Sources: CDPH, WHO, CDC, Local County Data, LA Times

The date for which case statistics and hospital data were reported. Hospital COVID data are self-reported through a portal managed by the California Hospital Association and pulled at 2pm. COVID case statistics are reported by local health departments to CalREDIE and are pulled at 2pm. Hospital data and case statistics are integrated by the California Department of Technology and made available through the Open Data Portal the following morning. CA Open Data Portal is at least 24 Hours behind although a backlog of new case reports at the State level has ostensibly been cleared, some County dashboards still contain notes that indicate data are missing. *California Demographics from State Database Blueprint Data Chart 12-15-20 & census.gov. Presumptive active cases - A calculation (Total Cases - Recovered - Dead) (* LA County does not report recovery rates)

Blood Expert Says He Found Why Some Covid-19 Vaccines Trigger Rare Clots

- Scientists world-wide are racing to understand why Covid-19 vaccines from AstraZeneca PLC and Johnson & Johnson are causing rare but potentially deadly blood clots.
- In Germany, one researcher thinks he has found what is triggering the clots. Andreas Greinacher, a blood expert, and his team at the University of Greifswald believe so-called viral vector vaccines—which use modified harmless cold viruses, known as adenoviruses, to convey genetic material into vaccine recipients to fight the coronavirus—could cause an autoimmune response that leads to blood clots. According to Prof. Greinacher, that reaction could be tied to stray proteins and a preservative he has found in the AstraZeneca vaccine.

Costco, Walmart, Publix: U.S. Stores Drop Masks For Vaccinated

- Stores are rolling back mask requirements for fully vaccinated customers. More than a dozen states are also following suit.

<https://patch.com/us/across-america/costco-walmart-publix-u-s-stores-drop-masks-vaccinated>

New York Yankees say 8 vaccinated members tested positive for Covid-19. Here's how that could happen

- Eight members of the New York Yankees have tested positive for coronavirus this week despite being inoculated with the Johnson & Johnson vaccine, the baseball team said Thursday.
- The eight infected Yankees include coaches, staff members and a player. Seven do not have symptoms, said Jason Zillo, the team's vice president of communications.
- The Yankees said the eight infected members received the Johnson & Johnson vaccine at least two weeks ago.

Newsom won't require COVID vaccines for prison staff

- Gov. Gavin Newsom and his administration have no plans to make COVID-19 vaccinations an employment requirement for California prison guards, the governor said during a press conference today.
- Newsom indicated that he doesn't plan on getting ahead of the California prison guards union by mandating vaccinations — saying instead he's relying on the union to convince more officers to become vaccinated.

Asylum Seekers In Riverside County: State Opens COVID Clinic

- Customs & Border Protection officials have been dropping off immigrants seeking asylum in Riverside County since March, according to local officials, and now a state-funded COVID-19 testing and vaccination clinic has opened in Indio for the newly arrived.
- The new seven-day-a-week "Testing, Vaccination and Receiving Center" opened Friday in a parking lot near Highway 111 and Monroe Street. In addition to tests, county and state teams will provide medical screening, transportation to appropriate shelter accommodations and support with travel plans to asylum sponsors in other parts of the United States.

COMMUNITY TRANSMISSION LEVEL

Source: CDC Aggregate County Dataset (cases), Unified Testing Dataset (tests)

Notes: Combined Transmission Level is the higher threshold among cases and testing thresholds.

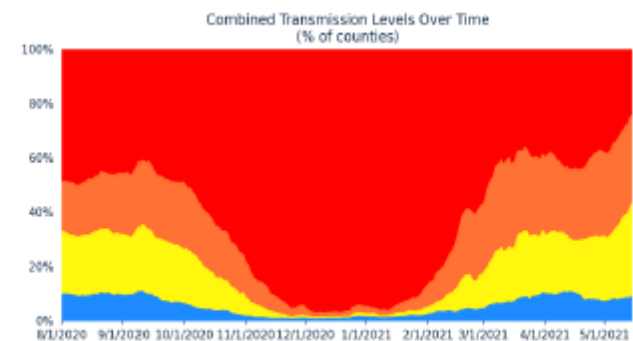

AL cases reported at the county-level in the current 7-day window include additional cases that occurred prior to 5/14/2021.

