Sources: CDPH, WHO, CDC, Local County Data, LA Times

The date for which case statistics and hospital data were reported. Hospital COVID data are self-reported through a portal managed by the California Hospital Association and pulled at 2pm. COVID case statistics are reported by local health departments to CalREDIE and are pulled at 2pm. Hospital data and case statistics are integrated by the California Department of Technology and made available through the Open Data Portal the following morning. CA Open Data Portal is at least 24 Hours behind although a backlog of new case reports at the State level has ostensibly been cleared, some County dashboards still contain notes that indicate data are missing. *California Demographics from State Database Blueprint Data Chart 12-15-20 & census.gov . Presumptive active cases - A calculation (Total Cases - Recovered - Dead) (* LA County does not report recovery rates)

A new coronavirus variant is on the rise. Here's why experts are concerned

- The Delta variant is on its way to becoming the dominant strain of coronavirus in the US, raising concerns that outbreaks could hit unvaccinated people this fall.
- A new study shows the Delta variant is associated with almost double the risk of hospitalization compared to the Alpha variant.
- The Alpha (B.1.1.7) variant, which is ["stickier" and more contagious](#) than the original strain of novel coronavirus, became [the dominant strain in the US](#) this spring.
- But health experts worry the Alpha variant could be trumped by the Delta variant, which [appears to be even more transmissible and may cause more severe illness](#) for those not vaccinated

Heroes of laziness, a Hamas supporter and David Hasselhoff. The stars of Germany's absurd Covid vaccination publicity campaign

- Public awareness campaigns launched by governments are usually anodyne affairs. Not in Germany, where officials have managed to spark a number of controversies during the pandemic in their push to keep the public safe.
- From spending millions on videos deemed insensitive, commissioning an alleged Hamas supporter to promote the vaccine for the country's Arabic-speaking population to getting "Baywatch" star David Hasselhoff to promote the jab while millions of people are still waiting desperately. The government is facing some heat for its absurd approach on the public awareness campaigns.
- The debate about their advertising strategy began back in last November, when the federal government released a trilogy of tongue-in-cheek videos using the hashtag #besondereHelden, which means "special heroes." The clips portrayed war heroes from the future, who "fought" against the spread of Covid-19 when they were young by being couch potatoes.

