Sources: CDPH, WHO, CDC

The date for which case statistics and hospital data were reported. Hospital COVID data are self-reported through a portal managed by the California Hospital Association and pulled at 2pm. COVID case statistics are reported by local health departments to CalREDIE and are pulled at 2pm. Hospital data and case statistics are integrated by the California Department of Technology and made available through the Open Data Portal the following morning. CA Open Data Portal is at least 24 Hours behind although a backlog of new case reports at the State level has ostensibly been cleared, some County dashboards still contain notes that indicate data are missing. *California-Demographics.com made by Cubit – a demographic data provider & census.gov

Presumptive active cases - A calculation (Total Cases - Recovered - Dead) (* LA County does not report recovery rates)

Study of Healthcare Workers Shows COVID-19 Immunity Lasts Many Months

- New findings from a study of thousands of healthcare workers in England show that those who got COVID-19 and produced antibodies against the virus are highly unlikely to become infected again, at least over the several months that the study was conducted. In the rare instances in which someone with acquired immunity for SARS-CoV-2 subsequently tested positive for the virus within a six month period, they never showed any signs of being ill.
  https://directorsblog.nih.gov/2020/12/08/study-of-healthcare-workers-shows-covid-19-immunity-lasts-many-months/

CA Notify – App

- Currently in pilot at the University of California. Available statewide December 10th. All you do is keep your Bluetooth on. You will only receive alerts if you were in close contact with someone who tests positive for COVID-19. Your privacy is protected as your identity is not known and your location is not tracked.
- CA Notify does not collect or exchange any of your personal information. It does not track your location. It only logs close interactions with others. The anonymous keys are exchanged using Bluetooth and are not linked to your identity or location. The keys will change every few minutes to protect you.
- If you get tested for COVID-19 and provide your cell phone number at the time of testing, you will receive a text message from the California Department of Public Health with a verification code that is needed to activate exposure notifications. This message will come from 855-976-8462. If your test result is positive, you can follow the steps in the text message to alert others.
  https://canotify.ca.gov/?utm_source=CalMatters+Newsletters&utm_campaign=f0fb3f65e9-WHATMATTERS_NEWSLETTER&utm_medium=email&utm_term=0_faa7be558d-f0fb3f65e9-150648140&mc_cid=f0fb3f65e9&mc_eid=d92ddf8032

Will CA's Stay-At-Home Order Be Enforced? It's Complicated

- The Golden State has handed out more than $2 million in fines against businesses that failed to comply with coronavirus health orders. In Los Angeles, hundreds of businesses have been cited for defying health orders since summer; meanwhile, the sheriffs of Riverside and Orange counties refused to enforce the latest stay-at-home order.
- Bianco publicly decried the lockdown orders in a YouTube video posted Friday, claiming the orders were hypocritical and "dictatorial." With a record number of COVID-19 patients filling beds in Riverside County hospitals, and ICU bed space diminishing rapidly statewide, the entirety of Southern California is on the verge of falling under the state-mandated "regional stay-at-home order."

CDC Guidance Documents

Operational Considerations for Adapting a Contact Tracing Program to Respond to the COVID-19 Pandemic
Contact tracing is a key component of controlling transmission of infectious diseases. This document is for CDC country offices, ministries of health, sub-national public health authorities, and other implementing partners in non-US settings. While select adaptations may be relevant for any jurisdiction, the document focuses on adaptations that might be especially useful in low- and middle-income countries.
Date: 12/7/20
Audience: Health Departments

Interim Clinical Guidance for Management of Patients with Confirmed Coronavirus Disease (COVID-19)
Clinicians, discover how you can best care for your hospitalized patients with a confirmed infection caused by novel coronavirus 2019 (COVID-19). Date: 12/7/20
Audience: Healthcare Professionals

Considerations for Wearing Masks
CDC's considerations for wearing masks. Date: 12/6/20
Audience: General Public

Interim Guidance for Antigen Testing for SARS-CoV-2
Proper interpretation of antigen test results is important for accurate clinical management of patients with suspected COVID-19. This guidance can help healthcare providers make the most effective use of antigen tests in different situations. Date: 12/4/20
Audience: Health Departments, Laboratories

Operational Considerations for Adapting a Contact Tracing Program to Respond to the COVID-19 Pandemic
Contact tracing is a key component of controlling transmission of infectious diseases. This document is for CDC country offices, ministries of health, sub-national public health authorities, and other implementing partners in non-US settings. While select adaptations may be relevant for any jurisdiction, the document focuses on adaptations that might be especially useful in low- and middle-income countries.
Date: 12/3/20
Audience: Health Departments

Interim Considerations for Testing for K-12 School Administrators and Public Health Officials
Interim Considerations for K-12 School Administrators for SARS-CoV-2 Testing Date: 12/3/20
Audience: Educators & School Administrators

Interim Guidance for Businesses and Employers Responding to Coronavirus Disease 2019 (COVID-19), May 2020
Find CDC's guidance for businesses and employers to plan, prepare, and respond to COVID-19. Date: 12/3/20
Audience: Employers, Business Owners & Community Leaders
