Sources: CDPH, WHO, CDC, Local County Data, LA Times

The date for which case statistics and hospital data were reported. Hospital COVID data are self-reported through a portal managed by the California Hospital Association and pulled at 2pm. COVID case statistics are reported by local health departments to CalREDIE and are pulled at 2pm. Hospital data and case statistics are integrated by the California Department of Technology and made available through the Open Data Portal the following morning. CA Open Data Portal is at least 24 Hours behind although a backlog of new case reports at the State level has ostensibly been cleared, some County dashboards still contain notes that indicate data are missing. *California Demographics from State Database Blueprint Data Chart 12-15-20 & census.gov. Presumptive active cases - A calculation (Total Cases - Recovered - Dead) (* LA County does not report recovery rates)

Uneven vaccination rates across the US linked to Covid-19 case trends, worry experts

- Tuesday was a "landmark day," as the United States reached a new Covid-19 vaccine milestone: 60% of adults have now received at least one dose of Covid-19 vaccine, according to the US Centers and Disease Control and Prevention.
- But vaccination rates across the United States are uneven -- a worrisome trend that could obstruct efforts to end the Covid-19 pandemic. Rates range from more than 78% of adults in Vermont with at least one vaccine to less than 45% of adults in Mississippi.

<https://www.cnn.com/2021/05/19/health/uneven-vaccination-rates-covid-19-trends/index.html>

Fauci says the public is 'misinterpreting' the CDC's latest mask guidance

- Anthony S. Fauci, the government's leading infectious-disease expert, told Axios that the public is misinterpreting the Centers for Disease Control and Prevention's announcement last week that fully vaccinated people can go without masks indoors.
- "I think people are misinterpreting, thinking that this is a removal of a mask mandate for everyone. It's not," he told Axios. "It's an assurance to those who are vaccinated that they can feel safe, be they outdoors or indoors."
- Fauci emphasized that the health agency did not explicitly tell unvaccinated people to go without masks but instead communicated to vaccinated individuals that they won't get infected indoors or outdoors.

Emergent CEO says FDA is holding over 100 million J&J Covid vaccine doses for further testing after botched doses

- The FDA is holding over 100 million Johnson & Johnson Covid-19 vaccine doses for further testing after the agency found multiple safety violations at the plant — run by Emergent BioSolutions — that was helping make the shots, Emergent CEO Robert Kramer told lawmakers Wednesday.
- The U.S. put J&J in charge of the Baltimore plant last month after learning that Emergent, a federal contractor that had been making key ingredients for J&J and AstraZeneca, cross-contaminated the two shots.

<https://www.cnn.com/2021/05/19/emergent-ceo-says-fda-is-holding-over-100-million-of-jj-covid-vaccine-doses-for-further-testing-after-botched-doses.html>

San Diego COVID-19 patient receives new diagnosis: type 2 diabetes

- With new evidence emerging, researchers are now trying to figure out if COVID-19 can trigger new cases of diabetes.
- In mid-April, a 28 year old female, came down with a cough and fever, and tested positive for COVID-19, nine days after receiving her first dose of the Pfizer vaccine. Days later, she was admitted into a hospital with pneumonia, and treated with the antiviral drug Remdesivir, as well as steroids.
- According to a global analysis published in the journal Diabetes, Obesity and Metabolism, more than 14% of people hospitalized with severe COVID-19 developed diabetes. The researchers pointed to the possible impact of effects of COVID-19, citing the high doses of insulin that diabetes patients with severe cases require and the complications they often develop.
- "What we don't know -- and this is possible -- that the virus itself can damage the pancreas and make the pancreas secrete not enough insulin," said Dr. Eckel. He says it's also possible many of the apparent new cases were actually undiagnosed cases of diabetes. New studies are now underway looking into whether COVID-19 can trigger diabetes.

COVID-19 Community Profile Report 05-19-2021

<https://beta.healthdata.gov/Health/COVID-19-Community-Profile-Report/gqxm-d9w9>

COMMUNITY TRANSMISSION LEVEL

Source: CDC Aggregate County Dataset (cases), Unified Testing Dataset (tests)

Notes: Combined Transmission Level is the higher threshold among cases and testing thresholds.