5 Things To Know About California's Reopening Day

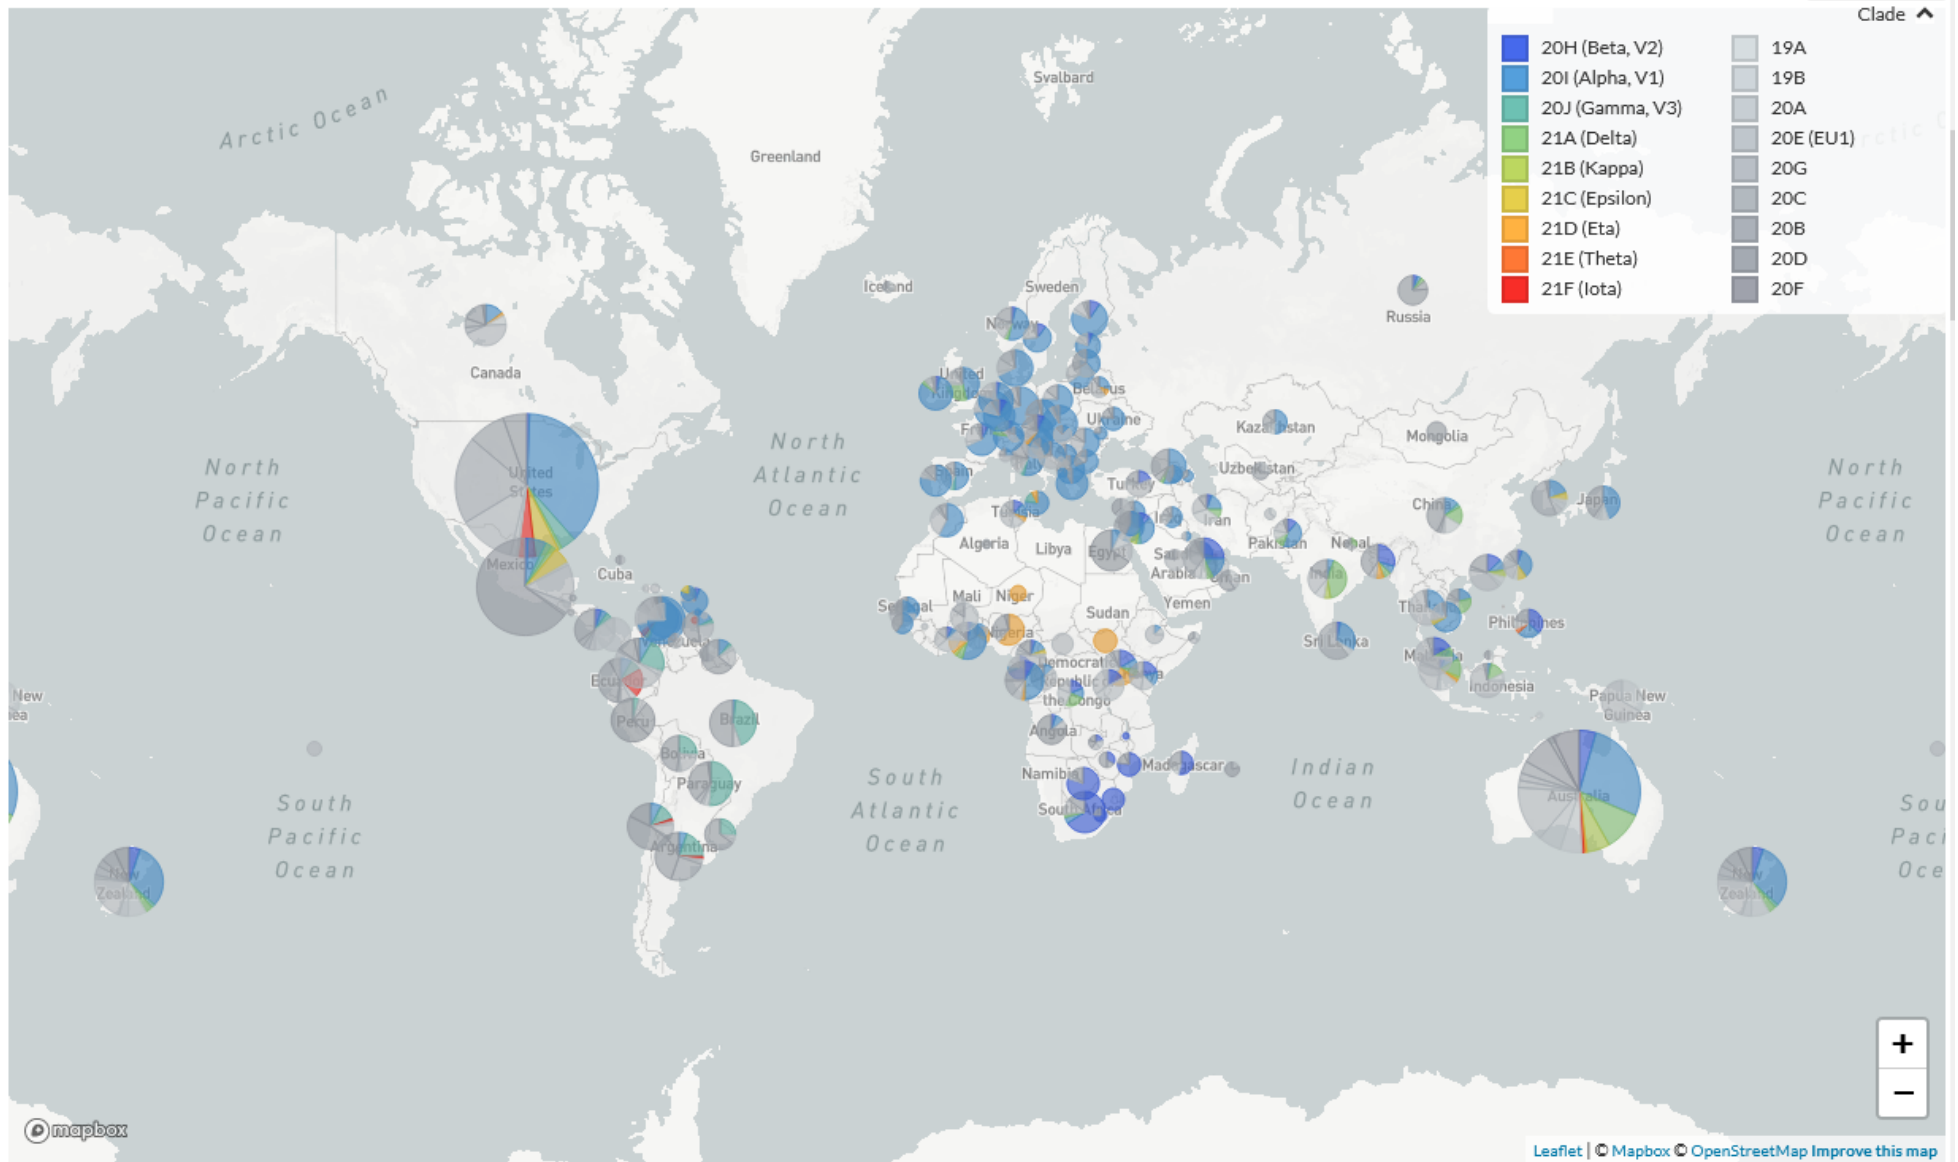

- Almost a year and a half after coronavirus restrictions befell residents in the Golden State, Californians will finally be able to return to "business as usual" on Tuesday — for the most part anyway.
 1. The state will lift restrictions on businesses
 2. Californians should still keep a mask on hand
 3. Masks will likely be required for some in the workplace
 4. Some emergency orders will linger
 5. Masks will still need to be worn on public transit and at K-12 schools

CDC Guidance

<https://www.cdc.gov/coronavirus/2019-ncov/communication/guidance-list.html?Sort=Date%3A%3Adesc>

[Guidance for Reporting SARS-CoV-2 Sequencing Results](#)

It is critically important for the nation's COVID-19 pandemic response to understand the genetic diversity, spread, and evolution of SARS-CoV-2, including variant viruses. This guidance for reporting SARS-CoV-2 sequencing will improve that understanding. Date: 6/13/21

[Testing Strategies for SARS-CoV-2](#)

This guidance describes and compares different types of SARS-CoV-2 (the virus that causes COVID-19) testing strategies, including their intended use and applications, regulatory requirements, and reporting requirements. Date: 6/13/21

[Interim Guidance for Antigen Testing for SARS-CoV-2](#)

Proper interpretation of antigen test results is important for accurate clinical management of patients with suspected COVID-19. This guidance can help healthcare providers make the most effective use of antigen tests in different situations. Date: 6/13/21

