The date for which case statistics and hospital data were reported. Hospital COVID data are self-reported through a portal managed by the California Hospital Association and pulled at 2pm. COVID case statistics are reported by local health departments to CalREDIE and are pulled at 2pm. Hospital data and case statistics are integrated by the California Department of Technology and made available through the Open Data Portal the following morning. CA Open Data Portal is at least 24 Hours behind although a backlog of new case reports at the State level has ostensibly been cleared, some County dashboards still contain notes that indicate data are missing. *California Demographics from State Database Blueprint Data Chart 12-15-20 & census.gov . Presumptive active cases - A calculation (Total Cases - Recovered - Dead) (**a Lot of County sites do not report recovery rates or are only updating once a week)

Israel offers COVID booster vaccine for ages 12 and above

- Israel has begun offering a COVID-19 booster to children as young as 12, and its prime minister says a campaign that began a month ago among seniors has slowed a rise in severe illness caused by the Delta variant.
- Announcing the decision on Sunday, top Israeli health officials said the effectiveness of the second dose of the Pfizer-BioNTech vaccine waned six months after administration, making a booster necessary.
- “The third dose brings us to the level of protection achieved by the second dose, when it was fresh,” said Sharon Alroy-Preis, head of public health at Israel’s Health Ministry. “That means, people are 10 times more protected after the third vaccine dose,” she told a news conference, where the expanded booster drive was announced.

Japan suspends 1.63 million Moderna doses over contamination

- Japan has suspended the use of 1.63 million doses of Moderna’s COVID-19 vaccine after reports of contamination in several vials, drugmaker Takeda and the health ministry have said.
- Takeda Pharmaceutical Company, which is in charge of sales and distribution of the Moderna shot in Japan, on Thursday said it had “received reports from several vaccination centres that foreign substances have been found inside unopened vials”.
- “We have not received reports of health problems stemming from the foreign object,” he told reporters. “But we are asking people to consult their physicians if they experience any abnormality.” There had been no “concrete reports” that doses confirmed to contain contaminants had been administered. The firm said it had informed Moderna and “requested an urgent investigation”.

Moderna did not immediately respond to a request for comment.

Pfizer becomes first Covid vaccine to gain full FDA approval

- Pfizer's two-dose Covid-19 vaccine has received full approval from the US Food and Drug Administration (FDA) - the first jab to be licensed in the nation.
- It still has emergency use authorization for children aged 12 to 15.
- Following the announcement, the US military said they would officially require all 1.3m active duty US troops to get vaccinated.

4-Year-Old Child Dies From COVID In Riverside County

- RIVERSIDE COUNTY, CA — A 4-year-old child from Western Riverside County recently died after contracting COVID-19, becoming the youngest person in the county to die from the virus since the pandemic started, county officials announced Friday.
- The child had no underlying health issues, the officials said.
- The death took place during the first week of August, but health officials reported the cause of death this week after receiving confirmation from the coroner’s office. The name of the child and city of residence are not being released.
- To date, 46,992 COVID-19 cases have been reported in kids ages 0-17; in the 18-24 age group, 45,305 cases have been reported, according to RUHS.

Education Dept. Announces Civil Rights Investigations Into 5 States' Mask Mandate Bans

- The U.S. Department of Education sent a warning to five states on Monday that their statewide bans on mask mandates, including in schools, could violate students' civil rights. Suzanne B. Goldberg, the department's acting assistant secretary for civil rights, sent letters to state education leaders in Iowa, Oklahoma, South Carolina, Tennessee and Utah, informing them that the department's Office for Civil Rights is investigating whether their bans are discriminatory.
- At the center of the department's concerns, according to Monday's letters, are students with disabilities who may be at heightened risk for severe illness from COVID-19. Goldberg's letters say these investigations will focus on whether the state bans are discriminatory by preventing students with disabilities from safely returning to in-person education.
- If students with disabilities do not feel safe returning to school because their classmates cannot be required to wear masks, the department's argument goes, then these bans could be considered discriminatory and violate either Section 504 of the Rehabilitation Act of 1973 and/or Title II of the Americans With Disabilities Act of 1990.

