Sources: CDPH, WHO, CDC, Local County Data, LA Times

The date for which case statistics and hospital data were reported. Hospital COVID data are self-reported through a portal managed by the California Hospital Association and pulled at 2pm. COVID case statistics are reported by local health departments to CalREDIE and are pulled at 2pm. Hospital data and case statistics are integrated by the California Department of Technology and made available through the Open Data Portal the following morning. CA Open Data Portal is at least 24 Hours behind although a backlog of new case reports at the State level has ostensibly been cleared, some County dashboards still contain notes that indicate data are missing. *California Demographics from State Database Blueprint Data Chart 12-15-20 & census.gov . Presumptive active cases - A calculation (Total Cases - Recovered - Dead) (* LA County does not report recovery rates)

Global Variants Report

<https://covid.cdc.gov/covid-data-tracker/#global-variant-report-map>

Global Variants Report

Countries that have reported variants of SARS-CoV-2.

A new SARS-CoV-2 variant has one or more mutations that differentiate it from predominant virus variants already circulating among the general population. Variants are expected to occur as viruses are constantly changing. Surveillance can help investigate how some variants may impact COVID-19 disease transmission or severity and the effectiveness of vaccines and therapeutics.

CDC works with partners around the world to respond to the pandemic. As part of these efforts, CDC is working to expand the capacity to detect and respond to newly identified variants of the virus that causes COVID-19.

The map shows which countries have reported variants of SARS-CoV-2. Because of differences in detection and reporting, variants are likely present in some countries that have not yet reported them. The lack of reporting of a variant in a country does not indicate the variant is absent in that country. Data were provided by the World Health Organization (WHO) Variant Tracker. For more information on variants, please see <https://www.cdc.gov/coronavirus/2019-ncov/cases-updates/variant-surveillance.html>
