Sources: CDPH, WHO, CDC, Local County Data

The date for which case statistics and hospital data were reported. Hospital COVID data are self-reported through a portal managed by the California Hospital Association and pulled at 2pm. COVID case statistics are reported by local health departments to CalREDIE and are pulled at 2pm. Hospital data and case statistics are integrated by the California Department of Technology and made available through the Open Data Portal the following morning. CA Open Data Portal is at least 24 Hours behind although a backlog of new case reports at the State level has ostensibly been cleared, some County dashboards still contain notes that indicate data are missing. \*California Demographics from State Database Blueprint Data Chart 12-15-20 & census.gov . ### **No-fault compensation program for COVID-19 vaccines is a world first**

- New program makes compensation available to eligible individuals in 92 low- and middle-income countries without need to resort to law courts
- This is the first and only global vaccine injury compensation mechanism
- The program is funded by a small levy on each dose supported by the Gavi COVAX AMC

### **Is India currently witnessing a second wave of the Covid-19 pandemic?**

- A spike in the number of new Covid-19 infections threatens to overturn the progress India has made in containing the pandemic.
- With the daily new infections—which had come down to close to 10,000 a day—slowly rising in the past week, several states are now considering localized lockdowns, especially in those regions that are seeing a sudden spike. Five states, according to data from India's health ministry, account for 86% of the new infections in the country.

### **China did 'little' to hunt for Covid origins in early months, says WHO document**

- Chinese officials did “little” in terms of epidemiological investigations into the origins of the Covid-19 pandemic in Wuhan in the first eight months after the outbreak, according to an internal [World Health Organization](#) document seen by the Guardian.

### **As Pandemic Took Hold, Suicide Rose Among Japanese Women**

- Job losses, urban isolation, household burdens: Covid-19 has compounded the pressures on women, raising alarms in a country that has worked to reduce some of the world's highest suicide rates.

<https://www.nytimes.com/2021/02/22/world/asia/japan-women-suicide-coronavirus.html>

### **Is One Vaccine Dose Enough After COVID-19 Infection?**

- For the millions of Americans now eligible to receive the Pfizer or Moderna COVID-19 vaccines, it's recommended that everyone get two shots. The first dose of these mRNA vaccines trains the immune system to recognize and attack the spike protein on the surface of SARS-CoV-2, the virus that causes COVID-19. The second dose, administered a few weeks later, boosts antibody levels to afford even better protection. People who've recovered from COVID-19 also should definitely get vaccinated to maximize protection against possible re-infection. But, because they already have some natural immunity, would just one shot do the trick? Or do they still need two?
- A small, NIH-supported study, published as a pre-print on *medRxiv*, offers some early data on this important question [1]. The findings show that immune response to the first vaccine dose in a person who's already had COVID-19 is equal to, or in some cases better, than the response to the second dose in a person who hasn't had COVID-19. While much more research is needed—and I am definitely not suggesting a change in the current recommendations right now—the results raise the possibility that one dose might be enough for someone who's been infected with SARS-CoV-2 and already generated antibodies against the virus.

## NIH-funded study suggests feedback-based video intervention could help at-risk families.

- A video and coaching intervention program for at-risk mothers and infants increases parent-child interactions and helps to improve children's social, emotional and language development, suggests a study funded by the National Institutes of Health. The program, the Video Interaction Project (VIP), consists of videotaping three-minute mother and child interactions, followed by feedback to the mother from a coach with expertise in early childhood development. Scheduled during well baby checkups, the authors say this program is an efficient, cost-effective approach to reducing disparities in school readiness.
- The study appears in Pediatrics and was conducted by Alan Mendelsohn, M.D., at New York University Grossman School of Medicine and colleagues. Funding was provided by NIH's Eunice Kennedy Shriver National Institute of Child Health and Human Development (NICHD) and National Center for Advancing Translational Sciences.

## Fauci says CDC guidance for fully vaccinated people could come soon

- Anthony Fauci, the nation's top infectious disease expert, says the Centers for Disease Control and Prevention (CDC) could soon release more relaxed safety recommendations for people who have been fully vaccinated against COVID-19.
- In an interview with CNN's Alisyn Camerota, Fauci said the CDC will likely issue guidance after agency officials "sit down, talk about it, look at the data and then come out with a recommendation based on the science."

# COVID-19 Weather-Related Impacts to Vaccination Sites

## Situation:

The National Watch Center, in coordination with all ten Regional Watches, is monitoring for potential weather impacts to COVID-19 vaccination sites

- The highlighted states have reported COVID-19 vaccination site closures due to the winter storms and will reschedule appointments once the storms have passed.
- 25 Federally Supported Community Vaccination Centers closed due to inclement weather.