Counties by Community Transmission Indicator

Cases per 100k	0 to 9	10 to 49	50 to 99	100 +
# of counties (change)	308 (↑28)	1195 (↑227)	1082 (↓1)	635 (↓254)
% of counties (change)	9.6% (↑0.9%)	37.1% (↑7.0%)	33.6% (↓0.0%)	19.7% (↓7.9%)
Test Positivity	0.0% to 4.9%	5.0% to 7.9%	8.0% to 9.9%	10.0% +
# of counties (change)	2093 (↑244)	682 (↓79)	185 (↓39)	260 (↓106)
% of counties (change)	65.0% (↑7.6%)	21.2% (↓2.5%)	5.7% (↓1.8%)	8.1% (↓3.3%)

Counties by Combined Transmission Level

Category	Low Transmission Blue	Moderate Transmission Yellow	Substantial Transmission Orange	High Transmission Red
# of counties (change)	281 (↑32)	1099 (↑229)	1049 (↑13)	791 (↓274)
% of counties (change)	8.7% (↑1.0%)	34.1% (↑7.1%)	32.6% (↑0.4%)	24.6% (↓8.5%)

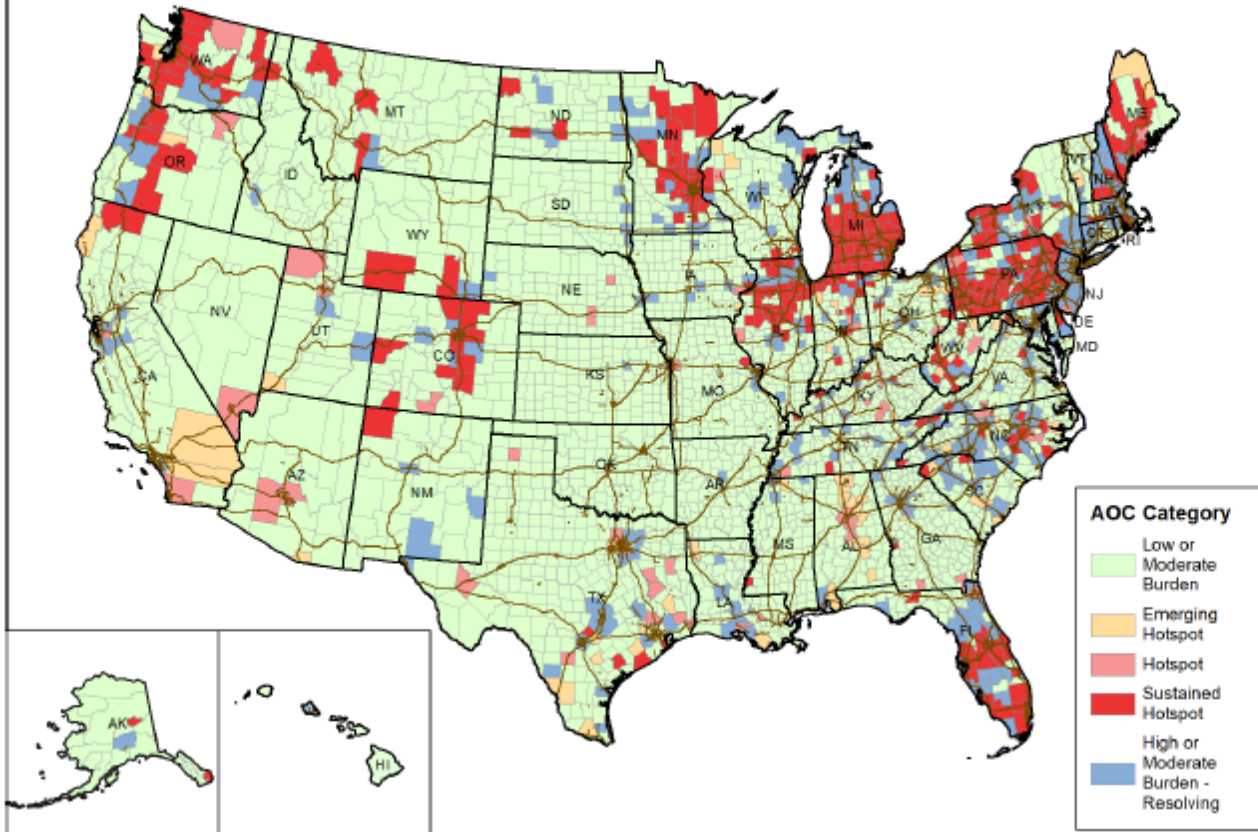

INITIAL PUBLIC RELEASE // SUBJECT TO CHANGE

AREA OF CONCERN CONTINUUM

Date: 5/16/2021

Area of Concern Continuum by County 15MAY2021

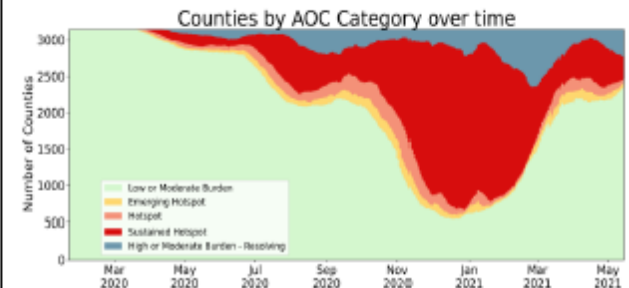

AL cases reported at the county-level in the current 7-day window include additional cases that occurred prior to 5/14/2021.