Wuhan lab leak theory: How Fort Detrick became a center for Chinese conspiracies

- A disinformation campaign claiming that the Covid-19 virus originated from an American military base in Maryland has gained popularity in China ahead of the release of a US intelligence report on the virus origins.
- In May, President Biden ordered a 90-day probe into whether the Covid-19 virus came from a lab accident or emerged from human contact with an infected animal. Until then, the "Wuhan lab leak" theory had been dismissed by most scientists as a fringe conspiracy theory. As the report is due to be released, China has gone on the offensive. In the past few weeks, Chinese sources have been amplifying a baseless claim that Covid-19 was made in the US.

Can the US crack down on fake vaccination cards?

- As more people in the US are asked to prove they have been vaccinated in order to work, study or socialize, a flourishing black market in fake vaccination cards has sprung up.
- The operator behind "Covid19vaccinecardsss" took just seconds to reply. One of a slew of Instagram accounts hawking fake proof of Covid-19 vaccination cards, inviting the BBC to move over to an encrypted messaging app to make a deal. For \$100, the vendor would deliver a "registered" card, with either the logo of the US CDC or Britain's National Health Service. Payment could be made in Apple Pay or Bitcoin and delivery would be "discrete" and within 24 hours, they promised. "Your cards will be saved into the database system," they told the BBC. "These are very good original vaccine cards, no worries."
- Last week, customs officials seized 6,000 false vaccination cards in separate shipments from China destined for recipients across the US. They were printed with the CDC logo and closely resembled the genuine cards given to US citizens when they are vaccinated.
- Some businesses are concerned they could be held liable if someone is found on their premises with a fake card.

A judge asked a mother if she got the covid vaccine. She said no, and he revoked custody of her son.

- When Rebecca Firlit joined a virtual court hearing with her ex-husband earlier this month, the Chicago mother expected the proceedings to focus on child support.
- "One of the first things he asked me . . . was whether or not I was vaccinated," Firlit, 39, told the Chicago Sun-Times.
- She was not, she said, explaining that she has had "adverse reactions to vaccines in the past" and that a doctor advised her against getting the coronavirus vaccine.
- Cook County Judge James Shapiro then made what the parents' attorneys called an unprecedented decision - he said the mother could not see her 11-year-old son until she got the vaccine.
- The judge then revoked her custody of her son until she was fully inoculated.
- Judges in other states have granted lesser sentences to defendants who opt to get the vaccine, or mandated the vaccine as a condition of release from prison for some inmates.

As Schools Reopen, Child Psychiatrists Expect To See A Surge Of Kids Who Need Help

- "Historically, our busiest times of the year are a couple of weeks into the school year, perhaps the end of September, beginning of October," says [Dr. Richard Martini](#), a child and adolescent psychiatrist at the University of Utah and Primary Children's Hospital in Salt Lake City. "These are times where you really begin to identify kids that are struggling — the schools begin to identify them."
- A significant number of calls from schools requesting education and professional development for teachers around how to support kids with trauma.
- [According to the CDC](#), between March and May, 2020, hospitals across the country saw a 24% increase in the proportion of mental health emergency visits by kids aged 5 to 11 years old, and a 31% increase for kids 12 to 17.

IL School Children Can Now Miss Class For Mental Health: New Law

- Students statewide may now take up to five mental health days per year without a doctor's note, according to a new law signed by Gov. J.B. Pritzker last week.
- Senate Bill 1577 amends the compulsory attendance clause of the state school code to include mental and behavioral health as valid reasons to miss school. If a student misses class for an excused reason, they will be given the opportunity to make up school work, according to the text of the law.
- "It's critical that schools are offering support to students who struggle with their mental health," she said in a statement. "Just as we would allow a student with a cold or fever to stay home from school, students should be able to have the same treatment for days where they need a break for their mental health."
- The bill, which also encourages schools to connect students with mental health resources, passed the Illinois House and Senate unanimously.