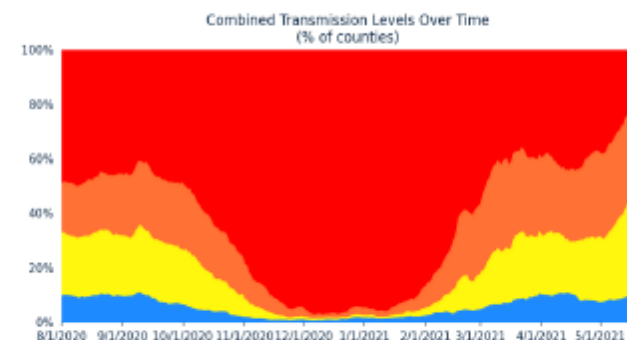

AL cases reported at the state and county-level in the current 7-day window include additional cases that occurred prior to 5/14/2021.

Counties by Community Transmission Indicator

Cases per 100k	0 to 9	10 to 49	50 to 99	100 +
# of counties (change)	333 (↑42)	1247 (↑207)	1041 (↓38)	399 (↓211)
% of counties (change)	10.3% (↑1.3%)	38.7% (↑6.4%)	32.3% (↓1.2%)	18.6% (↓6.6%)
Test Positivity	0.0% to 4.9%	5.0% to 7.9%	8.0% to 9.9%	10.0% +
# of counties (change)	2153 (↑240)	643 (↓90)	178 (↓39)	246 (↓91)
% of counties (change)	66.9% (↑7.5%)	20.0% (↓2.8%)	5.5% (↓1.8%)	7.6% (↓2.8%)

Counties by Combined Transmission Level

Category	Low Transmission Blue	Moderate Transmission Yellow	Substantial Transmission Orange	High Transmission Red
# of counties (change)	305 (↑42)	1150 (↑210)	1022 (↓16)	743 (↓236)
% of counties (change)	9.5% (↑1.3%)	35.7% (↑6.5%)	31.7% (↓0.5%)	23.1% (↓7.3%)