The Areas of Concern Continuum (AOC) is used to describe communities as they progress through stages of the epidemic. There are 7 possible AOC classifications based on current and recent history of case and testing data for the location:

- (1) **Low Burden** – communities with minimal activity
- (2) **Moderate Burden** – communities with moderate disease activity
- (3) **Emerging Hotspot** – communities with a high likelihood to become hotspots in the next 1-7 days
- (4) **Hotspot** – communities that have reached a threshold of disease activity considered as being of high burden
- (5) **Sustained Hotspot** – communities that have had a high sustained case burden and may be higher risk for experiencing healthcare resource limitations
- (6) **High Burden – Resolving** – communities that were recently identified as hotspots and are now improving
- (7) **Moderate Burden – Resolving** – communities that have a moderate level of burden, but are demonstrating improvement

See Data Sources/Methods slides for more information.

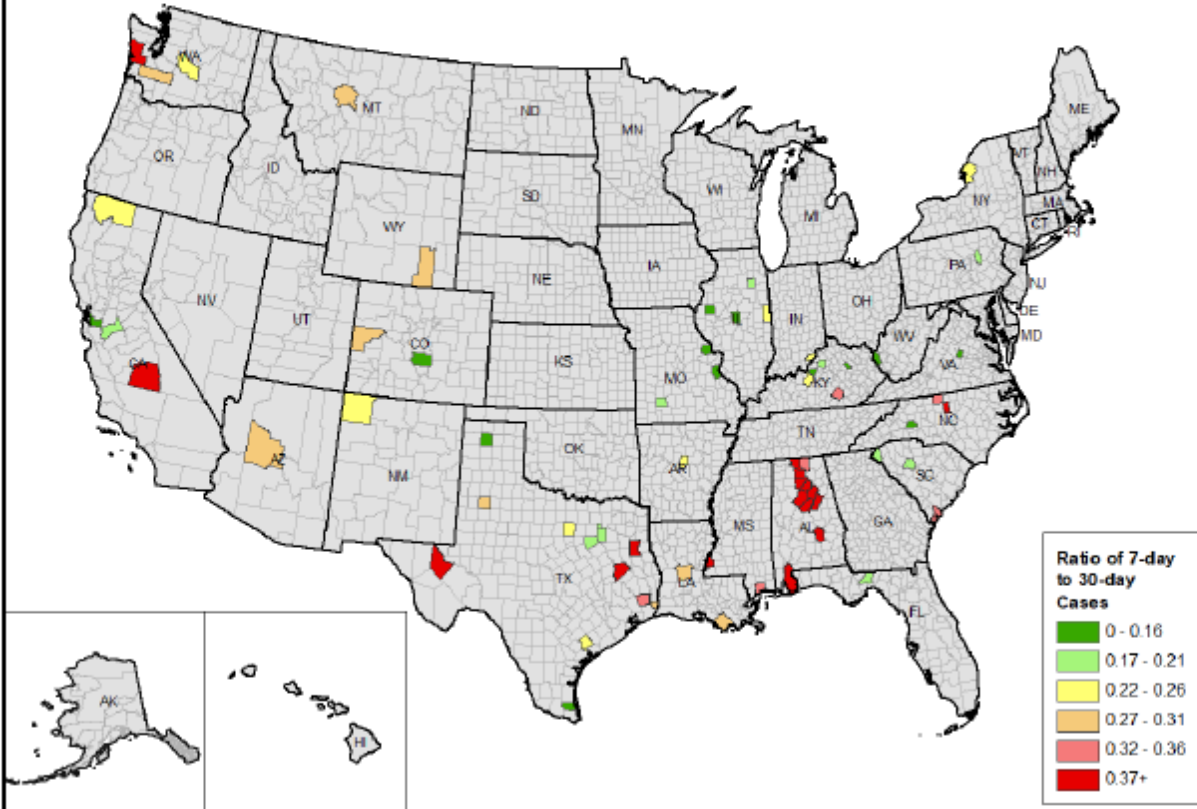

INITIAL PUBLIC RELEASE // SUBJECT TO CHANGE

AREA OF CONCERN CONTINUUM - RAPID RISER COUNTIES

Date: 5/16/2021
 Source: CDC Aggregate
 County Data

Counties with Rapid Rise in Cases in the Last 14 Days

AL cases reported at the county-level in the current 7-day window include additional cases that occurred prior to 5/14/2021.