COVID-19 Vaccine Booster Shot

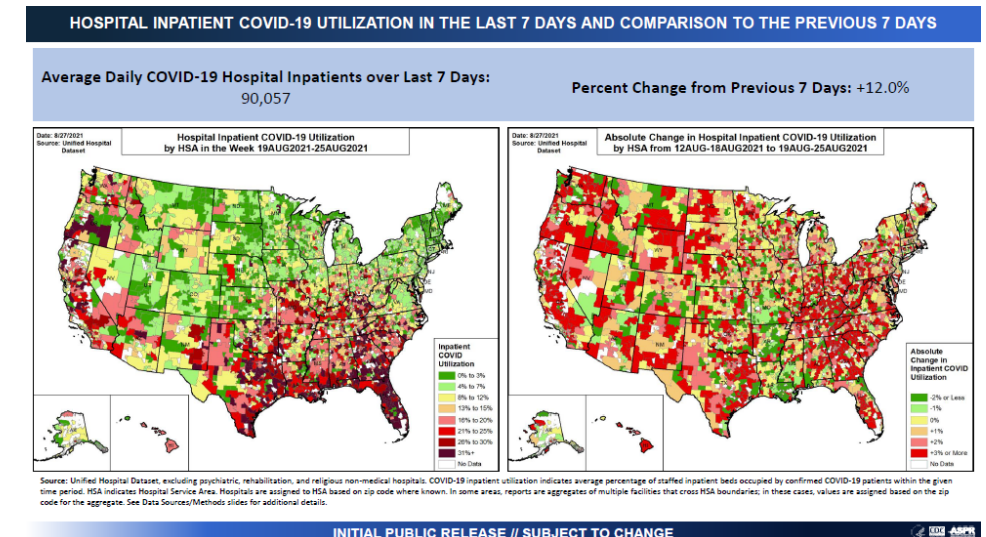

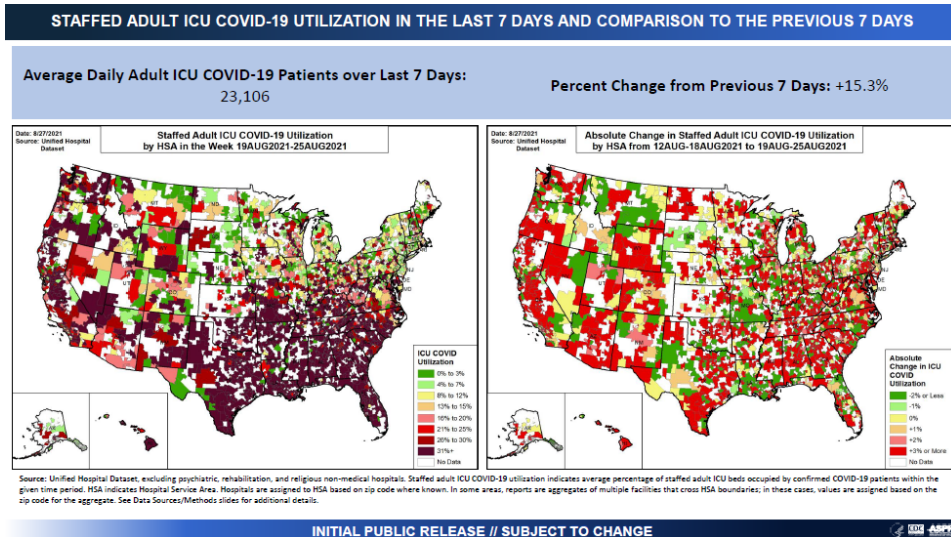

