Sources: CDPH, WHO, CDC, Local County Data

The date for which case statistics and hospital data were reported. Hospital COVID data are self-reported through a portal managed by the California Hospital Association and pulled at 2pm. COVID case statistics are reported by local health departments to CalREDIE and are pulled at 2pm. Hospital data and case statistics are integrated by the California Department of Technology and made available through the Open Data Portal the following morning. CA Open Data Portal is at least 24 Hours behind although a backlog of new case reports at the State level has ostensibly been cleared, some County dashboards still contain notes that indicate data are missing. \*California Demographics from State Database Blueprint Data Chart 12-15-20 & census.gov . **News** – The collection of news articles is related to COVID-19. The inclusion or order of articles is not intended to reflect their importance, nor is it intended to endorse the political viewpoints or affiliations included in news coverage.

### **Vaccine inequality threatens global Covid-19 recovery. Here's why – (3 min video)**

- United Nations Secretary General António Guterres speaks with CNN's Becky Anderson about why vaccine inequality is a risk to the global recovery from the coronavirus pandemic.

<https://www.cnn.com/videos/world/2021/02/05/coronavirus-vaccines-united-nations-guterres-anderson-intv-ctw-intl-ldn-vpx.cnn>

### **Johnson & Johnson requests emergency authorization from FDA for Covid vaccine**

- The company released data last week showing it was about 66% effective in protecting against the virus.
- "Today's submission for Emergency Use Authorization of our investigational single-shot COVID-19 vaccine is a pivotal step toward reducing the burden of disease for people globally and putting an end to the pandemic," J&J's chief scientific officer, Dr. Paul Stoffels, said in a statement.
- If J&J's application is approved, it would be the third Covid-19 vaccine authorized for emergency use in the U.S. behind those developed by Pfizer-BioNTech and Moderna.

<https://www.cnn.com/2021/02/04/covid-vaccine-ij-requests-fda-emergency-use-authorization.html>

### **CDC director says guidance on reopening US schools will be released in the coming week**

- The US Centers for Disease Control and Prevention will release guidance on school reopenings in the coming week, CDC Director Dr. Rochelle Walensky said during a White House briefing on Friday.
- CNN's Sara Murray asked Walensky on Friday about her previous comments about teachers and why it would be safe for teachers to return to the classroom if they have not been vaccinated -- and whether that is considered the CDC's official guidance at this point.
- "Our goal is to get children back to school. School should be the last places closed and the first places open. Our goal is to make sure in getting children back to school that we do so both with the safety of the children and the safety of the teachers," Walensky said.

<https://www.msn.com/en-us/news/us/cdc-director-says-guidance-on-reopening-schools-to-be-released-in-the-coming-week/ar-BB1dqut3>

### **Senate passes \$1.9 trillion COVID relief resolution after all-night "vote-a-rama"**

- The Senate passed a budget resolution very early Friday morning, a key step for the Democratic-controlled Congress to pass President Biden's \$1.9 trillion COVID-19 relief proposal without any Republican votes. The 51-50 vote, with Vice President Kamala Harris breaking the tie, came after an all-night marathon "vote-a-rama."
- The "vote-a-rama" included 41 votes with dozens of amendments considered. Harris cast her first tie-breaking votes as vice president, allowing the resolution to finally pass shortly before 6 a.m. with support from all 50 Democratic senators.
- Now that both houses of Congress have approved the resolution, which serves as the vehicle for the legislation, committees can begin formulating a reconciliation bill itself. The final reconciliation bill will receive 20 hours of debate, and then another "vote-a-rama" before a vote in both chambers.

## Pentagon will deploy troops to assist COVID-19 vaccine drive

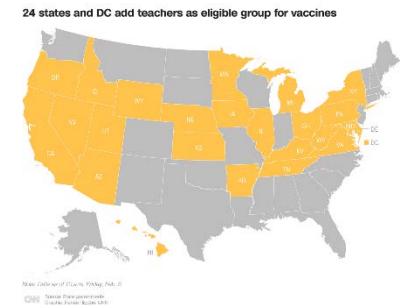

- Coronavirus senior adviser Andy Slavitt announced that Defense Secretary Lloyd Austin has approved a request for assistance from the Federal Emergency Management Agency. It means about 1,000 active duty military personnel will deploy to help state vaccination centers.
- President Joe Biden has called for setting up 100 mass vaccination centers around the country within a month. Two are opening in California, and Slavitt said military personnel will arrive at those centers in a little over a week.
- The Pentagon has scheduled a news briefing later Friday to provide more information about the military role.  
<https://www.foxnews.com/politics/pentagon-deploy-troops-assist-covid-19-vaccine-drive>

