The date for which case statistics and hospital data were reported. Hospital COVID data are self-reported through a portal managed by the California Hospital Association and pulled at 2pm. COVID case statistics are reported by local health departments to CalREDIE and are pulled at 2pm. Hospital data and case statistics are integrated by the California Department of Technology and made available through the Open Data Portal the following morning. CA Open Data Portal is at least 24 Hours behind although a backlog of new case reports at the State level has ostensibly been cleared, some County dashboards still contain notes that indicate data are missing. \*California Demographics from State Database Blueprint Data Chart 12-15-20 & census.gov . Presumptive active cases - A calculation (Total Cases - Recovered - Dead) (\* LA County does not report recovery rates)

### Secret Service says nearly 900 employees tested positive for Covid-19

- The US Secret Service says 881 employees [tested positive for Covid-19](#) between March 1, 2020 and March 9, 2021.
- in a Tuesday statement, follows a report by Citizens for Responsibility and Ethics Washington (CREW) that analyzed internal records obtained through a Freedom of Information Act request detailing the infection among agents and other employees
- In the statement 477 special agents, 249 members of the agency's Uniformed Division and 155 other employees tested positive. CREW said the records do not specify the names or assignments of any of the employees.
- "The Secret Service's essential law enforcement mission required agency employees to remain in continuous contact with the public during the pandemic," a spokeswoman said. "This included law enforcement operations at campaign events, during mass gatherings near the White House, and at multiple National Special Security Events—to include the Presidential Inauguration."

### Are California's vaccine incentives working? It's complicated

- Gov. Gavin Newsom announced yet another new vaccine incentive last week -- 50,000 free tickets to Six Flags, if you're wondering -- he made the case that the lotteries, freebies and gift cards are making a difference in the race toward herd immunity.
- "Turns out these incentives have worked," Newsom said. "California lays claim as one of the only states that's seen a week-over-week increase in vaccination doses." the governor cited a 22% increase in doses administered week-over-week as evidence.
- But the data shows a much more complicated story (and we'll get to that 22% number in just a bit).
- The graph shows the number of COVID-19 vaccine doses administered across the state every day since December 2020. You can also click the dropdown menu to see individual counties. The line shows the seven-day average, which helps level out the differences between weekdays and weekends.

## California launches electronic vaccine verification system

- California is launching a new way for people to keep track of their vaccination status online.
- The state is calling it a "Digital COVID-19 Vaccine Record." People can sign up, if they'd like, by logging onto [myvaccinerecord.cdph.ca.gov](https://myvaccinerecord.cdph.ca.gov). You'll enter your name, birthday, email, phone number and create a 4-digit pin.
- Then you'll be sent a digital version of your vaccination record that has the same information on it as the CDC card you already have. You'll also have a QR code that can be scanned if you need to prove vaccination to enter a venue, business or country that requires it.
- "While CDPH recommends that vaccinated Californians keep their paper CDC card in a safe and secure place, we recognize that some people might prefer an electronic version," said California epidemiologist Dr. Erica Pan in a press release. "And if one of the state's nearly 20 million vaccinated Californians misplaces their paper card, the Digital COVID-19 Vaccine Record provides a convenient backup."
- When making the announcement Friday, California health officials avoided using the words "vaccine passport."

## CA REAL ID Upgrade Offered: What To Know

- Californians who renewed their driver's license or identification card during the pandemic just became eligible to get a REAL ID upgrade for free, officials said Monday.
- The fee normally associated with the REAL ID will be waived for those who qualify, the Department of Motor Vehicles said in a statement Monday.
- "We don't want Californians to pay the price for not getting a REAL ID during the pandemic," said Steve Gordon, DMV director. "While the federal government has extended the enforcement date for a REAL ID, there is no need to procrastinate. If you act now, you can take advantage of this offer and upgrade to a REAL ID for free."

## Fries and a Poke: These San Diego McDonald's Are Offers Free COVID-19 Vaccines and Menu Items

- McDonald's is partnering with the San Diego County Health and Human Services Agency (HHSA) to offer free COVID-19 vaccinations at eight locations this week. More than 70 McDonald's across the state are participating.
- The San Diego locations include restaurants in Chula Vista, El Cajon, Escondido, National City, Oceanside, Ramona, San Diego and Vista.
- The pop-up clinics will [offer vaccines](#) to McDonald's employees, their families, and the general public at no cost, and no insurance is required, according to McDonald's. Walk-ups are welcomed.

## OC Phasing Out COVID-19 Data

- The Orange County Health Care Agency has begun to scale back on posting COVID-19 data after more than a year of reporting daily updates for case figures, deaths, hospitalizations and other pandemic metrics.
- Earlier this month, the OC HCA stopped posting case count data on weekends; beginning next month, the agency will update data once per week on Tuesdays by 5 p.m.

## **CDC Guidance**

<https://www.cdc.gov/coronavirus/2019-ncov/communication/guidance-list.html?Sort=Date%3A%3Adesc>

### [Guidance for Reporting SARS-CoV-2 Sequencing Results](#)

It is critically important for the nation's COVID-19 pandemic response to understand the genetic diversity, spread, and evolution of SARS-CoV-2, including variant viruses. This guidance for reporting SARS-CoV-2 sequencing will improve that understanding. Date: 6/21/21

### [Care for Breastfeeding People](#)

Find information on managing breastfeeding patients with confirmed or suspected COVID-19. Date: 6/16/21

### [Guidance for Reporting SARS-CoV-2 Sequencing Results](#)

It is critically important for the nation's COVID-19 pandemic response to understand the genetic diversity, spread, and evolution of SARS-CoV-2, including variant viruses. This guidance for reporting SARS-CoV-2 sequencing will improve that understanding. Date: 6/14/21

### [Patient History and Physical Exam](#)

Healthcare professionals, find suggested workup for post-COVID conditions. Date: 6/13/21

### [General Clinical Considerations](#)

Find general post-COVID care considerations, considerations for follow-up care from hospital admission, and considerations for SARS-CoV-2 infection or mild-to-moderate acute COVID-19 treated in an outpatient setting. Date: 6/13/21

### [Background](#)

Healthcare professionals, find background for post-COVID conditions from the detailed guidance on evaluating and caring for patients with post-COVID conditions. Date: 6/13/21

### [Assessment and Testing](#)

Healthcare professionals, find information on laboratory testing and other assessment and testing for evaluating and caring for patients with post-COVID conditions. Date: 6/13/21

### [Evaluating and Caring for Patients with Post-COVID Conditions: Interim Guidance](#)

Healthcare professionals, find key points for the detailed guidance on evaluating and caring for patients with post-COVID conditions. Date: 6/13/21

### [Testing Strategies for SARS-CoV-2](#)

This guidance describes and compares different types of SARS-CoV-2 (the virus that causes COVID-19) testing strategies, including their intended use and applications, regulatory requirements, and reporting requirements. Date: 6/13/21

### [Interim Guidance for Antigen Testing for SARS-CoV-2](#)

Proper interpretation of antigen test results is important for accurate clinical management of patients with suspected COVID-19. This guidance can help healthcare providers make the most effective use of antigen tests in different situations. Date: 6/13/21

The Air Quality Index (AQI) is an index for reporting daily air quality that conveys how air pollution can affect public health. The AQI is divided into six levels of health concern:

- AQI Value
- Hazardous (301-500)
  - Very Unhealthy (201-300)
  - Unhealthy (151-200)
  - Unhealthy for Sensitive Groups (101-150)
  - Moderate (51-100)
  - Good (0-50)