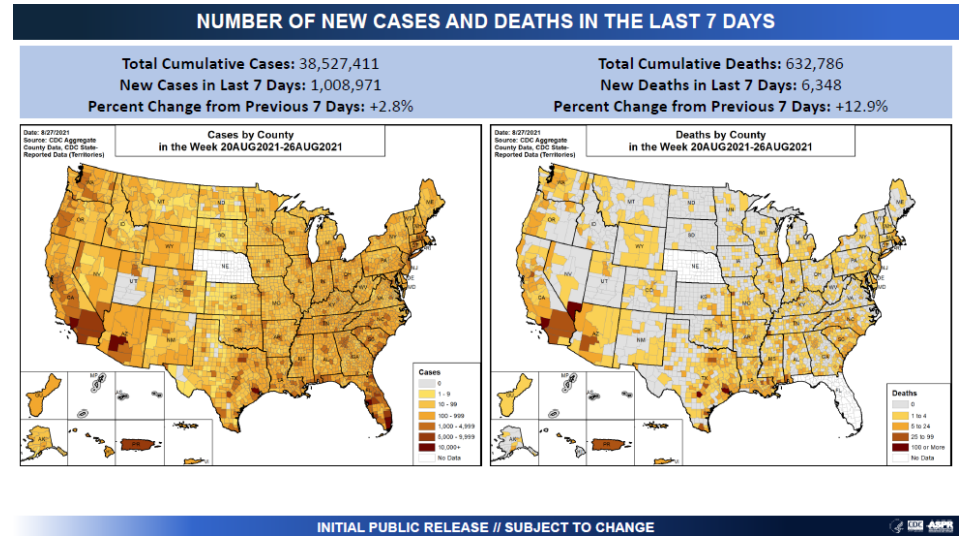

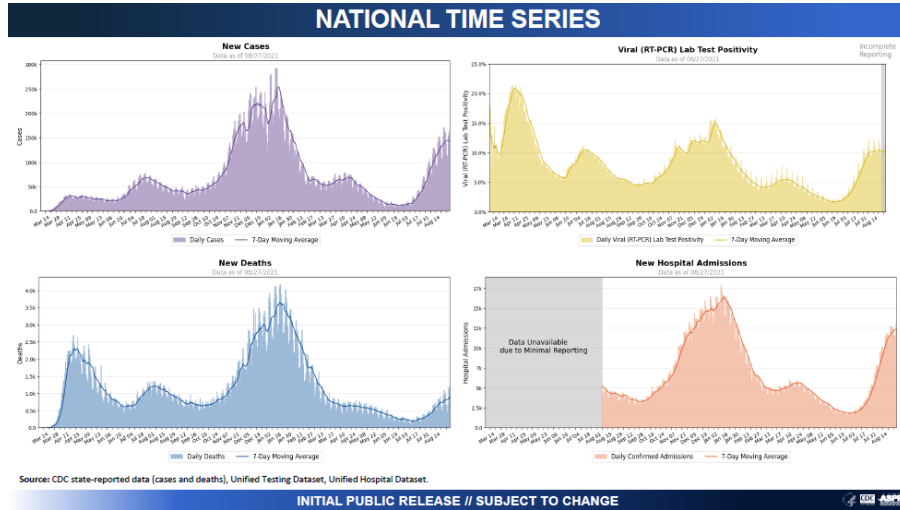

When can I get a COVID-19 vaccine booster?