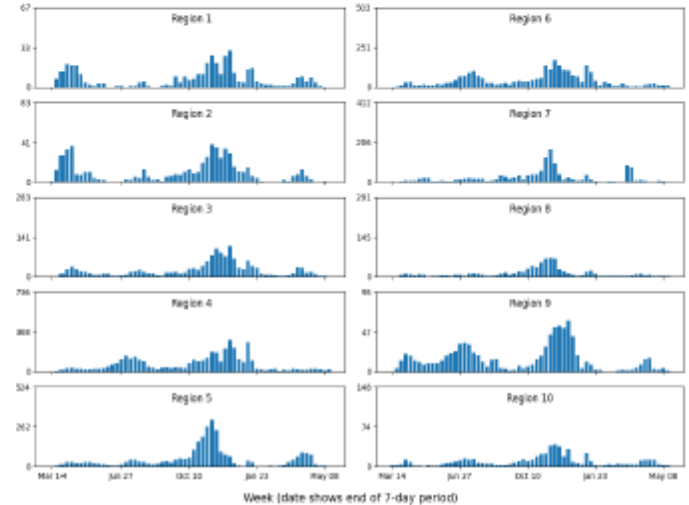

This map shows counties that have seen a rapid rise in cases within the last 14 days by meeting the following **Rapid Riser County** criteria:

- >100 new cases in last 7 days
- >0% change in 7-day incidence
- >-60% change in 3-day incidence
- 7-day incidence / 30-day incidence ratio >0.31
- one or both of the following triggering criteria:
 - (a) >60% change in 3-day incidence,
 - (b) >60% change in 7-day incidence

The color indicates current acceleration in cases (ratio of 7-day to 30-day cases). Counties in **light red** and **red** are continuing to see accelerating cases in the most recent week, while those in **dark green** and **green** may have seen declines in the most recent week.

The bar charts below show the history of rapid riser counties by FEMA region and week, indicating when different geographic areas have seen the greatest acceleration in cases.

of Distinct Rapid Riser Counties by Week and FEMA Region
 (vertical axis scaled to number of counties in region)