[Guidance for Healthcare Workers about COVID-19 \(SARS-CoV-2\) Testing](#)

See considerations and recommendations for health departments supporting COVID-19 (SARS-CoV-2) testing in communities, schools, workplaces, and healthcare settings. Date: 6/13/21

[Considerations for Restaurant and Bar Operators](#)

Learn how restaurants and bars can protect communities during COVID-19. Date: 6/13/21

[Protecting Seafood Processing Workers from COVID-19](#)

Find guidance on how to protect seafood processing workers and employers from COVID-19. Date: 6/10/21

[Agriculture Workers and Employers](#)

Learn what agriculture workers and employers need to know during COVID-19. Date: 6/10/21

[Manufacturing Workers and Employers](#)

Learn what manufacturing workers and employers need to know during COVID-19. Date: 6/10/21

[Meat and Poultry Processing Workers and Employers](#)

Learn what meat and poultry processing facility workers and employers need to know during COVID-19. Date: 6/10/21

[Interim Laboratory Biosafety Guidelines for Handling and Processing Specimens Associated with Coronavirus Disease 2019 \(COVID-19\)](#)

General and specific biosafety guidelines for handling SARS-CoV-2 specimens. Date: 6/10/21

[Guidance for Operating Child Care Programs during COVID-19](#)

CDC guidance for child care programs to have a plan in place to protect staff, children, and their families from the spread of COVID-19. Date: 6/9/21

Update for June 14, 2021

As of June 14, California has 3,697,299 confirmed cases of COVID-19, resulting in 62,505 deaths.