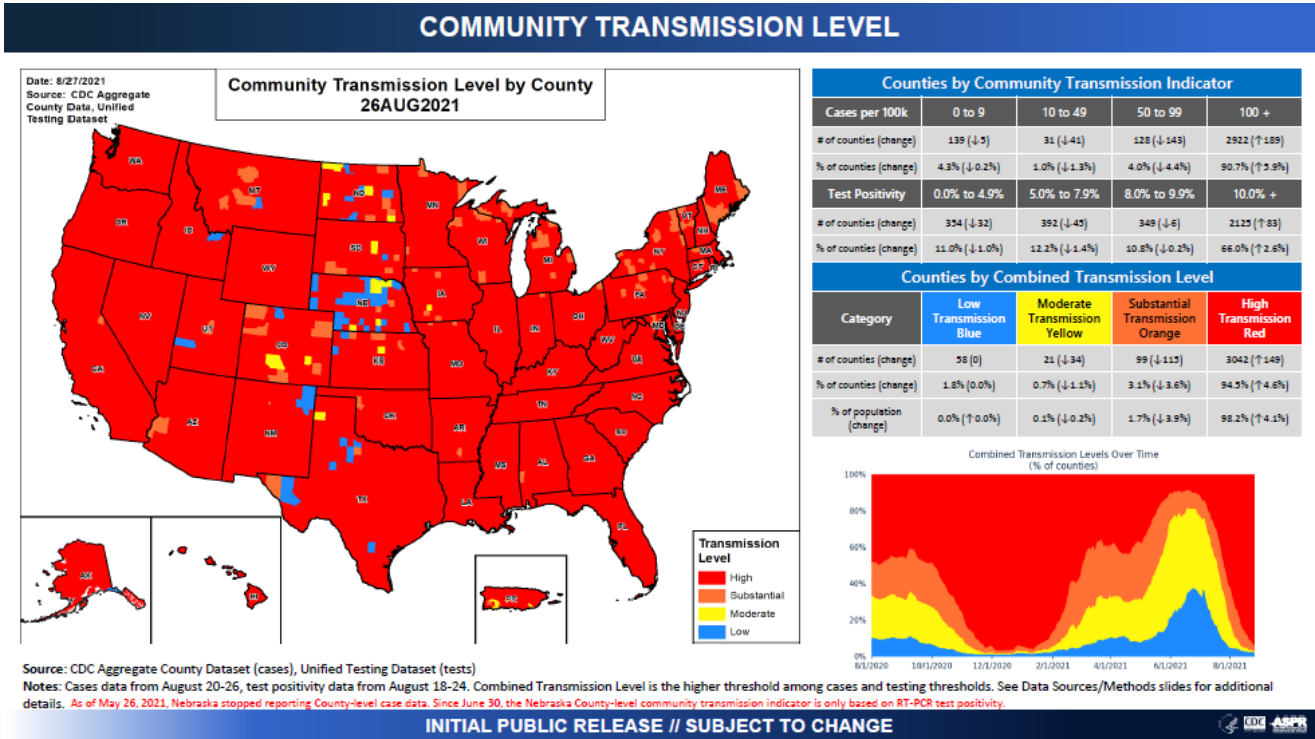

Not immediately. The goal is for people to start receiving a COVID-19 booster shot beginning in the fall, with individuals being eligible starting 8 months after they received their [second dose](#) of an mRNA vaccine (either [Pfizer-BioNTech](#) or [Moderna](#)). This is subject to authorization by the U.S. Food and Drug Administration and recommendation by CDC’s Advisory Committee on Immunization Practices (ACIP). FDA is conducting an independent evaluation to determine the safety and effectiveness of a booster dose of the mRNA vaccines. ACIP will decide whether to issue a booster dose recommendation based on a thorough review of the evidence.

[Guidance for Vaccinating Older Adults and People with Disabilities: Ensuring Equitable COVID-19 Vaccine Access](#)

Ensuring equitable COVID-19 vaccine access is a must. This document summarizes what jurisdictions should consider when planning to vaccinate older adults and people with disabilities in the community. It also provides considerations to help jurisdictions ensure equal opportunities for vaccination of these populations. Date: 8/25/21

[Interim Public Health Recommendations for Fully Vaccinated People](#)

Interim public health recommendations describing the type of activities people who are fully vaccinated can do once fully vaccinated. Date: 8/18/21

[Guidance for General Laboratory Safety Practices during the COVID-19 Pandemic](#)

This guidance addresses general safety concerns for laboratory personnel during the COVID-19 pandemic. It includes recommendations for risk assessments, health and safety plans, social distancing, face coverings, disinfection, and personal hygiene. Date: 8/18/21

[Interim Considerations: Preparing for the Potential Management of Anaphylaxis after COVID-19 Vaccination](#)

Interim considerations for preparing for the initial assessment and management of anaphylaxis following COVID-19 vaccination. Date: 8/17/21

[CDC COVID-19 Vaccine Allocation Transfer and Redistribution Guidance for IHS and Tribal Facilities](#)

This guidance outlines two methods to transfer vaccines to IHS-operated facilities and facilities operated by Tribal Health Program and Urban Indian Organization (I/T/U) participating in the CDC COVID-19 Vaccination Program coordinated through IHS. Date: 8/15/21

[Testing Strategies for SARS-CoV-2](#)

This guidance describes and compares different types of SARS-CoV-2 (the virus that causes COVID-19) testing strategies, including their intended use and applications, regulatory requirements, and reporting requirements. Date: 8/12/21

[Investigating and responding to COVID-19 cases at homeless service provider sites](#)

State and local health departments should take these considerations when investigating and responding to COVID-19 cases at homeless service provider sites and shelters. Date: 8/12/21

[Guidance for Vaccinating Older Adults and People with Disabilities at Vaccination Sites](#)

Vaccination clinics and providers need to be prepared to accommodate older adults and people with disabilities when they receive vaccination services. This guidance will help you be prepared. Date: 8/9/21

[COVID-19 Vaccination Program Operational Guidance](#)

Operational guidance for COVID-19 Vaccination Program jurisdictions operations. Date: 8/9/21

Vaccinated Status by Group

Post-Vaccine COVID-19 Cases

<https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Post-Vaccine-COVID19-Cases.aspx>

What Is a Post-Vaccination COVID-19 Case?