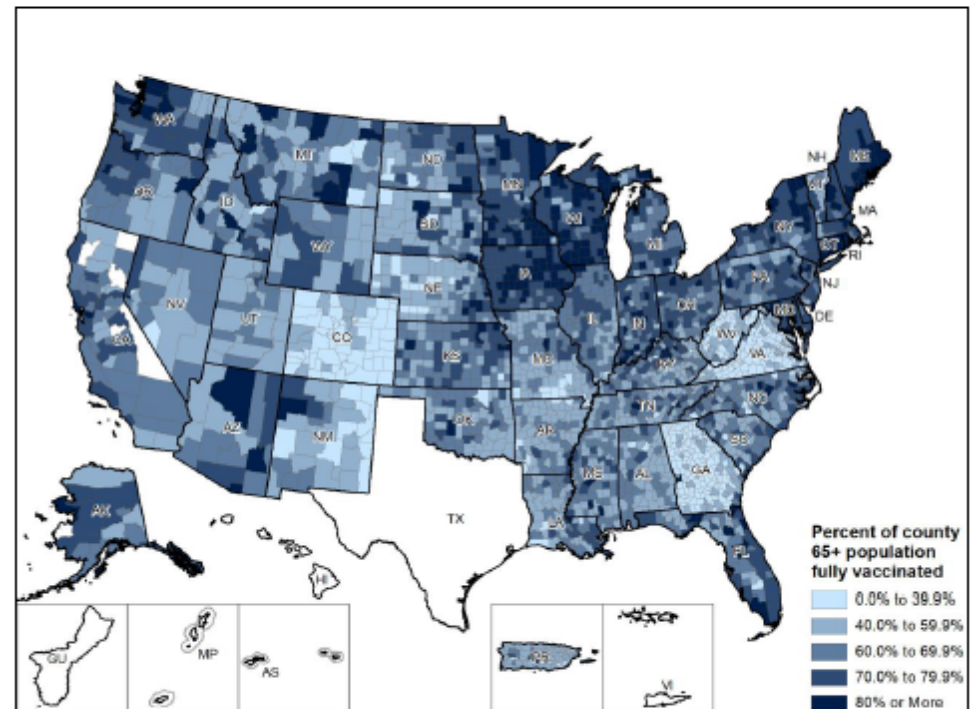

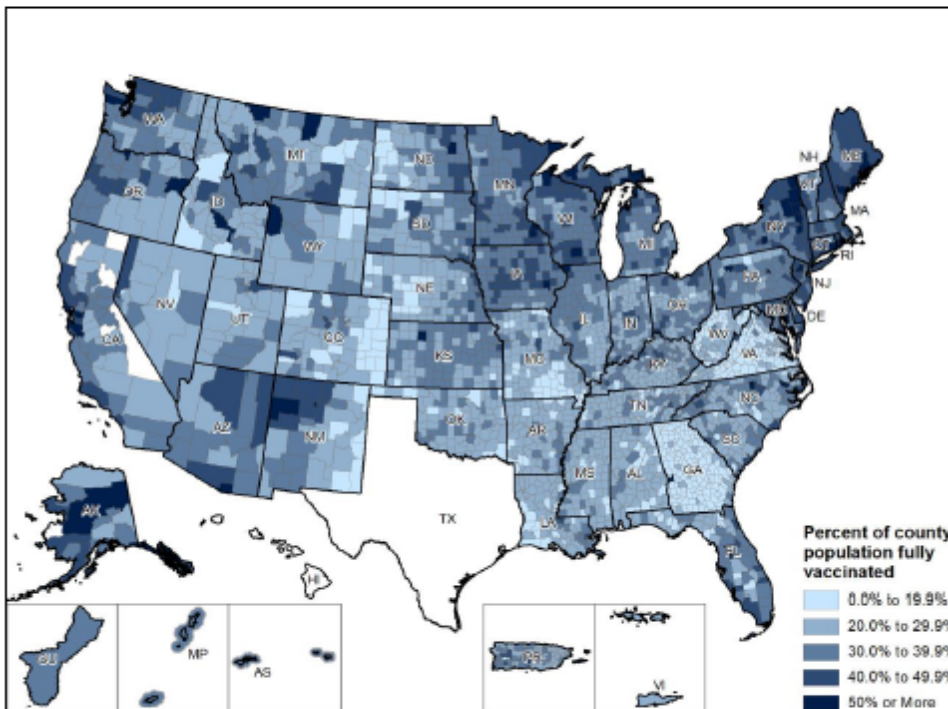

INITIAL PUBLIC RELEASE // SUBJECT TO CHANGE

VACCINATION RATES BY COUNTY

Percent of Population Fully Vaccinated: 37.5%
Percent of Population with at Least 1 Dose: 47.7%

Percent of 65+ Population Fully Vaccinated: 72.6%
Percent of 65+ Population with at Least 1 Dose: 84.4%

Source: Unified COVID-19 Vaccine Dataset. Fully vaccinated indicates those who received the second dose of Pfizer-BioNTech or Moderna vaccines and those who received one dose of J&J/Janssen COVID-19 vaccine. Values reflect total by report date, not administered date. The following states have 80% completeness reporting vaccinations by county, which may result in underestimated vaccination data for counties and CBSAs: NM (79%), VT (74%), CO (71%), WV (54%), VA (51%), GA (48%), HI (0%), TX (0%), AS (0%), PW (0%), FM (0%), MH (0%), MP (0%)

National Watch Center

Legend

The Air Quality Index (AQI) is an index for reporting daily air quality that conveys how air pollution can affect public health. The AQI is divided into six levels of health concern:

AQI Value

-  Hazardous (301-500)
-  Very Unhealthy (201-300)
-  Unhealthy (151-200)
-  Unhealthy for Sensitive Groups (101-150)
-  Moderate (51-100)
-  Good (0-50)