National Watch Center

## **CDC Guidance**

<https://www.cdc.gov/coronavirus/2019-ncov/communication/guidance-list.html?Sort=Date%3A%3Adesc>

### [Operational Considerations for the Identification of Healthcare Workers and Inpatients with Suspected COVID-19 in non-US Healthcare Settings](#)

This document is provided by CDC and is intended for use in non-US healthcare settings. This document provides guidance on the identification or screening of healthcare workers and inpatients with suspected COVID-19. Date: 2/21/21

### [Prioritizing Case Investigations and Contact Tracing for COVID-19 in High Burden Jurisdictions](#)

The page provides guidance to health departments regarding prioritization recommendations for contact tracing and case investigation. Date: 2/18/21

### [COVID-19 Considerations for Animal Activities at Fairs, Shows, and Other Events](#)

Fair and agricultural show organizers should consider the potential for COVID-19 to spread from person to person, person to animal, and possibly from animal to animal. The risk of animal-to-person spread is considered low. Date: 2/18/21

### [Guidance for Beaches During COVID-19](#)

As some communities in the United States consider opening or begin to open public beaches, CDC offers the following considerations for steps beach managers can take to help protect their staff and beach visitors, both in the water and on land, and slow the spread of the virus that causes COVID-19. Date: 2/18/21

### [Considerations for Community-Based Organizations](#)

Pneumonia and influenza mortality data from the National Center for Health Statistics (NCHS) Mortality Reporting System as of May 14, 2020. Date: 2/18/21

### [Considerations for Communities of Faith](#)

CDC's considerations to help communities of faith learn how to practice their beliefs while keeping their staff and congregations safe. Date: 2/18/21

### [COVID-19 Prevention in K-12 Schools](#)

Learn how schools can protect health during COVID-19. Date: 2/18/21

### [Guidance for Operating Child Care Programs during COVID-19](#)

This information is intended for child care programs that remain open, and should be used in conjunction with CDC's guidance for administrators of child care programs and K-12 schools. This guidance does not supersede state and local laws and policies for child care programs. Date: 2/18/21

### [Interim Guidance on Management of Coronavirus Disease 2019 \(COVID-19\) in Correctional and Detention Facilities](#)

Guidance specific for correctional facilities and detention centers during the outbreak of COVID-19, to ensure continuation of essential public services and protection of the health and safety of incarcerated and detained persons, staff, and visitors. Date: 2/18/21

### [Interim U.S. Guidance for Risk Assessment and Work Restrictions for Healthcare Personnel with Potential Exposure to SARS-CoV-2](#)

Find CDC's guidance on assessing, monitoring, and restricting risk for those who work in healthcare facilities during COVID-19. Date: 2/18/21

### [Guidance for Wearing Masks](#)

CDC's considerations for wearing masks. Date: 2/17/21

### [Considerations for Events and Gatherings](#)

Learn how to plan various size gatherings during COVID-19 to enhance the protection of individuals and communities. Date: 2/17/21

## COVID-19 Vaccine 2<sup>nd</sup> Dose Information

### How to get your second COVID-19 Vaccine Dose

#### Riverside County Public Health Vaccine Clinics

(ex: Citrus High School, Corona High School, Heritage High School, Indio Fairgrounds, Lake Elsinore Storm Stadium, Perris Fairgrounds, San Geronio Middle School, Tahquitz High School)

For those who received a first dose at a county vaccine clinic, Riverside County health officials will reach out to residents through the contact method provided at the first appointment. At that time, the county will provide instructions for receiving the second dose conforming to the current CDC guideline on timeframes. Residents who received their first dose at a private provider, should contact that same provider to schedule their second dose.

[Cdc.gov/CDC/guidelines](#) recommends that second doses be given between 21-42 days for Pfizer and 25-42 days for Moderna vaccines. Receiving a second dose too early may reduce the effectiveness of the vaccine.

#### Community Providers

For a list of community providers please check [www.rivco.org/COVID-19/Vaccine-Providers](http://www.rivco.org/COVID-19/Vaccine-Providers)

For those who received a first dose at one of the community providers, vaccine supplies are very limited, and it may not be possible to schedule your second dose in a timely manner. We encourage you to check with your primary care physician or other community providers who may have appointments available. For a list of some of the community providers, go to [www.rivco.org/COVID-19/Vaccine-Providers](http://www.rivco.org/COVID-19/Vaccine-Providers)

[Cdc.gov/CDC/guidelines](#) recommends that second doses be given between 21-42 days for Pfizer and 25-42 days for Moderna vaccines. Receiving a second dose too early may reduce the effectiveness of the vaccine.