## TSA: Travelers who violate mask mandate face fines up to \$1,500

- The Transportation Security Administration (TSA) on Friday issued an update to its recent mask mandate for travelers passing through security checkpoints, confirming that violators face fines ranging from \$250 up to \$1,500, for repeat offenders.
- Depending on "aggravating or mitigating factors," the TSA may even recommend a fine that "falls outside these ranges," the agency said Friday.  
<https://www.foxnews.com/travel/tsa-travelers-violate-mask-mandate-face-fines>

## Here are the states allowing teachers to get Covid-19 vaccines

- As the debate rages over when it's safe for children to resume in-person classes, 24 states plus Washington, DC are allowing some or all of their teachers and school staff to receive Covid-19 vaccines.
- Several governors are making teachers a priority.  
<https://www.cnn.com/2021/02/05/us/teacher-vaccine-states-list-trnd/index.html>

## Cases of 'COVID arm' following vaccination being documented by dermatologists

- Cases of so-called "COVID arm" are seemingly on the rise, with some experiencing red, swollen skin days after receiving the COVID-19 vaccine.
- The American Academy of Dermatology Association has opened a registry for health care providers to report such reactions in their patients in an effort to better understand the "dermatologic manifestations" of the coronavirus vaccine, they said.
- Dr. Elizabeth Houshmand, a board-certified dermatologist in Texas, told local news station KXAS-TV that the swollen, red patches some may see on their arm days after receiving the vaccine indicate a "mounting immune response."
- "It's uncomfortable but I wouldn't let it stop you from getting the vaccine," she said.

## Volunteer army helps Florida elders book coveted COVID shots

- A 120-member volunteer force helping South Florida residents 65 and older clear the daunting hurdles of state-run registration systems that are poorly organized and rely heavily on a technology that is often like a foreign language to them.
- The problem has emerged in numerous states, where the absence of a streamlined national system has forced local governments to hurriedly cobble together a puzzling patchwork of vaccine distribution and administration plans.

## Federal Funding to Accelerate Vaccine Efforts

- FEMA, in accordance with President Biden's Jan. 21 Memorandum, will provide reimbursement to states, local, tribal and territorial governments and the District of Columbia for the use of their National Guard to respond to COVID-19 and other assistance, which may include support to vaccination distribution and administration, at a 100% cost share until Sept. 30.
- On Feb. 2, [President Biden directed FEMA to retroactively reimburse states for 100% of their costs for eligible emergency protective measures](#) including masks, gloves, emergency feeding actions, sheltering at risk populations and mobilization of the National Guard, if not funded by HHS/CDC or another federal agency.
- President's directive also [directs FEMA to expand the activities eligible for reimbursement for work conducted after Jan. 21, 2021 and until Sept. 30, 2021](#). Reimbursement applies to eligible costs to support the safe opening and operation of eligible schools, child-care facilities, healthcare facilities, non-congregate shelters, domestic violence shelters, transit systems and other eligible applicants incurred after Jan. 21.
- FEMA is supporting vaccination centers by providing expedited financial assistance, federal equipment and supplies, and deploying federal personnel to states, tribes, territories and other eligible applicants for vaccination efforts. This assistance is processed when a request is submitted.
- FEMA is supporting COVID-19 vaccine distribution by providing reimbursement to governments for costs associated with vaccine distribution and administration.
- As of Feb. 4, the Disaster Relief Fund balance is more than \$12.6 billion. These funds will support continued response to COVID-19, including expanded vaccination efforts across the country by providing financial assistance to governments and other eligible applicants for vaccination efforts as well as personal protective equipment, alternative care sites and durable medical equipment.
- Providing funding to states, tribes and territories is an Administration priority. After a request is submitted, reviewed and validated, FEMA can expedite reimbursement for eligible emergency work projects to ensure resources are available to support vaccine distribution and administration.
- As of Feb. 4, FEMA has provided more than **\$1.98 billion** to 24 states, the District of Columbia, three territories and two tribes for expenses related to COVID-19 vaccination at 100% federal cost share. In the last 48 hours, the following obligation over \$1 million was made:
  - \$274.9 million to Washington.
- These funds cover emergency protective measures to include:
  - Supplies and commodities needed to safely store and administer the vaccine.
  - Transportation support and reasonable, necessary security for refrigerated trucks and support for leasing space to store and/or administer vaccines including utilities, maintenance and security.
  - Medical and support staff including onsite infection control measures, personal protective equipment for staff, cloth face coverings for patients, temperature scanners, physical barriers and disinfection of the facility in accordance with CDC guidance.
  - Dissemination of public information and communication regarding vaccinations.
- The costs of purchasing the vaccine and support kits are not covered by these obligations and do not duplicate any HHS funding. COVID-19 Vaccines and support kits are provided to state, tribal and territorial governments at no cost by the federal government.

