (purple) tier be at home by 10:00 PM, and stay there until 5:00 AM the next day. Exceptions include, for example:

- Individuals going home or to their workplace
- Individuals getting medical assistance
- Those who work in critical infrastructure during these hours
- Unsheltered persons

Interactions during these hours are usually social in nature, and reducing those interactions helps reduce the spread of COVID-19. This advisory is in effect until December 21, 2020, though that may be modified or extended. Read more about California's Limited Stay At Home Order on the California Department of Public Health's website.
<https://covid19.ca.gov/stay-home-except-for-essential-needs/>

About COVID-19 restrictions

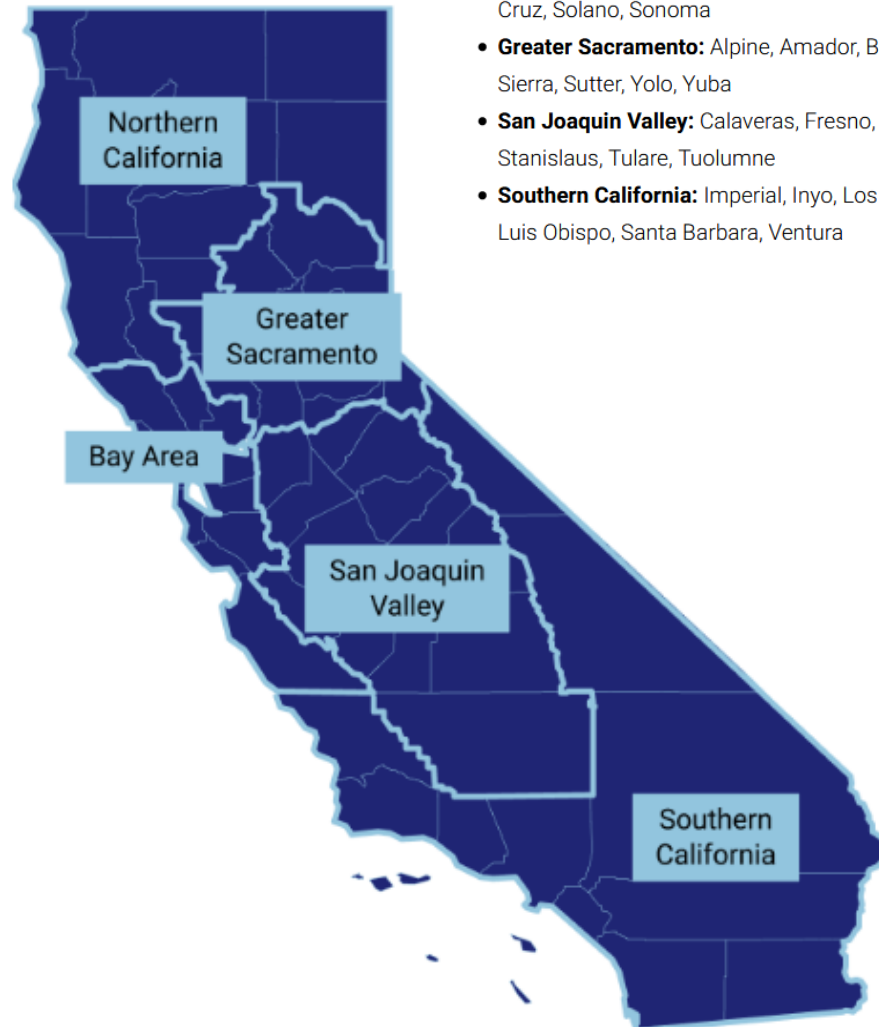

<https://covid19.ca.gov/stay-home-except-for-essential-needs/>

Actual ICU capacity remaining as of December 3, 2020 for the 5 regions:

Northern California	18.60%
Bay Area	25.30%
Greater Sacramento	22.20%
San Joaquin Valley	19.70%
Southern California	20.60%

The state released a map of the five regions being measured. They are:

- **Northern California:** Del Norte, Glenn, Humboldt, Lake, Lassen, Mendocino, Modoc, Shasta, Siskiyou, Tehama, Trinity
- **Bay Area:** Alameda, Contra Costa, Marin, Monterey, Napa, San Francisco, San Mateo, Santa Clara, Santa Cruz, Solano, Sonoma
- **Greater Sacramento:** Alpine, Amador, Butte, Colusa, El Dorado, Nevada, Placer, Plumas, Sacramento, Sierra, Sutter, Yolo, Yuba
- **San Joaquin Valley:** Calaveras, Fresno, Kern, Kings, Madera, Mariposa, Merced, San Benito, San Joaquin, Stanislaus, Tulare, Tuolumne
- **Southern California:** Imperial, Inyo, Los Angeles, Mono, Orange, Riverside, San Bernardino, San Diego, San Luis Obispo, Santa Barbara, Ventura

Current tier assignments as of December 1, 2020

Tier assignments may occur any day of the week and may occur more than once a week.