Post-vaccination cases are defined as individuals who are fully vaccinated and have a positive SARS-CoV-2 molecular (e.g. PCR) test 14 days or more after they have completed their full one-dose or two-dose COVID-19 vaccination series. They are also referred to as vaccine breakthrough cases.

How Are Post-Vaccination COVID-19 Cases Identified?

The California Department of Public Health (CDPH) is identifying post-vaccination cases by analyzing the immunization and case registries to find individuals who have a positive SARS-Cov-2 molecular test at least 14 days after they have completed their full vaccination series. Local Health Jurisdictions (LHJs) are also encouraged to alert CDPH of post-vaccination cases especially if they result in severe disease (e.g., hospitalization or death) or if they are associated with an outbreak.

What Is the Current Data on Post-Vaccination Cases in California?

For the week of August 16-22, the average daily COVID-19 case rate among unvaccinated Californians is 51 per 100,000 and the average daily COVID-19 case rate among fully vaccinated Californians is much lower at 7.2 per 100,000

Between January 01, 2021 and August 22, 2021 in California,

- Out of over 22.2 million fully vaccinated individuals, 93,646 post-vaccination cases (**0.4%**) have been identified.
- At least 2,331 individuals identified as post-vaccination COVID-19 cases were hospitalized. However, it is important to note that approximately 65 % of cases have missing hospitalization data. It is also important to note that a post-vaccine case may have been hospitalized for a condition unrelated to COVID-19 reason but were tested for COVID-19 upon admission.
- **Among post-vaccination cases identified, at least 239 people have died.** However, it is unknown if the primary cause of death in these cases was COVID-19 or if there were other contributory or alternate causes.

Tropical Storm Ida

FORECAST TRACK

NWS Weather Prediction Center

Updated 6:00 am EDT, Monday, August 30, 2021

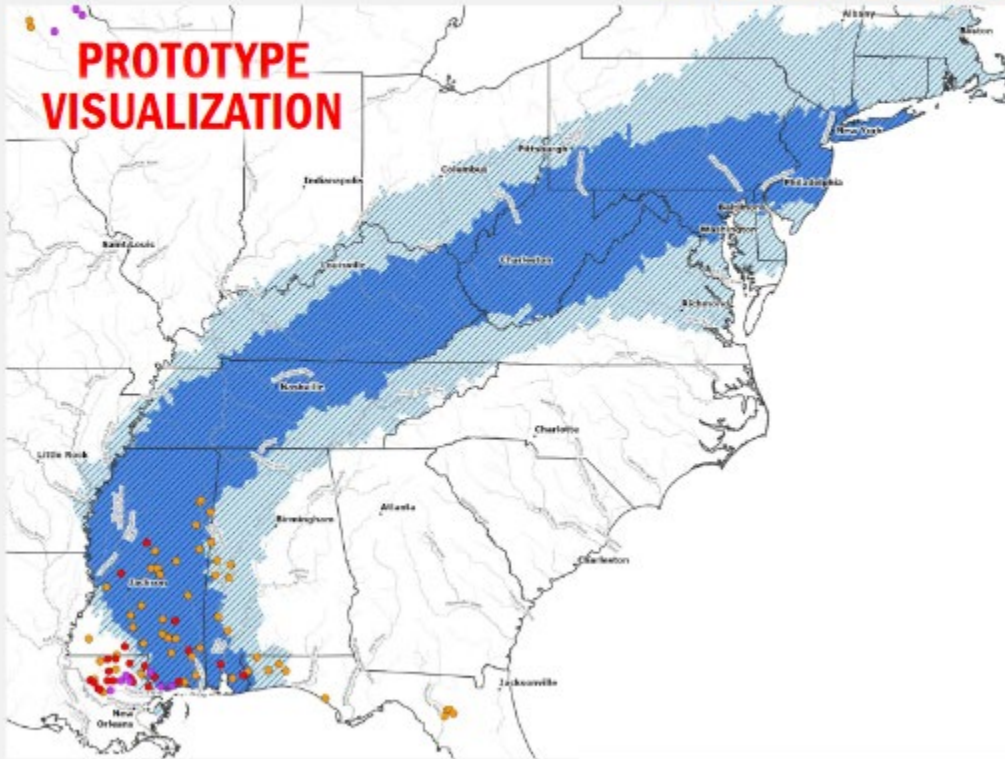

Through Tuesday morning, Ida will produce additional rainfall of 4 to 8" across portions of southeast Louisiana, Mississippi and coastal Alabama. Heavy rain will then spread across TN/OH Valley and Mid-Atlantic thru Thur.