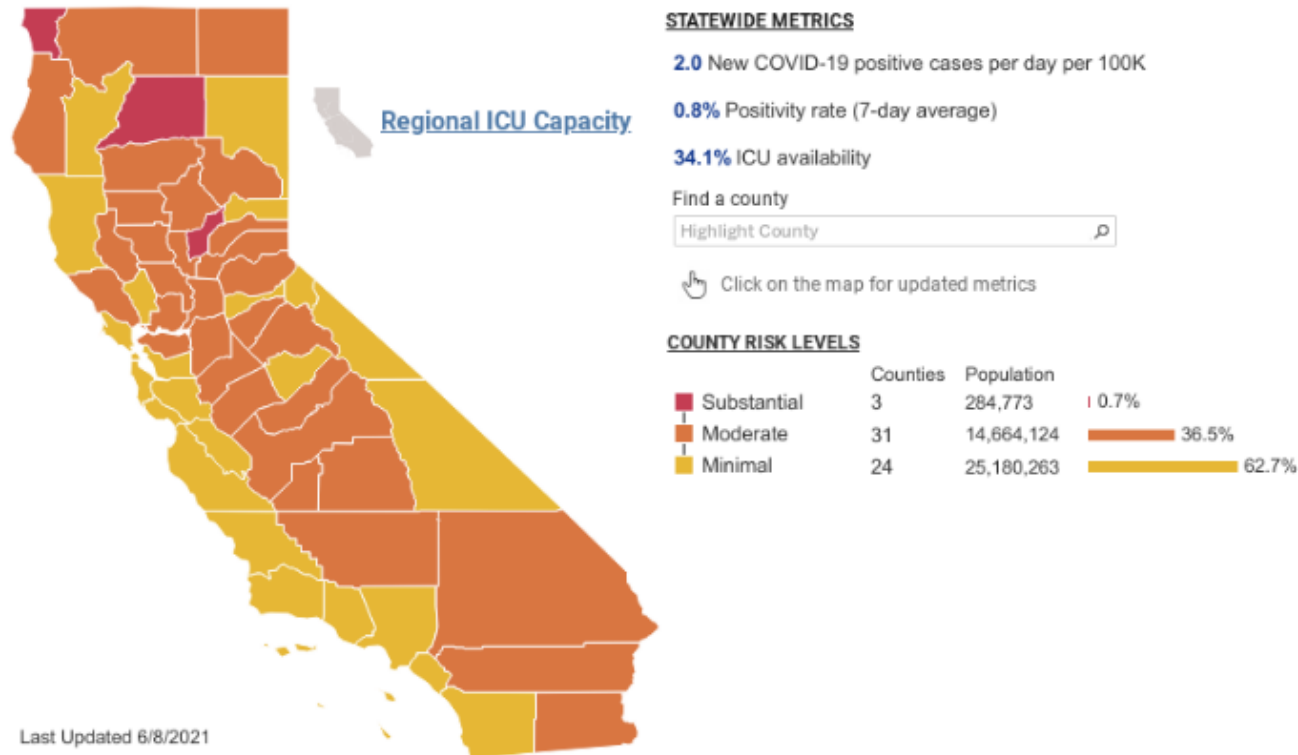

Updated June 14, 2021, with data from June 13, 2021.

Note: Case rate is based on a 7-day average with a 7-day lag. Rates of deaths is based on a 7-day average with a 21-day lag due to delays in reporting. Test positivity is based on a 7-day average with no lag. Directional change is compared to the prior 7-day period. Data is provided by the California Department of Public Health. The population denominators used for the per 100K rates come from the California Department of Finance's population projections for 2020.

WIDESPREAD	SUBSTANTIAL	MODERATE	MINIMAL
<ul style="list-style-type: none"> • More than 10.0 daily new cases (per 100k)* • More than 8.0% positive test for entire county** 	<ul style="list-style-type: none"> • 6.0 – 10.0 daily new cases (per 100k)* • 5.0 – 8.0% positive tests for entire county** • Less than 8.1% positive tests for health equity quartile** 	<ul style="list-style-type: none"> • 2.0 – 5.9 daily new cases (per 100k)* • 2.0 – 4.9% positive tests for entire county** • Less than 5.3% positive tests for health equity quartile** 	<ul style="list-style-type: none"> • Less than 2.0 daily new cases (per 100k)* • Less than 2.0% positive tests for entire county** • Less than 2.2% positive tests for health equity quartile**

Tropical Outlook – Five Day

Central Pacific

Eastern Pacific

Atlantic

Disturbance 1 (as of 8:00 a.m. ET)

- Expected to form this week offshore of the coast of southwestern Mexico
- Environmental conditions could support some gradual development
- 48-hour formation chance: Low (near 0%)
- 5-day formation chance: Low (30%)

Tropical Storm Carlos (as of 8:00 a.m. ET)

- 1,500 miles WSW of the southern tip of Baja California
- Moving WSW at 7 mph
- Maximum sustained winds 40 mph
- Forecast to become a tropical depression today, and degenerate to a remnant low late tomorrow or Wednesday
- Tropical-storm-force winds extend out 25 miles

Disturbance 1 (as of 8:00 a.m. ET)

- 90 miles S of Cape Hatteras, North Carolina
- A tropical storm or depression is likely to form later today
- 48-hour formation chance: High (70%)
- 5-day formation chance: High (70%)

Disturbance 2 (as of 5:00 a.m. ET)