- The Coronavirus Response and Relief Supplemental Appropriations Act of 2021 appropriates \$2 billion to FEMA to provide financial assistance to households for COVID-19-related funeral expenses at a 100% federal cost.
  - FEMA is finalizing an interim policy and will be hiring [contract support](#) through the federal acquisitions process to help administer the program. The contract is open for proposals until Feb.8.

### **Federal Coordination to Identify and Fill Resource Gaps**

- FEMA is working closely with state, local, tribal and territorial governments to fill gaps that local health officials have identified. Additionally, emergency managers are working closely with appropriate health officials.

### **FEMA and Other Federal Agencies Are Supporting Vaccine Centers**

- FEMA, through its National Response Coordination Center and 10 regional offices across the nation, is coordinating with other federal agencies to meet state, tribal and territorial needs. FEMA is providing support to established community vaccination centers and National Guard operations to expand access to vaccines.
- A vaccine center is considered federally supported based on three characteristics:
  - It is a state, local, tribal or territorial established vaccine center that is receiving any combination of federal personnel, materiel or funding.
  - The federal support enables the center to open, remain open, or expand capacity.
  - The center is, or has been, operational on or after Jan 20.
- FEMA is committed to ensuring every American who wants a vaccine can get one. To reach underserved and rural communities, FEMA and its federal partners are helping determine community vaccination center locations to ensure equitable access. This includes coordination efforts to establish and support fixed facilities and establishing pop-up or temporary vaccination centers and mobile vaccination efforts.
- Additionally, FEMA established a Civil Rights Advisory Group. Civil rights advisors are deployed to all regions assisting with equity in vaccine operations, including community engagement, community assessments, equal access/accessibility and site inspections.
- As of Feb. 4, FEMA has deployed 507 staff across the nation to provide federally supported vaccine centers with personnel and technical assistance. This does not include support personnel from other federal agencies or partners. Additional FEMA staff across the country are supporting virtually.
- As of Feb. 4, 175 federally supported vaccine centers are operational across the country.

### **Community Vaccination Center Pilot Partnerships**

- The federal government is partnering with state governments to launch a small number of pilot community vaccination using primarily federal staff to support of state and local governments.
- Piloting these centers allows FEMA and its federal partners to ensure the success of a small number of centers before preparing additional support as vaccine supplies ramp up in the weeks and months ahead.
- On Tuesday, [FEMA, and the state of California partnered to launch a pilot project](#) to establish community vaccination centers in Los Angeles and Oakland. FEMA will provide resources, operational support and federal staffing support to establish these new centers. The centers are expected to be open to eligible members of the public beginning Feb. 16.

## Vaccine Guidance

- According to CDC, as of Feb. 4 more than 33.9 million vaccine doses have been administered. More than 55.9 million vaccine doses have been distributed to locations across the country.
- The CDC Vaccine Task Force and Data Analysis & Visualization Task Force recently launched the CDC COVID Data Tracker [Vaccinations Trends page](#). This page includes the overall trends of vaccinations over time in the US and for the Federal Pharmacy Partnership for Long-Term Care Program.
- FEMA is working with the [Ad Council to encourage hesitant or underrepresented Americans to get vaccinated](#). This research-driven public education campaign provides federal, non-profit, and medical stakeholders with insights and communications strategies to tailor communications to reach diverse audiences.
- The vaccine is not a perfect fix. Everyone should continue to [practice other precautions](#) like wearing a mask, social distancing, handwashing and other hygiene measures until public health officials say otherwise.