Moderate Risk along the track of Ida. A Moderate Risk correlates to numerous flash flood events, with significant events possible in these areas

Caldor Fire – California

Fire Name (County, ST)	FMAG #	Acres Burned	Percent Contained	Evacuations	Structures (Homes / Other)			Fatalities / Injuries
					Threatened	Damaged	Destroyed	
Caldor (El Dorado, CA)	5413-FM-CA	168,387 (+15,842)	13% (-6)	M: 40,013 (+5,700)	H: 20,931 (+3,104)	H: 25	H: 472 (+3)	0 / 3
				V: 0	O: 520	O: 14	O: 181	

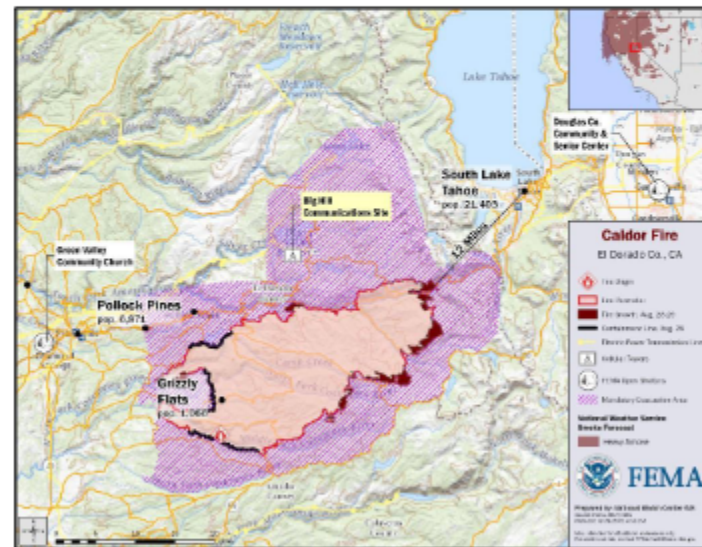

Situation: Fire behavior increased in the northeast and eastern sectors due to the expected southwest flow returning and poor humidity. The fire continues towards HWY 50 and produce ember cast that threatens the HWY control lines. Red Flag warnings are in effect through Tuesday evening. Looking ahead, growth is expected to continue in the northeast however, there should be minimal development in the southern and northern divisions

Impacts:

- Substantial critical utility infrastructure damage and destruction in the Grizzly Flats area
- PG&E distribution/transmission lines, distribution substations, telecom towers, and fiber optic resources threatened
 - Provides power to thousands of customers in El Dorado/surrounding areas; value of assets estimated to be \$11M
 - Approximately 3k (2.5% of county) customers without power (DOE Eagle-1, 8:30 a.m. ET, Aug 30)
- Grizzly Flats water storage/distribution infrastructure threatened; 1.2k customers potentially impacted
- HWY 50 closed from Sly Park to the Hwy 50/Hwy 89 junction; HWY 50 is a major Trans-Sierra HWY vital to emergency evacuation (ICS-209, 8:45 p.m. ET, Aug 29)
- USDA Forest Service, Pacific Southwest Region, closed 9 national forests through Sep 8

Response:

- Total personnel assigned: 3,302 (ICS-209 as of 8:00 a.m. ET, Aug 28)
- 80% of perimeter inspected; damage inspections in progress (ICS-209, 8:00 p.m. ET, Aug 27)
- Anticipated containment date: September 8 (ICS-209 as of 8:00 p.m. ET, Aug 27)
- Firefighting air tankers throughout state are flying suppression missions
- 21 shelters / 528 (+38) occupants statewide due to wildfires (ARC Midnight Shelter Count, 7:01 a.m. ET)
- Region IX IMAT-2 and LNO deployed to CA EOC in Sacramento

Legend

The Air Quality Index (AQI) is an index for reporting daily air quality that conveys how air pollution can affect public health. The AQI is divided into six levels of health concern:

- AQI Value
- Hazardous (301-500)
 - Very Unhealthy (201-300)
 - Unhealthy (151-200)
 - Unhealthy for Sensitive Groups (101-150)
 - Moderate (51-100)
 - Good (0-50)