- Over the Bay of Campeche
- Slow development possible
- Tropical depression could form over the next couple of days
- 48-hour formation chance: Low (20%)
- 5-day formation chance: Medium (60%)

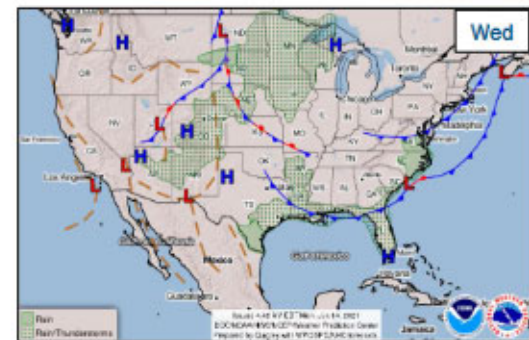

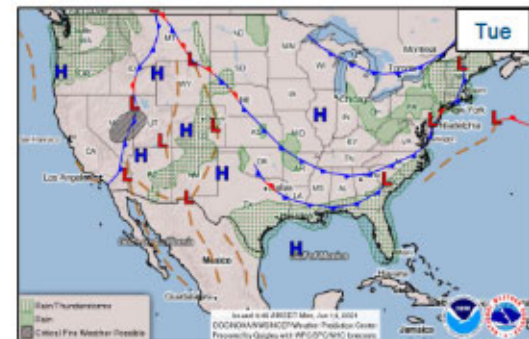

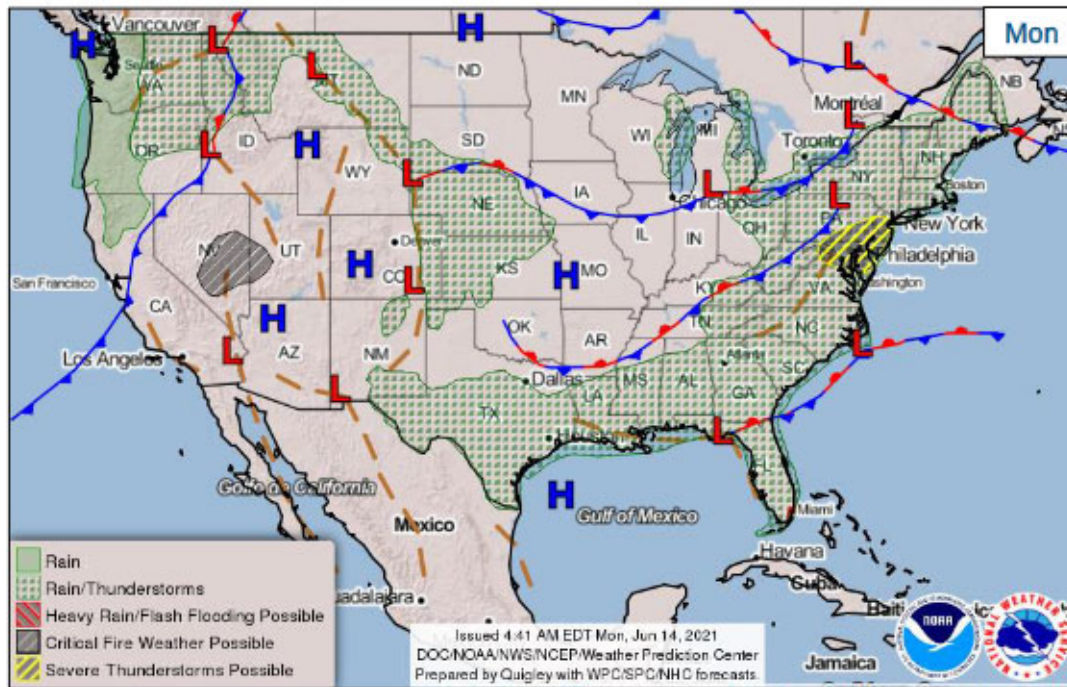

Disturbance 3 (as of 8:00 a.m. ET)

- Offshore of West Africa
- Some development is possible during the next few days
- 48-hour formation chance: Low (10%)
- 5-day formation chance: Low (20%)

Legend

The Air Quality Index (AQI) is an index for reporting daily air quality that conveys how air pollution can affect public health. The AQI is divided into six levels of health concern:

AQI Value

- Hazardous (301-500)
- Very Unhealthy (201-300)
- Unhealthy (151-200)
- Unhealthy for Sensitive Groups (101-150)
- Moderate (51-100)
- Good (0-50)