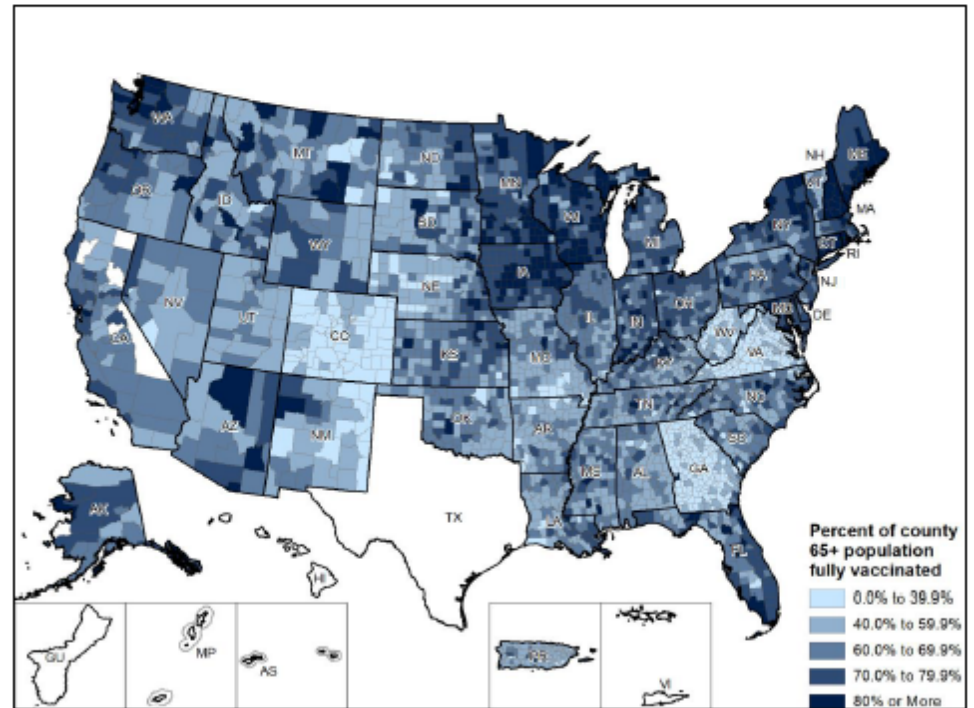

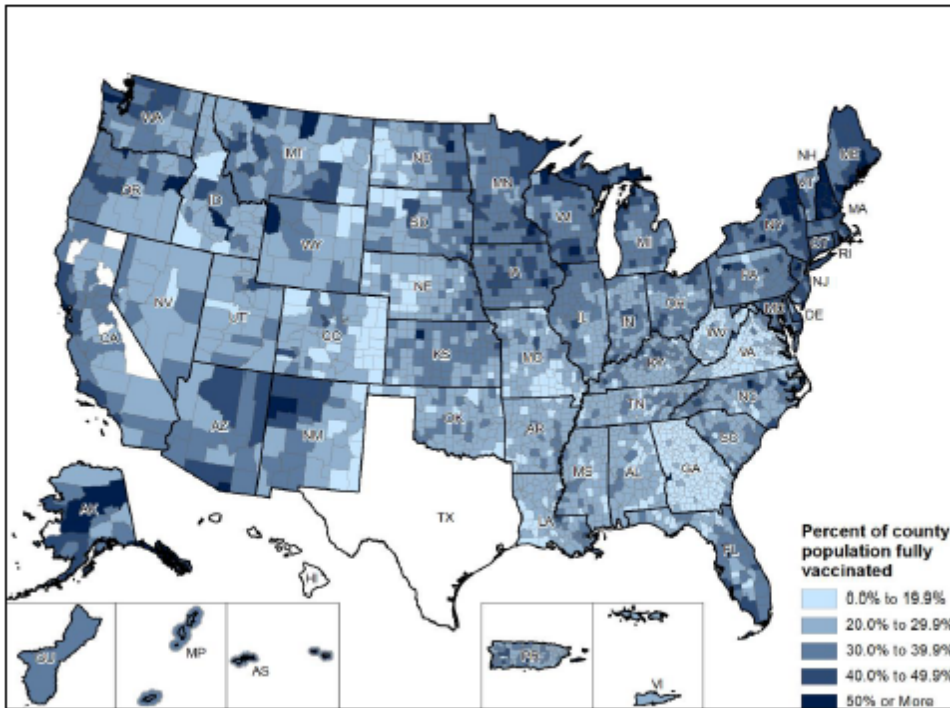

INITIAL PUBLIC RELEASE // SUBJECT TO CHANGE

VACCINATION RATES BY COUNTY

Percent of Population Fully Vaccinated: 37.1%
Percent of Population with at Least 1 Dose: 47.4%

Percent of 65+ Population Fully Vaccinated: 72.7%
Percent of 65+ Population with at Least 1 Dose: 84.6%

Source: Unified COVID-19 Vaccine Dataset. Fully vaccinated indicates those who received the second dose of Pfizer-BioNTech or Moderna vaccines and those who received one dose of J&J/Janssen COVID-19 vaccine. Values reflect total by report date, not administered date. The following states have $\leq 80\%$ completeness reporting vaccinations by county, which may result in underestimates of vaccination data for counties and CBSAs: NM (79%), VT (74%), CO (70%), WV (54%), VA (51%), GA (48%), HI (0%), TX (0%), AS (0%), FM (0%), MH (0%), MP (0%)

Statewide

- 

15,595,784 (49.0%) *People fully vaccinated*
4,768,887 (15.0%) *People partially vaccinated*
- 

34,536,581 (80.0%) *Doses administered*
234,577 *Average doses per day*
- 

7,884,006 *Doses on hand*
(34 days of inventory)
- 

43,145,000 *Doses Delivered*
9,715,850 *CDC Pharmacy Doses Delivered*

Doses Administered by County of Residence

County:

Los Angeles	8,746,679
San Diego	3,108,997
Orange	2,886,921
Santa Clara	2,109,186
Alameda	1,737,513
Riverside	1,696,852
San Bernardino	1,377,456
Contra Costa	1,225,039
Sacramento	1,216,862
San Francisco	1,020,118
San Mateo	848,889
Ventura	768,820
Fresno	692,502
Kern	519,586
Sonoma	514,701
San Joaquin	506,462
Santa Barbara	405,093

Today's count of administered doses is incomplete due to a delay in receiving data from other immunization registries. Complete counts will be updated in this dashboard once available later this week.

Legend ⏶ ✕

The Air Quality Index (AQI) is an index for reporting daily air quality that conveys how air pollution can affect public health. The AQI is divided into six levels of health concern:

- AQI Value**
- Hazardous (301-500)
 - Very Unhealthy (201-300)
 - Unhealthy (151-200)
 - Unhealthy for Sensitive Groups (101-150)
 - Moderate (51-100)
 - Good (0-50)
